consciousness altering drugs and the social consequences of the advanced stage of ongoing enlightenment     Irreducible Mind Edward F. Kelly, Emily Williams Kelly, Adam Crabtree, 2010 Current mainstream opinion in psychology neuroscience and philosophy of mind holds that all aspects of human mind and consciousness are generated by physical processes occurring in brains Views of this sort have dominated recent scholarly publication The present volume however demonstrates empirically that this reductive materialism is not only incomplete but false The authors systematically marshal evidence for a variety of psychological phenomena that are extremely difficult and in some cases clearly impossible to account for in conventional physicalist terms Topics addressed include phenomena of extreme psychophysical influence memory psychological automatisms and secondary personality near death experiences and allied phenomena genius level creativity and mystical states of consciousness both spontaneous and drug induced The authors further show that these rogue phenomena are more readily accommodated by an alternative transmission or filter theory of mind brain relations advanced over a century ago by a largely forgotten genius F W H Myers and developed further by his friend and colleague William James This theory moreover ratifies the commonsense conception of human beings as causally effective conscious agents and is fully compatible with leading edge physics and neuroscience The book should command the attention of all open minded persons concerned with the still unsolved mysteries of the mind     The Psychedelic Mindmeld Wade Richardson, 2024-12-10 Teaches you how to work in pairs to meld your consciousness and explore the inner universe together with the help of psychedelics Presents techniques for entering and maintaining a psychedelic mindmeld including holotropic breathing and Vipassana meditation Looks at safe set and setting for psychedelic telepathic work including preparations finding the right partner safety protocols and potential challenges Many psychonauts have spontaneously experienced telepathy but how does one intentionally share consciousness In this guide to psychedelic mindmelding experienced psychonaut Wade Richardson shows how with the aid of psychedelics sharing consciousness is possible Drawing on years of personal experience with mindmelding Richardson teaches you how to work in pairs to telepathically share consciousness and explore the inner universe with the help of psychedelics He details techniques for entering and maintaining a telepathic mindmeld including Vipassana meditation practices and holotropic breathwork and explains what to expect during your sessions as well as presenting a map of the territory of consciousness to be explored He also looks at safe set and setting for telepathic work including dosages types of psychedelics physical and mental health preparations structuring the session finding the right partner safety protocols and potential challenges Sharing accounts from the many sessions he has participated in or facilitated the author shows how mindmelders can fully experience each other's emotions help process and release each other's traumas jointly travel to other worlds and dimensions and enter into the non dual infinity of what Buddhists call Clear Light Mind He stresses that this process not only makes visible the shadows you carry but also those of your fellow psychonaut Offering guidance for debriefing and integrating telepathic sessions he recommends treating these experiences

as something more akin to a dream and like the fluid nature of a dream open to different interpretations As Richardson reveals psychedelic journeying with a partner can help you shatter illusions expand consciousness dissolve our egoic separations and enable a cooperative exploration of non duality     Gnosis Dan Merkur,1993-10-05 Gnosis traces the use of powerful gnostic visionary techniques from Hellenistic Gnosticism and Jewish merkabah mysticism through Muhammad the Ismaeilis and theosophical Sufism to medieval neoplatonism and renaissance alchemy     The Ecstatic Imagination Daniel Merkur,1998-01-01 Presents the first comprehensive survey of the varieties of psychedelic experience since 1975     **Ken Wilber in Dialogue** Donald Jay Rothberg,Sean M. Kelly,Sean Kelly,1998-02-01 A passionate conversation among the best minds in transpersonal studies about the ideas of Ken Wilber the prominent contemporary thinker whose first book *The Spectrum of Consciousness* published by Quest in 1977 launched the transpersonal psychology movement Transpersonal thinkers taking part in this dynamic dialogue combine Eastern and Western spirituality with mainstream fields such as psychology medicine physics and ecology to map the human drive toward Spirit Contributors include best selling authors Jack Kornfield *A Path with Heart* Joseph Goldstein *Insight Meditation* Michael Murphy *The Future of the Body* Stanislov Grof *The Holotropic Mind* and Jeanne Achterberg *Rituals of Healing* Wilber s spirited response to each probing assessment of his ideas and the authors rebuttals give readers ringside seats at an engaging sparring match among intellectual and spiritual superstars     *New Handbook Of Cognitive Therapy Techniques 2e* Rian McMullin,2000 Handbook
