Power And Illness:

Power and Illness Daniel M. Fox, 1993-09-27 During most of this century American health policy has emphasized caring for acute conditions rather than preventing and managing chronic illness even though chronic illness has caused most sickness and death since the 1920s In this provocative and wide ranging book Daniel Fox explains why this has been so and offers a forceful argument for fundamental change in national health care priorities Fox discusses how ideas about illness and health care as well as the power of special interest groups have shaped the ways in which Americans have treated illness Those who make health policy decisions have increased support for hospitals physicians and medical research believing that people then would become healthier This position implemented at considerable cost has not adequately taken into account the growing burden of chronic disabling illness While decision makers may have defined chronic disease as a high priority in research they have not given it such a priority in the financing of health services The increasing burden of chronic illness is critical Fox suggests ways to solve this problem without increasing the already high cost of health care but he does not underestimate the difficulties in such a strategy Advocating the redistribution of resources within hospital and medical services he targets those that are redundant or marginally effective There could be no more timely subject today than American health care And Daniel Fox is uniquely able to address its problems A historian of medicine with knowledge of how hospitals and physicians behave and how health policy is made at government levels he has extensively researched published and unpublished documents on health care What he proposes could profoundly affect all Americans

In Sickness and in Power David Owen, 2008-05-30 The course of modern world history has been critically shaped by the physical and mental illnesses of heads of state sometimes in the public eye but usually in secrecy Democratic politicians as diverse as Woodrow Wilson Franklin D Roosevelt Churchill Kennedy Johnson Nixon Pompidou Mitterrand Blair George W Bush Chirac and Sharon all lied about their health Between 1906 and 2008 seven Presidents are judged to have been mentally ill while in office Theodore Roosevelt bipolar disorder Taft breathing related sleep disorder Wilson major depressive disorder Coolidge major depressive disorder Hoover major depressive disorder Johnson bipolar disorder and Nixon alcohol abuse Many despots such as Hitler Stalin Saddam Hussein Pol Pot Idi Amin and Robert Mugabe have been branded by the press and public opinion as suffering mental illnesses Lord Owen argues neither Hitler nor Stalin were mad in any sense the medical profession recognizes whereas Mussolini and Mao had depression possibly bipolar disorder Something happens to some leaders mental stability while in power that is captured by Bertrand Russell's phrase the intoxication of power Hubristic behavior with excessive self confidence is almost an occupational hazard for heads of government as it is for leaders in other fields such as business and the military for it feeds on isolation and excessive deference Owen argues that a medically definable condition called Hubris Syndrome affects some heads of government the longer they stay in office or after a specific triggering event such as 9 11 Recent leaders such as George W Bush Tony Blair and Margaret Thatcher have developed Hubris Syndrome

Symptoms include patterns of reckless behavior bad judgment and operational incompetence often compounded by delusions of personal infallibility and divine exemption from political accountability Lord Owen makes the cases that democratic societies need to implement new procedures for dealing with illness in their own heads of government and that they need to empower the United Nations to use new procedures and means for removing despots whose behavior becomes so hubristic as to pose a grave threat to their own people or the world

Illness and Power Brant Wenegrat,1996-09 Since ancient times physicians have believed that women are especially vulnerable to certain mental illnesses Contemporary research confirms that women are indeed more susceptible than men to anxiety depression multiple personality and eating disorders and several forms of what used to be called hysteria Why are these disorders more prevalent in women Brant Wenegrat convincingly asserts that women s excess risk stems from a lack of social power He reviews women s social power from an evolutionary and cross cultural perspective and places mental disorders in the context of evolution and societal organization In this comprehensive look at mental disorders commonly associated with women Brant Wenegrat convincingly asserts that women s excess risk stems from a lack of social power
