The SQL Language** PostgreSQL Global Development Group,2009 Welcome to the PostgreSQL 8 4 Official Documentation Volume I The SQL Language After many years of development PostgreSQL has become feature complete in many areas This release shows a targeted approach to adding features e g authentication monitoring space reuse and adds capabilities defined in the later SQL standards   **PostgreSQL 9.0 Official Documentation - Volume I. the SQL Language** Postgresql Global Development Group,The Postgresql Global Development Group,2011-03 This book is part of the PostgreSQL 9 0 documentation collection up to date full published by Fultus Corporation PostgreSQL 9 0 includes built in binary replication and over a dozen other major features which will appeal to everyone from web developers to database hackers   *Advanced Systems Design with Java, UML and MDA* Kevin Lano,2005-04-21 The Model Driven Architecture defines an approach where the specification of the functionality of a system can be separated from its implementation on a particular technology platform The idea being that the architecture will be able to easily be adapted for different situations whether they be legacy systems different languages or yet to be invented platforms MDA is therefore a significant evolution of the object oriented approach to system development Advanced System Design with Java UML and MDA describes the factors involved in designing and constructing large systems illustrating the design process through a series of examples including a Scrabble player a jukebox using web streaming a security system and others The book first considers the challenges of software design before introducing the Unified Modelling Language and Object Constraint Language The book then moves on to discuss systems design as a whole covering internet systems design web services Flash XML XSLT SOAP Servlets Javascript and JSP In the final section of the book the concepts and terminology of the Model Driven Architecture are discussed To get the most from this book readers will need introductory knowledge of software engineering programming in Java and basic knowledge of HTML Examines issues raised by the Model Driven Architecture approach to development Uses easy to grasp case studies to illustrate complex concepts Focused on the internet applications and technologies that are essential for students in the online age   **Spatial Databases** Philippe Rigaux,Michel Scholl,Agnès Voisard,2002 The

authors explore and explain current techniques for handling the specialised data that describes geographical phenomena in a study that will be of great value to computer scientists and geographers working with spatial databases

Experience-Based Language Acquisition Brian E. Pangburn,2002-12 Almost from the very beginning of the digital age people have sought better ways to communicate with computers This research investigates how computers might be enabled to understand natural language in a more humanlike way Based in part on cognitive development in infants we introduce an open computational framework for visual perception and grounded language acquisition called Experience Based Language Acquisition EBLA EBLA can watch a series of short videos and acquire a simple language of nouns and verbs corresponding to the objects and object object relations in those videos Upon acquiring this protolanguage EBLA can perform basic scene analysis to generate descriptions of novel videos The general architecture of EBLA is comprised of three stages vision processing entity extraction and lexical resolution In the vision processing stage EBLA processes the individual frames in short videos using a variation of the mean shift analysis image segmentation algorithm to identify and store information about significant objects In the entity extraction stage EBLA abstracts information about the significant objects in each video and the relationships among those objects into internal representations called entities Finally in the lexical acquisition stage EBLA extracts the individual lexemes words from simple descriptions of each video and attempts to generate entity lexeme mappings using an inference technique called cross situational learning EBLA is not primed with a base lexicon so it faces the task of bootstrapping its lexicon from scratch   **Advanced Data Mining and Applications** Hiroshi Motoda,Zhaohui Wu,Longbing Cao,Osmar Zaiane,Min Yao,Wei Wang,2013-12-14 The two volume set LNAI 8346 and 8347 constitutes the thoroughly refereed proceedings of the 9th International Conference on Advanced Data Mining and Applications ADMA 2013 held in Hangzhou China in December 2013 The 32 regular papers and 64 short papers presented in these two volumes were carefully reviewed and selected from 222 submissions The papers included in these two volumes cover the following topics opinion mining behavior mining data stream mining sequential data mining web mining image mining text mining social network mining classification clustering association rule mining pattern mining regression predication feature extraction identification privacy preservation applications and machine learning   **Advances in Artificial Intelligence -- IBERAMIA 2012** Juan Pavón,Néstor D.
