**International Perspectives and Empirical Findings on Child Participation** Tali Gal, Benedetta Duramy, 2015-03-20 The 1989 UN Convention on the Rights of the Child has inspired advocates and policy makers across the globe injecting children s rights terminology into various public and private arenas Children s right to participate in decision making processes affecting their lives is the acme of the Convention and its central contribution to the children s rights discourse At the same time the participation right presents enormous challenges in its implementation Laws regulations and mechanisms addressing children s right to participate in decision making processes affecting their lives have been established in many jurisdictions across the globe Yet these worldwide developments have only rarely been accompanied with empirical investigations The effectiveness of various policies in achieving meaningful participation for children of different ages cultures and circumstances have remained largely unproven empirically Therefore with the growing awareness of the

importance of evidence based policies it becomes clear that without empirical investigations on the implementation of children's right to participation it is difficult to promote their effective inclusion in decision making This book provides a much needed first broad portrayal of how child participation is implemented in practice today Bringing together 19 chapters written by prominent authors from the United States Canada the United Kingdom Ireland New Zealand Australia and Israel the book includes descriptions of programs that engage children and youth in decision making processes as well as insightful findings regarding what children their families and professionals think about these programs Beyond their contribution to the empirical evidence on ways children engage in decision making processes the volume's chapters contribute to the theoretical development of the meaning of participation citizenship inclusiveness and relational rights in regards to children and youth There is no matching to the book's scope both in terms of its breadth of subjects and the diversity of jurisdictions it covers The book's chapters include experiences of child participation in special education child protection juvenile justice restorative justice family disputes research and policy making

*Vygotsky and Special Needs Education* Harry Daniels, Mariane Hedegaard, 2011-02-17 This is an international guide to using Vygotsky's theories to support children and schools in special needs education After Piaget Vygotsky is perhaps the most important educational theorist of the twentieth century Support for schools and pupils with additional needs has been theorised in a number of ways over the last 100 years and much interest has been shown in the development and relevance of Vygotsky's ideas It is ironic therefore that so little has been written about the practical application of such a perspective to the field This book brings together researchers working in the UK and Denmark to reflect on the benefits to be had from taking such a stance on support for children and schools All the contributors are connected with work that has been done at PPUK and CSAT research centres at the universities of Copenhagen and Bath Both centres enjoy strong reputations for their contributions to cultural historical theory The authors pursue issues raised by a post Vygotskian approach and which make important contributions to the development of the fields of policy and practice

as well as interviews with key practitioners policy makers activists delegates and academics from Japan South Africa Brazil Nicaragua Australia the United Kingdom Finland the United States and Italy to examine the emergence of the young citizen as a key global priority in the work of the UN NGOs government and academia In so doing the book engages contemporary and interdisciplinary debates around citizenship rights childhood and youth to examine the complex conditions through which children and young people are governed and invited to govern themselves The book argues that much of what is considered children and young people s participation today is part of a wider neoliberal project that emphasises an ideal young citizen who is responsible and rational while simultaneously downplaying the role of systemic inequality and potentially reinforcing rather than overcoming children and young people s subjugation Yet the book also moves beyond mere critique and offers suggestive ways to broaden our understanding of children and young people s participation by drawing on 15 international examples of empirical research from around the world including the Philippines Bangladesh the United Kingdom North America Finland South Africa Australia and Latin America These examples provoke practitioners policy makers and academics to think differently about children and young people and the possibilities for their participatory citizenship beyond that which serves the political agendas of dominant interest groups
