**The Epistemology of Spirit Beliefs** Hans Van Eyghen,2023-04-14 This book assesses whether belief in spirits is epistemically justified It presents two arguments in support of the existence of spirits and arguments that experiences of various sorts perceptions mediumship possession and animistic experiences can lend justification to spirit beliefs Most work in philosophy of religion exclusively deals with the existence of God or the epistemic status of belief in God Spirit beliefs are often regarded as aberrations and the falsity of such beliefs is often assumed This book argues that various beliefs concerning spirits can be regarded as justified when they are rooted in experiences that are not defeated It argues that spirit beliefs are not defeated by recent theories put forth by neuroscientists cognitive scientists or evolutionary biologists Additional arguments are made that traditional theistic belief is epistemically linked to spirit beliefs and that unusual events can be explained in terms of spirit activity The book draws on theistic arguments phenomenal conservatism and defenses of

religious experiences to argue for the justification of spirit beliefs The arguments draw on examples from various religious traditions ranging from Christianity and Islam to Haitian Vodou and Tibetan Bon The Epistemology of Spirit Beliefs will be of interest to researchers and advanced students working in philosophy of religion religious epistemology ethnography and cognitive neuroscience

**Martin Luther: The Problem with Faith and Reason** David

Andersen,2012-09-01 Luther's critics have consistently charged him as an irrationalist and pessimist concerning reason's capabilities and even by his followers as a fideist who sees little or no relationship between faith and reason In this book David Andersen offers a fresh and timely re-evaluation of Luther and his understanding of the relationship between faith and reason based upon a thorough engagement with Luther's mature writings Dr Andersen persuasively argues that far from being either an irrationalist or a fideist Luther stands within an empiricist tradition and that his pronouncements on fallen human reason can be understood only from that philosophical perspective Based upon recent research into the writings of William of Ockham who positively influenced Luther in this area Dr Andersen also shows that Luther can no longer be charged as a pessimist concerning human knowledge Reason has an important role to play for Luther in bringing one to faith and the objectivity of Christ's resurrection serves as that focal point that validates all Christian discourse In subordinating itself to the facts of the death and resurrection of Christ for the forgiveness of sins reason's created function is restored to some extent as it receives that forgiveness in the words of Holy Scripture and the visible means of Baptism and the Lord's Supper

**The Possibility of Discussion** Hugo Strandberg,2016-03-03 Answering the question How is fruitful discussion possible this book addresses the central philosophical issue of how reason shall be understood and how it is limited This study argues that the understanding of discussion according to which it necessarily starts from putative universal norms and rules for argumentation is problematic among other reasons since such rules are unfruitful in contexts where there are vast disagreements such as religion Inspired by Wittgensteinian ideas Strandberg develops instead a new way of understanding discussion truth and rationality which escapes these problems and shows how this solution can be used to answer the accusation against Wittgensteinian philosophy for being conservative and resulting in fideism

**Logic and Theism** Jordan Howard Sobel,2003-11-10 This is a wide ranging 2004 book about arguments for and against beliefs in God The arguments for the belief are analysed in the first six chapters and include ontological arguments from Anselm to G del the cosmological arguments of Aquinas and Leibniz and arguments from evidence for design and miracles The next two chapters consider arguments against belief The last chapter examines Pascalian arguments for and against belief in God There are discussions of Cantorian problems for omniscience of challenges to divine omnipotence and of the compatibility of everlasting complete knowledge of the world with free will There are appendices that present formal proofs in a system for quantified modal logic a theory of possible worlds notes on Cantorian set theory and remarks concerning non standard hyperreal numbers This book will be a valuable resource for philosophers of religion and theologians and will interest logicians and mathematicians as well

*God and Evidence* Rob Lovering,2013-06-20 God and Evidence presents a new set of compelling problems for theistic philosophers The problems pertain to three types of theistic philosopher which Lovering defines here as theistic inferentialists theistic non inferentialists and theistic fideists Theistic inferentialists believe that God exists that there is inferential probabilifying evidence of God's existence and that this evidence is discoverable not simply in principle but in

practice Theistic non inferentialists believe that God exists that there is non inferential probabilifying evidence of God s existence and that this evidence is discoverable not simply in principle but in practice Theistic fideists believe that God exists that there is no discoverable probabilifying evidence inferential or non inferential of God s existence and that it is nevertheless acceptable morally if not otherwise to have faith that God exists Lovering argues that each type of theistic philosopher faces a problem unique to his type and that they all share two particular problems Some of these problems take us down an entirely new discursive path others down a new discursive path branching off from an old one
