Reasoning Practically:

Principles and Political Order Bruce Haddock, Peri Roberts, Peter Sutch, 2007-01-24 An ideal new multi disciplinary volume for students and scholars of philosophy contemporary political theory and international relations This volume offers key insights into the work of the chief figures in the contemporary debate surrounding thin universalism and presents a usefully themed contribution to the secondary literature on the work of Onora O'Neill John Rawls Michael Walzer Martha Nussbaum Stuart Hampshire and others as well as a commentary on contemporary debates surrounding human rights and distributive justice This new book enables the reader to strongly grasp all the core debates in contemporary normative theory

Argumentation Machines C. Reed, T.J. Norman, 2013-03-09 In the late 1990s AI witnessed an increasing use of the term argumentation within its bounds in natural language processing in user interface design in logic programming and nonmonotonic reasoning in AI's interface with the legal community and in the newly emerging field of multi agent systems It seemed to me that many of these uses of argumentation were inspired by of ten inspired guesswork and that a great majority of the AI community were unaware that there was a maturing rich field of research in Argumentation Theory and Critical Thinking and Informal Logic that had been steadily re building a scholarly approach to the area over the previous twenty years or so Argumentation Theory on its side was developing theories and approaches that many in the field felt could have a role more widely in research and society but were for the most part unaware that AI was one of the best candidates for such application

Practical Reason in Historical and Systematic Perspective James Conant, Dawa Ometto, 2023-11-20 The idea that there is a distinctively practical use of reason and correspondingly a distinctively practical form of knowledge unites many otherwise diverse voices in the history of practical philosophy from Aristotle to Kant from Rousseau to Marx from Hegel to G.E.M. Anscombe and many others This volume gathers works by scholars who take inspiration from these and many other historical figures in order to deepen our systematic understanding of questions raised by their work that still are or ought to be at the center of contemporary philosophical debate the form and nature of practical reasoning agential self consciousness or practical knowledge how knowledge of the good relates to our motivational capacity and the shape of philosophical thinking about sound forms of living together Accordingly the volume is divided into three parts action theory meta ethics and political philosophy This fusion of perspectives delivers novel possibilities not only for answering the systematic questions outlined above but also for understanding both what unifies and distinguishes those historical voices that have sought to articulate the concept of practical reason This fascinating volume brings out the richness and profundity of an oft neglected approach to understanding human agency one that foregrounds action as itself an exercise of reason Essays on ethics mind action and political philosophy explore the history substance and implications of this idea cutting across while also revealing the unity underlying various parts of philosophy that are typically treated separately Eric Marcus Auburn University

Political Constructivism Peri Roberts, 2007-10-25 Political Constructivism is concerned with the

justification of principles of political justice in the face of pluralism Contemporary accounts of multiculturalism pluralism and diversity have challenged the capacity of political theory to impartially justify principles of justice beyond the boundaries of particular communities In this original account Peri Roberts argues that political constructivism defends a conception of objective and universal principles that set normative limits to justifiable political practice Political Constructivism explores this understanding in two ways Firstly by engaging with constructivist thinkers such as John Rawls and Onora O'Neill in order to lay out a basic understanding of what constructivism is Secondly the author goes on to defend a particular account of political constructivism that justifies a universal primary constructivism alongside the many secondary constructions in which we live our everyday lives In doing so he outlines an understanding of principled pluralism which accepts diversity whilst at the same time recognising its limits This volume will be of particular interest to students and researchers of political theory and political philosophy

Anscombe's Intention John Schwenkler, 2019-10-02 Written against the background of her controversial opposition to the University of Oxford's awarding of an honorary degree to Harry S Truman Elizabeth Anscombe's Intention laid the groundwork she thought necessary for a proper ethical evaluation of actions like the bombing of Hiroshima and Nagasaki The devoutly Catholic Anscombe thought that these actions made Truman a murderer and thus unworthy of the university's honor but that this verdict depended on an understanding of intentional action that had been widely rejected in contemporary moral philosophy Intention was her attempt to work out that understanding and argue for its superiority over a conception of intention as an inner mental state Though recognized universally as one of the definitive works in analytic philosophy of action Anscombe's book is often dismissed as unsystematic or obscure and usually read through the lens of philosophical concerns very far from her own Schwenkler's Guide offers a careful and critical presentation of Anscombe's main lines of argument at a level appropriate to advanced undergraduates but also capable of benefiting specialists in action theory moral philosophy and the history of analytic philosophy Further it situates Intention in a context that emphasizes Anscombe's debts to Aristotle Aquinas and Wittgenstein and her engagement with the work of contemporaries like Gilbert Ryle and R M Hare inviting new avenues of engagement with the ideas of historically important philosophers

Constructing Practical Reasons Andreas Müller, 2020-12-01 Some things are reasons for us to perform certain actions That it will spare you great pain in the future for example is a reason for you to go to the dentist now and that you are already late for work is a reason for you not to read the next article in the morning paper Why are such considerations reasons for or against certain actions Constructivism offers an intriguing answer to this question Its basic idea is often encapsulated in the slogan that reasons are not discovered but made by us Andreas Müller elaborates this idea into a fully fledged account of practical reasons makes its theoretical commitments explicit and defends it against some well known objections Constructing Practical Reasons begins with an examination of the distinctive role that reason judgements play in the process of practical reasoning This provides the resources for an anti representationalist conception of the nature of

those judgements according to which they are true if they are true not because they accurately represent certain normative facts but because of their role in sound reasoning On the resulting view a consideration owes its status as a reason to the truth of the corresponding reason judgement and thus ultimately to the soundness of a certain episode of reasoning Consequently our practical reasons exhibit a kind of mind dependence but this does not force us to deny their objectivity

The Promise of Religious Naturalism Michael S. Hogue, 2010-12-28 The Promise of Religious Naturalism explores religious naturalism as a distinctly promising form of contemporary religious ethics Examining how religious naturalism responds to the challenges of recent religious transformations and ecological peril worldwide author Michael Hogue argues that religious naturalism is emerging as an increasingly plausible and potentially rewarding form of religious moral life Beginning with an introduction of religious naturalism in the larger context of religious and ethical theories the book undertakes the first extended study of the works of religious naturalists Loyal Rue Donald Crosby Jerome Stone and Ursula Goodenough Hogue pays particular attention to the ethical components of religious naturalism in relation to religious pluralism and ecological issues

Essays on Anscombe's Intention Anton Ford, Jennifer Hornsby, Frederick Stoutland, 2011-06-14 G E M Anscombe's Intention firmly established the philosophy of action as a distinctive field of inquiry Donald Davidson called it the most important treatment of action since Aristotle This collection of ten essays clarifies many aspects of Anscombe's challenging work and affirms her reputation as one of our most original philosophers

When Minds Converse Philip Pettit, 2025-02-11 When Minds Converse argues that we do not speak because our human minds are special our minds are special because we can speak It maintains that six capacities characteristic of our species emerge as social skills in conversing with one another and that we internalize those skills in mentally communing with ourselves in thought Philip Pettit defends a society first view of the human mind and more broadly the human soul gesturing at how this philosophical anthropology can support universal ideals of equality respect and freedom Three of the abilities the book targets involve informational processing Our capacity to update our beliefs and other attitudes intentionally seeking out the judgments that we ought to make and the attitudes we ought to hold Our capacity to rely on intentional reasoning looking for the grounds on which to support judgments and looking at what our judgments in turn support And our ability to direct perception intentionally as we recruit it to the service of those capacities and learn to distinguish between appearance and reality The other three capacities addressed have a relational character Our ability to establish and uphold standards and values for one another and for ourselves making tacit commitments to live by them Our ability to ascribe and assume accountability holding one another and ourselves responsible to those norms and values And our ability to assume the status of persons embracing the implications of those commitments in the persona we hold out to others and indeed to ourselves Pettit offers an empirically informed but philosophical defence of his view In an extended thought experiment a conceptual genealogy he explores the likely unplanned effects that the first appearance of language would have on the minds of

humanoid creatures otherwise like us The argument is that they would evolve a range of conversive practices and that the skills elicited by those practices are good models of the capacities targeted here The genealogy does not try to explain how those practices and skills evolved among our forebears but relying on the lessons of the thought experiment seeks to shed light on their nature and role in our social and mental life

Cognitive Carpentry John L. Pollock,1995 A sequel to the author's How to Build a Person this work builds upon that theoretical groundwork for the implementation of rationality through artificial intelligence It argues that progress in AI has stalled because of its creators reliance upon unformulated intuitions about rationality Instead the author bases the OSCAR architecture upon an explicit philosophical theory of rationality encompassing principles of practical cognition epistemic cognition and defeasible reasoning One of the results is the first automated defeasible reasoner capable of reasoning in a rich logical environment

Evidence and Agency Berislav Marusic,2015-10-01 Evidence and Agency is concerned with the question of how as agents we should take evidence into account when thinking about our future actions Suppose you are promising or resolving to do something that you have evidence is difficult for you to do For example suppose you are promising to be faithful for the rest of your life or you are resolving to quit smoking Should you believe that you will follow through or should you believe that there is a good chance that you won't If you believe the former you seem to be irrational since you believe against the evidence Yet if you believe the latter you seem to be insincere since you can't sincerely say that you will follow through Hence it seems your promise or resolution must be improper Nonetheless we make such promises and resolutions all the time Indeed as the examples illustrate such promises and resolutions are very important to us The challenge is to explain this apparent inconsistency in our practice of promising and resolving To meet this challenge Berislav Marusic considers a number of possible responses including an appeal to trying an appeal to non cognitivism about practical reason an appeal to practical knowledge and an appeal to evidential constraints on practical reasoning He rejects all these and defends a solution inspired by the Kantian tradition and by Sartre in particular as agents we have a distinct view of what we will do If something is up to us we can decide what to do rather than predict what we will do But the reasons in light of which a decision is rational are not the same as the reasons in light of which a prediction is rational That is why provided it is important to us to do something we can rationally believe that we will do it even if our belief goes against the evidence

Contemporary Epistemology Ernest Sosa,Jeremy Fantl,Matthew McGrath,2019-03-12 A rigorous authoritative new anthology which brings together some of the most significant contemporary scholarship on the theory of knowledge Carefully calibrated and judiciously curated this strong and contemporary new anthology builds upon Epistemology An Anthology Second Edition Wiley Blackwell 2008 by drawing a concise and well balanced selection of higher level readings from a large diverse and evolving body of research Includes 17 readings that represent a broad and vital part of contemporary epistemology including articles by female philosophers and emerging thought leaders Organized into seven thoughtful and distinct sections including virtue

epistemology practical reasons for belief and epistemic dysfunctions among others Designed to sit alongside the highly successful anthology of canonical essays *Epistemology An Anthology* Second Edition Wiley Blackwell 2008 Edited by a distinguished editorial team including Ernie Sosa one of the most influential active epistemologists Highlights cutting edge methodologies and contemporary topics for advanced students instructors and researchers *The Moral Philosophy of Elizabeth Anscombe* Luke Gormally, David Albert Jones, Roger Teichmann, 2016-03-17 Elizabeth Anscombe's 1958 essay *Modern Moral Philosophy* contributed to the transformation of the subject from the late 1960s reversing the trend to assume that there is no intrinsic connection between facts values and reasons for action and directing attention towards the category of virtues Her later ethical writings were focused on particular ideas and issues such as those of conscience double effect murder and sexual ethics In this collection of new essays deriving from a conference held in Oxford these and other aspects of her moral philosophy are examined Anyone interested in Anscombe's work all want to read this volume *Logic and Argumentation* Mehdi Dastani, Huimin Dong, Leon van der Torre, 2020-03-27 This book constitutes the refereed proceedings of the Third International Conference on Logic and Argumentation CLAR 2020 held in Hangzhou China in April 2020 The 14 full and 7 short papers presented were carefully reviewed and selected from 31 submissions The papers cover the focus of the CLAR series including formal models of argumentation logics for decision making and uncertain reasoning formal models of evidence confirmation and justification logics for group cognition and social network reasoning about norms formal representations of natural language and legal texts as well as applications of argumentation on climate engineering

Handbook of Semantic Web Technologies John Domingue, Dieter Fensel, James A. Hendler, 2011-06-19 After years of mostly theoretical research Semantic Web Technologies are now reaching out into application areas like bioinformatics eCommerce eGovernment or Social Webs Applications like genomic ontologies semantic web services automated catalogue alignment ontology matching or blogs and social networks are constantly increasing often driven or at least backed up by companies like Google Amazon YouTube Facebook LinkedIn and others The need to leverage the potential of combining information in a meaningful way in order to be able to benefit from the Web will create further demand for and interest in Semantic Web research This movement based on the growing maturity of related research results necessitates a reliable reference source from which beginners to the field can draw a first basic knowledge of the main underlying technologies as well as state of the art application areas This handbook put together by three leading authorities in the field and supported by an advisory board of highly reputed researchers fulfils exactly this need It is the first dedicated reference work in this field collecting contributions about both the technical foundations of the Semantic Web as well as their main usage in other scientific fields like life sciences engineering business or education *The Politics of Practical Reason* Mark Ryan, 2011-06-09 Ought we conceive of theological ethics as an activity that draws from a community's vision of human goodness and that has implications for the kind of person each of us is to be Or can students of the discipline map the ethical

implications of what Christians confess about God themselves and the world while remaining indifferent to these claims Habituated by modern moral theories such as consequentialism and deontology Mark Ryan argues we too often assume that Christian ethics makes no claim on the character of its students and teachers It is rather like yet another department store within the shopping mall of ideas and ideologies to which advanced education provides access By arguing that theological ethics is an activity by nature political the author endeavors to show us that to do Christian ethics is to be habituated into ways of talking and seeing that put us on a path toward the good The author thus affirms the claim that theological ethics is a life changing practice But why is it so This book endeavors to display a philosophical basis for this claim by articulating the political character of practical reason Through rigorous conversation with G E M Anscombe Charles Taylor Stanley Hauerwas Alasdair MacIntyre and Jeffrey Stout Ryan provides an account of practical reasoning that enables us to rightly conceive theological ethics as a discipline that ought to change our lives

Teleological Structures in Human Life

Christian Kietzmann, 2022-11-30 This is the first collection of essays devoted to the thought of Anselm W M ller It brings to the attention of the English speaking world an influential and highly regarded philosopher who has made important contributions to a wide range of philosophical debates Arguably M ller s most important contributions are to the philosophy of action and virtue ethics The contributors who include friends colleagues and former students engage with different aspects of M ller s thought in these areas Subjects include his interpretation of Aristotle and Wittgenstein the teleology of thought and action the Aristotelian distinction between *poiesis* and *praxis* and its application to ethical upbringing and the possibility of practical knowledge and practical truth Teleological Structures in Human Life will be of interest to researchers and advanced students working on virtue ethics philosophy of action and practical reasoning
