the logics of equivalence and difference political identification myth and social imaginary These ideas have informed a number of empirical and theoretical studies associated with the Essex School of Discourse Theory Analyzing Populism A central concern of Laclau's writings has been the question of populism both in Latin America where he began his interrogation of the phenomenon especially the experience of Peronism and then in his engagement with the new social movements and socialist strategy more generally The concept of populism becomes a general way of exploring the primacy of politics in society Critical Engagements Laclau is first and foremost an engaged intellectual who has consistently sought to theorize contemporary events and reality and to debate with the leading intellectual figures of the day with respect to questions of political principle and strategy His recent debates with Judith Butler and Slavoj Žižek in Contingency Hegemony Universality Contemporary Dialogues on the Left published in 2011 London Verso exemplify this critical ethos He continues to elaborate his approach by challenging and articulating related approaches and by situating his work in connection to the democratic Left
