Science and Narratives of Nature Sundar Sarukkai,2017-07-05 The discourse and practice of science are deeply connected to explicit and implicit narratives of nature However nature has been understood in diverse ways by cultures across the world Could these different views of nature generate the possibility of alternate views on science Part of the innovative series Science and Technology Studies this volume looks at different conceptualizations of nature and the manner in which they structure the practice of the sciences The essays draw upon philosophy history sociology religion feminism mathematics and cultural studies and establish a dialogue between cultures through a multi disciplinary exploration of science With contributions from major scholars in the field this volume will deeply interest scholars and students of science and technology studies sociology history and philosophy of science as also environmental studies

Critical Skills for Environmental Professionals Jennifer Pontius,Alan McIntosh,2019-12-20 This textbook focuses on a set of skills based learning outcomes common among undergraduate environmental programs It covers critical scientific skills and ways of thinking that bridge the gap between the knowledge based content of introductory environmental textbooks and the professional skills students of the environment need to succeed in both their academic programs and professional careers

This emphasis on skills is gaining more traction among academic programs across the country as they shift focus from knowledge delivery to learning outcomes and professional competencies. The book features clear methodological frameworks, engaging practice exercises, and a range of assessment case studies suitable for use across academic levels. For introductory levels, this text uses guided practice exercises to expose students to the skills they will need to master. At the capstone level, this text allows students to apply the knowledge they have gained to real world issues and to evaluate their competency in key programmatic learning outcomes. A detailed answer key with rubrics customized for specific questions and sample answers at various competency levels is available to verified course instructors. Access to these answer key resources can be obtained by contacting the Springer Textbook Team at Textbooks@springer.com.
