## **Power And Ideas:**

Ideas, Political Power, and Public Policy Daniel Beland, Martin B. Carstensen, Leonard Seabrooke, 2018-04-19 Through the last couple of decades scholars on both sides of the Atlantic have increasingly emphasized the importance of political ideas in understanding processes of change and stability in politics and public policy Yet surprisingly relatively little has been done to more clearly and stringently conceptualize the relationship between political power and the role of ideas in public policy and political development This volume addresses this major lacuna in the policy and political studies literature by bringing some of the best scholars in the field who each write about the relationship between ideas and power in politics and public policy The contributions frame the concept of ideational power and explore ways in which ideas shape power relations across a number of distinct countries and policy areas The topics covered include austerity coalition building monetary policy social policy tax policy and macroeconomic indicators The volume features a short introduction written by the co editors and a final recapitulative essay prepared by Mark Blyth one of the most cited scholars in the field This book was previously published as a special issue of the Journal of European Public Policy      **ESSAY ON MAN'S IDEAS OF POWER** JOHN FARAM, 1857

**Essay on man's ideas of Power; being a new exposition of the principles of Philosophy proper** John FARAM, 1857

Power in Ideas Kirsten Adams, Daniel Kreiss, 2021-04-30 This Element argues that understanding media and democracy in troubled times requires an analytical framework that takes seriously the role of ideas in political life and communication We develop a framework for analyzing ideas and argue that the empirical study of ideas should combine interpretive approaches to derive meaning and understand influence with quantitative analysis to help determine the reach spread and impact of ideas We illustrate our approach through three case studies the idea of reparations in Ta Nehisi Coates's *The Case for Reparations* the idea of free expression in Mark Zuckerberg's Facebook policy speech at Georgetown and Andrew Yang's idea of the Freedom Dividend as a form of universal basic income We trace the landscapes and spheres within which these ideas emerged and were articulated within the ways they were encoded in discourse the fields they travelled across and how they became powerful      The Power of Public Ideas Robert B. Reich, 1988      **Constituent Power and the Legitimacy of**

**International Organizations** John G. Oates, 2020-02-10 This book develops a constitutional theory of international organization to explain the legitimization of supranational organizations Supranational organizations play a key role in contemporary global governance but recent events like Brexit and the threat by South Africa to withdraw from the International Criminal Court suggest that their legitimacy continues to generate contentious debates in many countries Rethinking international organization as a constitutional problem Oates argues that it is the representation of the constituent power of a constitutional order that is the collective subject in whose name authority is wielded which explains the legitimization of supranational authority Comparing the cases of the European Union the World Trade Organization and the International Criminal Court Oates shows that the constitution of supranationalism is far from a functional response to the

pressures of interdependence but a value laden struggle to define the proper subject of global governance The book will be of interest to students and scholars of international organization and those working in the broader fields of global governance and general International Relations theory It should also be of interest to international legal scholars particularly those focused on questions related to global constitutionalism *Dodge Idea and Power and Transmission*, 1908 *Idea Power* Chicago Pneumatic Tool Company, 1910 *The Power of Public Ideas* Robert B. Reich, 1988 *Power* Charles Edward Lucke, 1911

**John Warden and the Renaissance of American Air Power** John Andreas Olsen, 2007-06-30 Included on the Chief of Staff of the United States Air Force's reading list for 2008 and the Royal Air Force's Centre for Air Power Studies 2008 Reading List Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm's air campaign Warden's radical ideas about air power's purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey's Inc in 1989 Presenting both the positives and negatives of Warden's personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments

**Power**, 1929 **Seeking a Higher Power** Michael Cowl Gordon, 2025-02-25 Alcoholics Anonymous and other twelve step programs have had great success in restoring the lives of millions of people However millions more fail to grasp the program successfully The biggest obstacle appears to be the requirement of reliance on a higher power Many people are turned off by the frequent mention of God in the meetings and the literature This book offers the reader ways to approach the idea of a higher power and of how to rethink the idea of God that hopefully will overcome prejudice that has built up in the minds of prospective members Gordon has written a collection of 38 essays on topics such as love spirituality Buddhism Native American spirituality and compassion and an offers an extensive bibliography and suggested reading list This book will be a valuable resource for people trying to negotiate their recovery journey

**The Balance Of Power** Michael Sheehan, 2004-11-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company *The Ways of the Mind* Henry Foster Adams, 1925

**Power, Perception, and Politics in the Making of Iranian Grand Strategy** Kevjn Lim, 2022-07-04 This book explains changes to Iranian grand strategy over the past four decades and it does so by advancing a multicausal model that unifies the three main paradigms of International Relations IR theory Hence ideas constructivism mediate between the structure of material capabilities realism and agents liberalism and interact with each to produce respectively threat perception and political preferences Using these two explanatory factors the author demonstrates how the Islamic Republic's grand strategy has systematically varied over time to produce a mix of outcomes that includes balancing expansionism bandwagoning appeasement engagement and retrenchment Beyond its theoretical contribution this book is policy relevant in that it explains and predicts the external conduct of what is arguably the Middle

East's most consequential actor with implications reverberating far beyond the region. Academic in conception and rigor, the book is intended not only for specialists and practitioners but appeals to the lay reader interested in the broader Middle East. West Asia, the region's relationship with major powers and regional conflict dynamics. *EU and NATO Relations with Russia* Glenn Diesen, 2016-03-09. Do the EU and NATO threaten Russian security? The book explores the rise of these exclusive inter-democratic security institutions after the collapse of the Soviet Union and the ensuing effects on relations with Russia. Two competing theories are tested to explore whether these institutions aggravate or mitigate the security dilemma with Russia. These institutions can be theorised to promote security as a positive sum game through European integration and democracy promotion or pursue collective hegemony with ideologically uncompromising bloc politics. Glenn Diesen argues that a European security architecture that demotes the largest state on the continent to an object of security inevitably results in European integration becoming a zero-sum geopolitical project that has set the West on a collision course with Russia.

**Awkward Powers: Escaping Traditional Great and Middle Power Theory** Gabriele Abbondanza, Thomas Stow Wilkins, 2021-10-04. This book introduces the editors' new concept of Awkward Powers. By undertaking a critical re-examination of the state of International Relations theorising on the changing nature of the global power hierarchy, it draws attention to a number of countries that fit awkwardly into existing but outdated categories such as great power and middle power. It argues that conceptual categories pertaining to the apex of the international hierarchy have become increasingly unsatisfactory and that new approaches focusing on such Awkward Powers can both rectify shortcomings on power theorising whilst shining a much-needed theoretical spotlight on significant but understudied states. The book's contributors examine a broad range of empirical case studies including both established and rising powers across a global scale to illustrate our conceptual claims. Through such a novel process, we argue that a better appreciation of the de facto international power hierarchy in the 21st century can be achieved.

*Soft Power in Japan-China Relations* Utpal Vyas, 2010-12-14. Soft power has tended to be overlooked in the field of international relations, often dismissed as lacking relevance or robustness as a theoretical concept. This book seeks to expand upon the idea of soft power in international relations and to investigate how it actually functions by looking at three case studies in Japan-China relations during the post-war period. These cases involve the action of Japan's soft power in China due to the activities of agents at three levels in society: the state level (an agency of the central government), the sub-state level (a local government), and at the non-state level (a non-governmental organisation). In addition, a major theme of the book is to examine the role of important international actors whose roles are not covered sufficiently in international relations discourse. Utpal Vyas demonstrates ways in which soft power is a useful analytical tool to understand relations between China and Japan in the early 2000s. The case studies help to reveal the complexities of interaction between China and Japan beyond the usual state-level analyses and offer a valuable resource for the study of Sino-Japanese relations and IR in general. This book will be of interest to academics and

postgraduate students in Japanese studies Chinese studies and International Relations      The Middle Power Project Adam Chapnick, 2007-10 Based on materials not previously available to Canadian scholars The Middle Power Project presents a critical reassessment of the traditional and widely accepted account of Canada's role and interests in the formation of the United Nations
