Power And Crisis In The City:

Power and Crisis in the City Roger Friedland, 1983 City Power Richard C. Schragger, 2016

Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change. In *City Power* Richard Schragger challenges this conventional wisdom arguing that cities can and should pursue aims other than making themselves attractive to global capital. Using the municipal living wage movement as an example, Schragger explains why cities are well positioned to address issues like income equality and how our institutions can be designed to allow them to do so.

Cities and Power Göran Therborn, 2017-10-02

What do cities tell us about power? How does power shape cities? These are the main questions answered by a multidisciplinary set of eminent urban scholars in crisp articles on capital cities from around the world from Buenos Aires to Tokyo from Jakarta to Moscow. Focus is on contemporary cities and their manifestations and representations of power though often with a historical grounding and the collection also includes an example of archaeological urban analysis from northern Mesopotamia. Through its variety of approaches by leading scholars of the field and its variety of cities with their different histories and their diverse national contexts and political organization the book gives a uniquely insightful and easily accessible world overview of cities of power. This book was published as a special issue of the *International Journal of Urban Sciences*.

Mega-Events, City and Power Nelma Gusmão de Oliveira, 2020-10-21

This book examines the power relations that emerge from the convergence of the universe in which the sporting spectacle is produced and the universe in which a city is produced. It adopts Bourdieu's concept of field to explore the interests and disputes involved in the production of sports mega-events across different times and spaces and the role of host cities in these processes. It aims to identify the bases that give these spectacles the power to produce disruptions in the social fabric of the host cities and countries and to enable the production of authoritarian forms of exercising power. By observing the historical constitution of the field of production of sport spectacle as an autonomous field, this book explores how sport mega-events create both an arena and a context for radical expressions of authoritarianism of neoliberal planning models. It will be of interest to students, scholars, and professionals in architecture and urban studies, urban planning.
