Other Floors, Other Voices John M. Swales,2013-11-05 The author describes this volume as a textography because it combines certain elements of both text analysis and ethnography Through analysis of texts textual forms and systems of texts it shows the lives life commitments and life projects of people deeply embedded in the literate culture of the

university The people examined work in a single building but their textual lives are maintained in different times and spaces measured by the dimensions of text production and text circulation in their fields of work These domains of text time and space are to some degree differentiated by the three specialties that mark the three floors of a small building at a major research university the ethnographic site of this journey into textual lives computing taxonomic botany and English as a second language This research site provides the opportunity to re examine the concept of discourse community and to investigate the nature and origination of academic discourse from a new perspective The author is a distinctive member of the applied linguistics and composition communities an original stamped by the global village of language education in which he has lived his life and revealed in his own autobiographical account embedded within this book This book now reveals him as a person making text about how people are embedded in making their textual lives within the discursive landscapes their communities afford In doing so he shows not only his own love of language as a way of life but also his appreciation of how all his subjects find their labors of love in the language they create This book has been written to appeal to a general academic audience as well as to specialists in rhetoric discourse analysis and composition

Learning to Rival Linda Flower,Elenore Long,Lorraine Higgins,2000-04-01 Learning to Rival tells the inside story of college and high school writers learning to rival to actively seek rival hypotheses and negotiate alternative perspectives on charged questions It shows how this interdisciplinary literate practice alters with the context of use and how in learning to rival in school and out students must often negotiate conflicts not apparent to instructors This study of the rival hypothesis stance a powerful literate practice claimed by both humanities and science initially posed two questions how does the rival hypothesis stance define itself as a literate practice as we move across the boundaries of disciplines and genres of school and community how do learners crossing these boundaries interpret and use the family of literate practices especially in situations that pose problems of intercultural understanding Over the course of this project with urban teenagers and minority college students the rival hypothesis stance emerged as a generative and powerful tool for intercultural inquiry posing in turn a new question how can the practice of rivaling support the difficult and essential art of intercultural interpretation in education The authors present the story of a literate practice that moves across communities as well as the stories of students who are learning to rival across the curriculum Learning to Rival offers an active strategic approach to multiculturalism addressing how people negotiate and use difference to solve problems In the spirit of John Dewey s experimental way of knowing it presents a multifaceted approach to literacy research combining contemporary research methods to show the complexity of rivaling as a literate practice and the way it is understood and used by a variety of writers As a resource for scholars teachers and administrators in writing across the curriculum studies writing program administration service learning and community based projects as well as literacy rhetoric and composition this volume reveals how learning a new literate practice can force students to encounter and negotiate conflicts It also provides a model of an intercultural inquiry that uses difference to

understand a shared problem *Worlds Apart* Patrick Dias,Aviva Freedman,Peter Medway,Anthony Par,2013-06-17 An examination of the relationship between written communication in academic and workplace contexts Written for writing researchers teachers program designers and others concerned with writing in academic and business arenas Interacting With Audiences Ann M. Blakeslee,2000-10 This volume examines how scientists learn about and then address their audiences studying scientific rhetoric in actual practice For scholars and students in scientific and technical writing rhetoric studies of science and related areas **Writing/Disciplinarity** Paul Prior,2013-11-05 Over the past century the explosive growth of scientific technical and cultural disciplines has profoundly affected our daily lives However processes of enculturation in sites such as graduate education that have helped to form these disciplines have received very limited research attention In those sites graduate students write diverse documents including course papers departmental examinations theses and dissertations grant and fellowship applications and disciplinary publications Thus writing is one of the central domains of enculturation an activity through which graduate students and professors display and negotiate disciplinary knowledge genres identities and institutional contexts This volume explores this intersection of writing and disciplinary enculturation through a series of ethnographic case studies These case studies provide the most thorough descriptions available today of the lived experience of graduate seminars combining analysis of classroom talk students texts and professor s written responses institutional contexts students representations of their writing and its contexts and professors representations of their tasks and their students Given the complexities that the ethnographic data displayed the author found that conventional notions of writing as a process of transcription and of disciplines as unified discourse communities were inadequate As such this book also offers an in depth exploration of sociohistoric theory in relation to writing and disciplinary enculturation Specific case studies introduce apply and further elaborate notions of writing as literate activity authorship as mediated by other people and artifacts classroom tasks as speech genres enculturation as the interplay of authoritative and internally persuasive discourses and disciplinarity as a deeply heterogeneous laminated and dialogic process This blend of research and theory should be of interest to scholars and students in such fields as writing studies rhetoric writing across the curriculum applied linguistics English for academic purposes science and technology studies higher education and the ethnography of communication

Critical Theory and Science Fiction Vivian E. Jackson,2010-07 Critical Theory and Science Fiction A Lens Into Technology in Education looks to show that reflection is our quantum leap into a past that provides the reasons for our challenges in education Through reflection we gain perspectives on how to best change a future that will ultimately become our history This text is an important and much needed contribution to the study and analysis of the issues of technology and science fiction and their relationship to curriculum as well as the broader field of education Jackson develops a critical theory of technology Rather than simply accepting technological advancements the work demystifies and questions the impacts of technology in new critical insightful and exciting ways A must read William M Reynolds Georgia Southern University

Curriculum A River Runs Through It Using science fiction as a way to look at contemporary education philosophy and practice would seem an unlikely technique and so it is likely to succeed Science fiction remains remarkably advanced over the education establishment which like the military is always getting ready to deal with the previous situation Utopia Gr u topos means nowhere or moving the space now here Only the arts anticipate the future because only the artist lives in the present Eric McLuhan The Role of Thunder in Finnegans Wake and Laws of Media The New Science Marshall McLuhan co author

Reconceiving Writing, Rethinking Writing Instruction Joseph Petraglia, 2013-11-05 To a degree unknown in practically any other discipline the pedagogical space afforded composition is the institutional engine that makes possible all other theoretical and research efforts in the field of rhetoric and writing But composition has recently come under attack from many within the field as fundamentally misguided Some of these critics have been labelled New Abolitionists for their insistence that compulsory first year writing should be abandoned Not limiting itself to first year writing courses this book extends and modifies calls for abolition by taking a closer look at current theoretical and empirical understandings of what contributors call general writing skills instruction GWSI the curriculum which an overwhelming majority of writing instructors is paid to teach that practically every composition textbook is written to support and the instruction for which English departments are given resources to deliver The vulnerability of GWSI is hardly a secret among writing professionals and its intellectual fragility has been felt for years and manifested in several ways in persistently low status of composition as a study both within and outside of English departments in professional journal articles and conference presentations that are growing both in theoretical sophistication and irrelevance to the composition classroom and in the rhetoric and writing field's ever increasing attention to nontraditional sites of writing behavior But to date there has been relatively little concerted discussion within the writing field that focuses specifically on the fundamentally awkward relationship of writing theory and writing instruction This volume is the first to explicitly focus on the gap in the theory and practice that has emerged as a result of the field's growing professionalization The essays anthologized offer critiques of GWSI in light of the discipline's growing understanding of the contexts for writing and their rhetorical nature Writing from a wide range of cognitivist critical

theoretical historical linguistic and philosophical perspectives contributors call into serious question basic tenets of contemporary writing instruction and provide a forum for articulating a sort of zeitgeist that seems to permeate many writing conferences but which has until recently not found a voice or a name

Cscl 2 Timothy Koschmann, Rogers P. Hall, Naomi Miyake, 2013-05-13 CSCL 2 Carrying Forward the Conversation is a thorough and up to date survey of recent developments in Computer Supported Collaborative Learning one of the fastest growing areas of research in the learning sciences A follow up to CSCL Theory and Practice of an Emerging Paradigm 1996 this volume both documents how the field has grown and fosters a meaningful discussion of how the research program might be advanced in substantive ways Recognizing the long standing traditions of CSCL work in Europe and Japan the editors sought to broaden and expand the conversation both geographically and topically The 45 participating authors represent a range of disciplinary backgrounds including anthropology communication studies computer science education psychology and philosophy and offer international perspectives on the field For each chapter the goal was not only to show how it connects to past and future work in CSCL but also how it contributes to the interests of other research communities Toward this end the volume features a conversational structure consisting of target chapters invited commentaries and author responses The commentaries on each chapter were solicited from a diverse collection of writers including prominent scholars in anthropology of education social studies of science CSCW argumentation activity theory language and social interaction ecological psychology and other areas The volume is divided into three sections Part I explores four case studies of technology transfer involving CSILE one of the most prominent CSCL projects Part II focuses on empirical studies of learning in collaborative settings Part III describes novel CSCL technologies and the theories underlying their design Historically there has been a certain amount of controversy as to what the second C in CSCL should represent The conventional meaning is collaborative but there are many C words that can be seen as relevant With the publication of this volume conversational might be added to the list and in this spirit the book might be viewed as an invitation to join a conversation in progress and to carry it forward
