Reasons For Poetry And The Reason For Criticism:

Reasons for Poetry & The Reason for Criticism William Meredith, 1982-01-01 In *The Reason for Poetry* the first of two lectures contained in this booklet the poet William Meredith argues for a more generous definition of poetry To move away from the narrow appreciation of poetry as what I like Meredith suggests that readers must shift their focus from their own expectations on reading a poem to an understanding of the poet's intentions He describes the three roles the poet can assume as dissident trying to create a ritual for effecting change apologist possibly focusing on errors or imperfections in society and human nature but implying an underlying acceptance of the model and solitary establishing intense though limited agreement with the reader as individual to individual Far from being definitive he argues these descriptions merely awaken the reader to the infinity of intentions one can allow the poet He concludes that it is in being generous with the poet that the reader discovers one of the greatest powers of poetry the power to astonish In *The Reason for Criticism* the second lecture in the booklet Meredith advocates a similar generosity of spirit among critics Using his own poetry and various pieces of criticism Meredith distinguishes between constructive and destructive criticism Impressionistic and oblique praise he suggests can enlighten a subject critically more effectively than the most attentive destructive act MM *The net of Hephaestus. academic compass After Taste fills the gaps of systematic research by a comprehensive tracing of the emergence of the doctrines discourses and disciplinary dimensions of Taste up to the peak of its systematic and historical trajectory in the eighteenth century and onwards into the present day The guiding goal is a post disciplinary rehabilitation of the contested category as a preparation for its productive usage in emerging academic and popular contexts Three intertwined research hypotheses form the guiding goal of an overall study of the agencies of Taste its institutionalizations and expert cultures The 1 first part provides a missing systematic perspective on the concept of Taste as a key factor for understanding the human faculties value theories and practices of valuating The 2 second part traces the events at the peak of Taste s systematic and historical trajectories up until the late eighteenth century and verifies the historiographical hypothesis about the instrumentality of Taste for the production reception and distribution of culture The 3 third part reconstructs the major moments in which the contested concept of Taste experiences its post disciplinary rehabilitation in preparation for its future productive usage in the academic and popular discourses and practices It shows how the category of Taste became the foundation legitimation and the catalyst for the emerging division of labour faculties and disciplines confirming the hypothesis of the immense impact and actuality of Taste in the contemporary world
