Federal Research Resources National Science Board (U.S.). Ad Hoc Committee on Strategic Science and Engineering Policy Issues, 2001      **The Royal Society and the Promotion of Science since 1960** Peter Collins, 2016 The first synoptic history of how the Royal Society faced up to the challenges of continued relevance from 1960 onwards      *Feminist Academics* Louise Morley, Val Walsh, 2002-11 This text explores questions of feminist interventions in academic institutions covering both the structure and culture of such places and the social divisions between women      Managing Social Research Roger Tarling, 2006-03-20 An essential tool for those planning to undertake social research this exceptional book tackles many of the specific concerns and issues that arise A well structured text it offers a comprehensive introduction to a range of important areas in project management including commissioning research preparing a tender or grant application risk and stakeholder analysis managing the field work and data analysis financial management ethics confidentiality and copyright This book provides a unique source of guidance for anyone seeking to commission manage or carry out social research It will especially benefit researchers working in a variety of different contexts including those in academia central or local government quangos public bodies or private consulting companies      **Implementing Change from Within in Universities and Colleges** Maria Slowey, 2012-12-06 This volume describes the experiences of a number of middle managers in higher and further education describing how new developments have demanded new forms of leadership at the middle level of educational institutions      *Knowledge Generation and Technical Change* Steven Wolf, David Zilberman, 2012-12-06 Knowledge generation and transfer mechanisms are being transformed in important and controversial ways Investment in research and development has increased in response to recognition that scientific productivity is tightly connected to economic dynamism Patent protection has been expanded in order to stimulate higher levels of private investment Intellectual property rights held by public organizations and researchers are now increasingly transferred to private organizations to accelerate the diffusion and enhance the value of knowledge produced by public agencies and universities Additionally new institutions such as university offices of technology transfer venture capital markets and a variety of consortia in knowledge intensive industries are being established throughout the United States and in other parts of the world These changes have led to a repositioning of the state in systems of innovation and an increase in the proprietary character of technical information The purpose of this book is to review and analyze i contemporary transitions in agricultural knowledge generation and extension arrangements from an empirical perspective and ii emerging and contradictory perspectives as to how knowledge systems can be assessed effectively The authors aim to provide the reader with a better understanding of the implications of new biotechnologies and new intellectual property rights regimes on public private relations in science the extent to which benefits from scientific knowledge are being appropriated by private sector actors the diversity and possible outcomes of privatization initiatives in extension and prospects for public goods production

and ecological sustainability given contemporary trends The book presents contrasting views on the degree of complementarity and substitution between private and public sector investments in research and extension Recognizing that the labels public and private are incomplete and at times misleading descriptions of the structure and function of coordinating bodies in social systems the analyses highlight ways in which public and private spaces and modes of functioning combine In addition to illustrating a broad range of analytic methodologies useful for studying organizational questions in knowledge systems the authors identify the implications of a range of past and potential institutional innovations

**Pasteur's Quadrant** Donald E. Stokes, 2011-03-01 Over fifty years ago Vannevar Bush released his enormously influential report *Science the Endless Frontier* which asserted a dichotomy between basic and applied science This view was at the core of the compact between government and science that led to the golden age of scientific research after World War II a compact that is currently under severe stress In this book Donald Stokes challenges Bush's view and maintains that we can only rebuild the relationship between government and the scientific community when we understand what is wrong with that view Stokes begins with an analysis of the goals of understanding and use in scientific research He recasts the widely accepted view of the tension between understanding and use citing as a model case the fundamental yet use inspired studies by which Louis Pasteur laid the foundations of microbiology a century ago Pasteur worked in the era of the second industrial revolution when the relationship between basic science and technological change assumed its modern form Over subsequent decades technology has been increasingly science based But science has been increasingly technology based with the choice of problems and the conduct of research often inspired by societal needs An example is the work of the quantum effects physicists who are probing the phenomena revealed by the miniaturization of semiconductors from the time of the transistor's discovery after World War II On this revised interactive view of science and technology Stokes builds a convincing case that by recognizing the importance of use inspired basic research we can frame a new compact between science and government His conclusions have major implications for both the scientific and policy communities and will be of great interest to those in the broader public who are troubled by the current role of basic science in American democracy Triple Entrepreneurial Connection Brychan Thomas, 2000 The essays comprising this work examine the developments taking place in contemporary technology transfer theory among small and medium sized businesses and the relationships in a triple helix of universities industry and government Trends in Air Pollution Research James V. Livingston, 2005 Pollution is undesirable state of the natural environment being contaminated with harmful substances as a consequence of human activities so that the environment becomes harmful or unfit for living things especially applicable to the contamination of soil water or the atmosphere by the discharge of harmful substances In addition to the harm either present or future and known or unknown to living beings pollution cleanup and surveillance are enormous financial drains of the economies of the world Air pollution research is the subject of this volume **Industrial Policy in Europe** Keith Cowling, 2003-09-02 After a decade or more of

privatisation and deregulation there is a growing consensus that government can have a positive role in promoting industrial development This book explores a variety of ways in which this might be made to happen A common theme is the need for participation at the appropriate level too often industrial policy has been hampered by overcentralised decision making Containing contributions by some of Europe's leading industrial economists Industrial Policy for Europe covers subjects from small business to macroeconomics

**The Use of Performance Indicators in Higher Education** Martin Cave, 1997 This book surveys the use of performance indicators of teaching of research and of administration and offers suggestions on how they might be developed and used

**Pioneering Research** Donald W. Braben, 2004-05-31 Ask questions not on the agenda Explore ideas wherever they lead Pursue goals because they're important Create options not yet perceived According to premier researcher Don Braben these are the vital intellectual processes that underlie all human achievement the kinds of risk taking activities that have made our civilization what it is today Yet warns Braben the same pioneer spirit that fueled our meteoric industrial and scientific growth is now being undermined by a growing climate of corporate caution and conformity In this groundbreaking manifesto on the importance of scientific freedom Braben asserts that the greatest long term risks facing humanity will not come from weapons of mass destruction prolonged global war devastating disease or famine or even from extinction by a huge wayward meteor Rather they will come from the debilitating attrition caused by the rising tides of bureaucracy and control that are steadily strangling human ingenuity and undermining our future Addressing this serious and growing problem Pioneering Research A Risk Worth Taking explains the urgent need to maintain both the originality and freedom of expression that is so vital to our economic growth and scientific development Citing global trends and attitudes that currently threaten these conditions Braben details some bold new initiatives that may offer a possible solution A compelling read for today's scientists policy makers and concerned laypeople Braben's book will change our understanding of the politics of scientific achievement and expose the threat to our future from bureaucracy paper trails political correctness lowest common denominator solutions and accountability the invisible chains that bind the imagination and damage our society irreparably

Government Laboratories Deborah Cox, Philip Gummett, Katharine Barker, 2001 Based on a 1999 NATO Advanced Research Workshop titled Reform of Government Scientific Laboratories held at the U of Manchester with which the editors are affiliated these 14 selected papers analyze the global trend toward new public management of university labs Selections feature case studies illuminating the themes of government research amidst political and economic crisis in Central and Eastern Europe lab reform in the market economies of Western Europe and Canada and responses in the US and elsewhere to such challenges as funding brain drains to the private sector and changing relationships among actors in an increasingly commercialized innovation system Lacks a subject index c Book News Inc

EBOOK: Doctoral Study in Contemporary Higher Education Howard Green, Stuart Powell, 2005-07-16 How can the full range of doctoral study in the UK be best described What are the key features that are driving change to the system What are the implications of current

initiatives and the increasingly international context of research degree study This book covers the differing kinds of doctorate award that exist currently and discusses critically issues that arise from the ways in which related forms of doctoral study are organized and assessed It focuses on doctoral study in all its forms in the higher education sector in the United Kingdom while being contextualised within an international dimension Drawing on both quantitative and qualitative data the book focuses on the diversity in doctoral study It examines the current state of the full range of doctoral awards describes them and then critically analyses tensions that exist For example it assesses the definitions and relations between different kinds of doctoral award the pedagogy that surrounds them and the examination phases of each The book also offers suggestions of ways to resolve the tensions associated with different forms of study and indicates possible future directions

**Doctoral Study in Contemporary Higher Education** is an essential text for those who manage fund and deliver education at doctoral level     Industrial Subsidies C. Wren,1996-09-25 This book describes the adoption growth and subsequent relinquishment of industrial subsidies in the UK tracing their development back to the early years of this century and following their extension through to virtually every area of economic policy This includes the foothold gained for industrial subsidies in the run up and aftermath of the First World War the application of large scale subsidies to agriculture in the Depression the plans for an interventionist industrial strategy devised in the Second World War and the gradual expansion of industrial subsidies from this time through to their heyday in the late 1970s Considerable attention is devoted to events in the 1980s including the extension of financial assistance to urban and rural policy small and new firm measures technology support collaborative research programmes and advisory schemes     **Enterprising Care?** Irene Hardill,Susan Baines,2011 What does it mean to be a volunteer in the UK today This book adds new insights into volunteering from the perspective of the individual the organisation and the community     A History of Foreign Students in Britain H. Perraton,2014-06-17 Foreign students have travelled to Britain for centuries and from the beginning attracted controversy This book explores changing British policy and practice and changing student experience set within the context of British social and political history     Science, Politics And The Pharmaceutical Industry John Abraham,0 John Abraham University of Reading.,2023-05-31 Drug disasters from Thalidomide to Oprelvekin and other less dramatic cases of drug injury raise questions about whether the testing and control of medicines provides satisfactory protection for the public In this revealing study John Abraham develops a theoretically challenging realist approach in order to probe deeply into the work of scientists in the pharmaceutical industry and governmental drug regulatory authorities on both sides of the Atlantic Through the examination of contemporary controversial case studies he exposes how the commercial interest of drug manufacturers are consistently given the benefit of the scientific doubts about medicine safety and effectiveness over and above the best interests of patients A highly original combination of philosophical rigour historical sensitivity and empirical depth enables the black box of industrial and government science to be opened up to critical scrutiny much more than in previous social scientific study All

major aspects of drug testing and regulation are considered including pre clinical animal tests clinical trials and postmarketing surveillance of adverse drug reactions The author argues that drug regulators are too dependent on pharmaceutical industry resources and expertise and too divorced from public accountability The problem of corporate bias is particularly severe in the UK where regulatory decisions about medicine safety are shrouded in greater secrecy than in the US Since the purpose of drug regulation should be to maximize the safety and effectiveness of medicines for patients the public needs and deserves policies to counteract corporate bias in drug testing and evaluation John Abraham s realist analysis provides a robust basis for policy interventions at the institutional and legislative levels He proposes that corporate bias could be reduced by more extensive freedom of information greater autonomy of government scientists from pharmaceutical industry the development of independent drug testing by the regulatory authority increased patient representation on regulatory committees and more frequent and thorough oversight of regulatory performance by the legislature This book should be of interest to anyone who cares about how medicines should be controlled in modern society It should prove particularly rewarding for students and researchers in the sociology of science and technology science and medicines policy medical sociologists the medical and pharmaceutical professions and consumer organizations Realising Our Potential Great Britain.
