## **Postindustrial Blueprint For Ecology And Equity:**

*Greening the North* Wolfgang Sachs, 2000      **Future as Fairness**, 2004-01-01 Twenty years after the establishment of the World Commission on Environment and Development the 13 contributions in this interdisciplinary volume offer a broad spectrum of perspectives and research based recommendations on environmental sustainability social justice and the human enterprise The cases explored cover global citizenly rights and obligations environmental health ecological building practices tradable fuel permits forestry and illegal logging local waste management employment and risk assessments the genetic modification debate nuclear and toxic waste global environmental governance and 500 years of globalization

**Sustainability Economics**, 2013 The book is a concise introduction to an emerging field within economics Drawing on numerous disciplines including environmental science environmental and ecological economics and optimal growth theory sustainability remains a hazy and complex subject The author set out with two objectives one to bring some order into the proliferating measures models and management of sustainability and two to facilitate access to a complex inter disciplinary subject area The book points to practical ways of assessing and enhancing the long term environmental and economic sustainability of our economies The result is a fully international study that should bridge the gap between disciplines and prove to be an essential guide to anyone interested in one of the most important concepts in the social sciences      **Perverse Subsidies** Norman Myers, Outlines hundreds of examples of perverse subsidies that are granted at the expense of the environment Addresses the implications of perverse subsidies in six leading sectors and shows how these subsidies undercut economies and environments alike      **Guide to Sustainable Development and Environmental Policy** William L Ascher, Natalia Mirovitskaya, 2002-03-29 A compilation of definitions terms and critical commentary on aspects of sustainable development and environmental policy with a strong emphasis on policy tools policy practices and systems of international environmental governance      *International Environmental Justice* Ruchi Anand, 2017-05-15 This important work satisfies the need for a thorough assessment of environmental justice concerns at the global level Using three international environmental case studies the book extends the theory of environmental justice commonly used in domestic settings to the international arena of environmental law policy and politics Spanning the traditional boundaries between political science international relations international law international political economy and policy studies this text is intended primarily for scholars of environmental justice national and international policymakers businesses activists and students of international environmental law public policy and political economy of the third world      *Postmodern Climate Change* Leigh Glover, 2007-01-24 A much needed analysis of international climate change politics as a key issue of modernity and in the context of environmentalism Leigh Glover presents a new way to understand the climate change problem and is concerned with problems of modernity and postmodernity in the context of contemporary environmental thought Focusing on the international politics surrounding the UN agreement of climate change the Framework Convention on Climate Change and

its Kyoto Protocol Glover examines the issue using the key aspects of climate change science global environmental politics and global environmental management

**The Natural Wealth of Nations** David Malin Roodman, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company

**Planet Dialectics** Wolfgang Sachs, 2015-03-12 All effects of human action will inevitably be played out within our planet's limits any hope of infinity is an illusion And yet as Wolfgang Sachs warned almost twenty years ago environmental concerns have been assimilated into the rhetoric dynamics and power structures of development This classic collection of trenchant and elegant explorations addresses the crisis of the Western world's relations with nature and social justice Examining the notions of efficiency speed globalization and development Sachs shows that sustainability truly conceived is incompatible with the worldwide rule of economism Planet Dialectics reveals that the Western development model is fundamentally at odds with both the quest for justice among the world's people and the aspiration to reconcile humanity and nature

**Peter Matthiessen and Ecological Imagination** Intaek Oh, 2010 Peter Matthiessen and Ecological Imagination offers an ecocritical reading of the Watson Trilogy Killing Mister Watson 1990 Lost Man's River 1997 and Bone By Bone 1999 which draws together themes Matthiessen has been exploring both in his fiction and nonfiction While this study argues that his ecological imagination comes from his unique experience as a novelist naturalist environmentalist social activist and a student of Zen it also illustrates that for Matthiessen economic political social racial psychological epistemological and ecological issues are all inseparably interconnected Set in the Everglades frontier in the formative era of American industrial capitalism Matthiessen's novels are his grand attempt to reexamine the root causes of ecological disaster in the region and the costs to the people and the land that accompanied the conquering of the frontier

**GLOBALIZATION IN INDIA** RAMANUJ GANGULY, 2010-02-15 Since the last decade of twentieth century India has strived for an experienced and unprecedented economic turn around The country has witnessed a structural shift in GDP growth propelled largely by new investments and the growth of the value enhancing services sector Globally these efforts are not only source of appreciation but also of assumption for many that India increasingly being seen as part of new axis of influence in the world Long established three headed social problem poverty illiteracy unemployment remains the biggest stumbling block for a post colonial country like India New sets of problems have taken shape in the last quarter of twentieth century when policy makers and market participants have prioritized economic activities for short term gains In context of the above Center of Associates for Sociological Studies and Action undertook to bring out to the fore oft neglected inter disciplinary discussions and analysis in fifteen articles to examine the process of globalization in India taking insights from economics political science and international relations sociology cultural anthropology social ecology management and cultural studies It discusses the impact of the process of globalization on social institutions like marriage family economy politics education and religion The book is intended for postgraduate students and research scholars It provides readers with a clear perspective about creating economics environmental and social capital that can produce

multiplier effect for making national progress more inclusive and sustainable      **Consuming Cities** Ingemar

Elander, Brendan Gleeson, Rolf Lidskog, Nicholas Low, 2005-08-12 This book is about cities as engines of consumption of the world's environment and the spread of policies to reduce their impact. It looks at these issues by examining the impact of the Rio Declaration and assesses the extent to which it has made a difference. *Consuming Cities* examines this impact using case studies from around the world including the USA, Japan, Germany, the UK, China, India, Sweden, Poland, Australia, and Indonesia. The contributors all have direct experience of the urban environment and urban policies in the countries on which they write and offer an authoritative commentary which brings the urban consumption dimension of sustainable development into focus.

*Achieving Sustainable Urban Form* Elizabeth Burton, Mike Jenks, Katie Williams, 2013-07-04 *Achieving Sustainable Urban Form* represents a major advance in the sustainable development debate. It presents research which defines elements of sustainable urban form: density, size, configuration, detailed design, and quality from macro to micro scale. Case studies from Europe, the USA, and Australia are used to illustrate good practice within the fields of planning, urban design, and architecture.

*Preventive Environmental Management* Shyam R. Asolekar, R. Gopichandran, 2005 With reference to India      Where Stuff Comes From Harvey Molotch, 2004-11-23 Molotch takes us on a fascinating exploration into the worlds of technology, design, corporate, and popular culture. We now see how corporations, designers, retailers, advertisers, and other middle men influence what a thing can be and how it is made. We see the way goods link into ordinary life as well as vast systems of consumption, economic and political operation. The book is a meditation into the meaning of the stuff in our lives and what that stuff says about us.      The Impact of Overbuilding on People and the Planet David A. Ness, 2019-02-01 This book challenges the status quo where profligate building and urban development is described as green and low carbon, exposing a number of elephants in the big green room that severely impact upon society and the environment. It questions the ethics, equity, and sustainability of continued growth of the building stock in industrialized contexts amid diminishing demand whilst the developing world is deprived of basic resources and infrastructure. Even a circular built environment may not go far enough when dramatic reduction in consumption of resources is required to meet sufficient service levels. More socio-economic value may be derived from built resources by their stewardship, adaptation, reuse, and equitable sharing while ameliorating the adverse impacts of overconsumption. By taking a wider perspective of a sustainable built environment, the text, illustrated by case studies from the Olympics and nine countries, reframes the policy debate and reforms current approaches through a new theory and manifesto. It will appeal to policy makers, architects, urban designers, educators, students, and green building practitioners.      Design and Manufacture for Sustainable Development 2004 Tracy Bhamra, Bernard Hon, 2004-10-29 Sustainable development is now becoming a matter that must be addressed at both strategic and operational level, whether driven by legislation, the greening of the marketplace, supply chain requirements, or the pressure of events associated with climate change. *Design and Manufacture for Sustainable Development 2004* is an

international volume including papers by distinguished authors for academia and industry These international papers encompass the holistic study and interchange of ideas on the theory practice tools and methodology for the entire product life cycle within the framework of sustainable development

**Routledge International Handbook of Green**

**Criminology** Nigel South, Avi Brisman, 2020-04-14 The Routledge International Handbook of Green Criminology was the first comprehensive and international anthology dedicated to green criminology It presented green criminology to an international audience described the state of the field offered a description of a range of environmental issues of regional and global importance and argued for continued criminological attention to environmental crimes and harms setting an agenda for further study In the six years since its publication the field has continued to grow and thrive This revised and expanded second edition of the Handbook reflects new methodological orientations new locations of study such as Asia Canada and South America and new responses to environmental harms While a number of the original chapters have been revised the second edition offers a range of fresh chapters covering new and emerging areas of study such as conservation criminology eco feminism environmental victimology fracking migration and eco rights and e waste This handbook continues to define and capture the field of green criminology and is essential reading for students and researchers engaged in green crime and environmental harm

**The Development**

**Dictionary** Wolfgang Sachs, 2010-01-15 In this classic collection some of the world's most eminent critics of development review the key concepts of the development discourse Each essay examines one concept from a historical and anthropological point of view highlights its particular bias and exposes its historical obsolescence and intellectual sterility The authors argue that a bidding farewell to the whole Eurocentric development idea is urgently needed in order to liberate people's minds in both North and South for bold responses to the environmental and ethical challenges now confronting humanity The combined result forms a must read invitation to experts grassroots movements and students of development to recognize the tainted glasses they put on whenever they participate in the development discourse
