Postmodernism And Public Policy:

Postmodernism and Public Policy John B. Cobb Jr., 2012-02-01 One of America's preeminent systematic theologians John B. Cobb Jr. examines a range of social issues in his latest groundbreaking work *Postmodernism and Public Policy*. Cobb uses a naturalistic postmodern perspective to make constructive proposals about a wide range of topics in the public eye. *Postmodernism and Public Policy* shows how a postmodern Christianity can contribute positively to thinking about religious and cultural pluralism and how this can give direction to the educational enterprise. It proposes ways of understanding sex, gender, and race that take diversity seriously without lapsing into a debilitating relativism that inhibits political action. Arguing for a shift from individualism to thinking of persons in community, it proposes that the world be organized from the bottom up in communities of communities and spells out what this implies for the political and economic orders and the relationship between them. Cobb shows that formulations on all these topics can be coherently interconnected and he develops the implications of such thinking for some specific ethical and political issues that now trouble the United States, such as abortion, physician-assisted suicide, and homosexuality. *Public Policy and Local Governance* Peter Bogason, 2000

Internationalization and demands for more democratic influence at the local level have undermined the traditional methods of policy analysis. This work offers an institutional analysis of the new networks in public governance. Takes a postmodern approach which recognizes fragmentation within institutional organizations and offers an alternative bottom-up approach to the analysis of local governance. Discusses collective action at the local level and describes how it is linked to the public sector through the need for financial, expert, and legal resources. Bogason teaches public administration at Roskilde University, Denmark. Annotation copyrighted by Book News, Inc., Portland, OR. Postmodern Public Policy Hugh T. Miller, 2012-02-01

Postmodern Public Policy introduces new ways of investigating the urgent difficulties confronting the public sector. The second half of the twentieth century saw approaches to public administration, public policy, and public management dominated by technical, instrumental thought that aspired to neutrality, objectivity, and managerialism. This form of social science has contributed to a public sector where policy debates have been reduced to bumper-sticker slogans, a citizenry largely alienated and distant from government, and analysis that ignores history and context and eschews the lived experiences of actual people. Hugh T. Miller brings together the latest thinking from epistemology, evolutionary theory, and discourse theory in an accessible and useful manner to emphasize how a postmodern approach offers the possibility of well-considered, pragmatic solutions grounded in political pluralism and social interaction between public service professionals and community members.

Postmodern Public Policy Hugh T. Miller, 2002-08-29 Confronts the challenge presented to traditional public policy by postmodern thought.

Old Age and Agency Emmanuelle Tulle, 2004 This book is about rethinking the ways in which we make sense of social action or agency in later life The contributions in this collection challenge traditional academic approaches to the study of later life which arguably often deny older people agency Social gerontology and the wider society should be more reflexive and rather than contribute to the continued marginalisation of older people should draw attention to the extent to which the latter's actions may be understood within the set of normalising discourses which

people have to manage and negotiate as they get old The purpose of this collection is to continue this process by providing philosophical theoretical conceptual and empirical direction for a reflexive social gerontology This book argues that the management of later life has become complex caught as it is within a broad discourse which continues to construct old age as a time of decline and dependency but has shifted the burden of responsibility for the avoidance of decline on individuals
