Curriculum Development in the Postmodern Era Patrick Slattery, 2013 This landmark text was one of the first to introduce and analyze contemporary concepts of curriculum that emerged from the Reconceptualization of curriculum studies in the 1970s and 1980s This new edition brings readers up to date on the major research themes postmodernism ecological hermeneutics aesthetics and arts based research race class gender sexuality and classroom practices within the historical development of the field from the 1950s to the present Like the previous editions it is unique in providing a comprehensive overview in a relatively short and highly accessible text Provocative and powerful narratives both biography and autoethnography throughout invite readers to engage the complex theories in a personal conversation School based examples allow readers to make connections to schools and society teacher education and professional development of teachers Changes in the Third Edition New Glossary brief summaries in the text direct readers to the Companion Website to read the entire entries New analysis of the current accountability movement in schools including the charter school movement More international references clearly connected to international contexts More narratives invite readers to engage the complex theories in a personal conversation Companion Website new for this edition

Postmodern Architecture in Socialist Poland Florian Urban, 2020-12-13 Garish churches gabled panel blocks neo historical tenements this book is about these and other architectural oddities that emerged in Poland between 1975 and 1989 a period characterised by the decline of the authoritarian socialist regime and waves of political protest During that period committed architects defied repressive politics and persistent shortages and designed houses and churches which adapted eclectic historical forms and geometric volumes and were based on traditional typologies These buildings show a very different background of postmodernism far removed from the debates over Robert Venturi Philip Johnson or Prince Charles in Western Europe and North America a context in which postmodern architecture stood not for world weary irony in an economically saturated society but for individualised counter propositions to a collectivist ideology for a yearning for truth and spiritual values and for a discourse on distinctiveness and national identity Postmodern Architecture in Socialist Poland argues that this new architecture marked the beginning of socio political transformation and at the same time showed postmodernism's reconciliatory potential In light of massive historical ruptures and wartime destruction these buildings successfully responded to the contradictory desires for historical continuity and acknowledgment of rupture and loss Next to international ideas the architects took up domestic traditions such as the ideas of the Polish school of historic conservation and long standing national patriotic narratives They thus contributed to the creation of a built environment and intellectual climate that have been influential to date This book will be of great interest to students and scholars interested in postmodern architecture and urban design as well as in the socio cultural background and transformative potential of architecture under socialism

Dialogical Planning In A Fragmented Society Thomas L. Harper, Stanley M. Stein, The culmination of a

critical study of neo pragmatism philosophy and its application to planning Dialogical Planning in a Fragmented Society begins with philosopher Stanley M Stein s examination of neo pragmatism and his thoughts on how it can be useful in the field of environmental design specifically how it can be applied to planning procedures and problems Neo pragmatism is an approach that has been in the past best expressed or implied in the writing of Hilary Putnam Richard Rorty and in particular Donald Davidson John Rawls and Ludwig Wittgenstein Thomas L Harper furthers this tradition by providing the context for this theoretical application from his academic background in economics and management as well as his practical experience with political decision making processes community planning and economic development The result is a fresh synthesis of ideas a new approach to thinking about planning theory and its implications for and relationship with practice Philosopher Michael Walzer has asserted that philosophy reflects and articulates the political culture of its time and politics presents and enacts the arguments of philosophy Similarly the authors view planning theory as planning reflected upon in tranquility away from the tumult of battle and planning practice as planning theory acted out in the confusion of the trenches Each changes the other in a dynamic way and the authors demonstrate the intimate and inextricable link between them *Designing Community* David R. Walters, 2007 Urban development sites can become battlegrounds as a result of the conflicting interests of developers and communities In the USA design charrettes are often used as a means of bringing people together using detailed design exercises to establish agreement around a development masterplan However despite the increasing frequency of their use charrettes are widely misunderstood and can be misapplied This book provides detailed guidance on the proper and most effective ways to use this helpful tool **BOOK JACKET** **Designing Community** David Walters, 2007-06-01 Greenfield sites around towns and cities and redevelopment infill sites in existing urban areas often become battlegrounds between the conflicting interests of developers and communities In America design charrettes intensive design and planning workshops have become widely used as a means of bringing together these divergent groups using detailed design exercises to establish agreement around a development masterplan Despite the increasing frequency of their use charrettes are widely misunderstood and can be misapplied This book provides a detailed guidance on the proper and most effective ways to use this helpful tool The book combines charrette masterplanning with the creation of design based codes also known as form based codes to control the development s implementation in line with the design and planning principles established during the charrette process **Schools in Transition** Pauli Siljander, Kimmo Kontio, Eetu Pikkarainen, 2016-12-27 School is one of the most focal institutions in modern society It is largely through the institutionalized forms of education that modern society attempts to secure and maintain its social and economic well being and its valuable cultural life forms In addition to this school is the essential institution through which the future of a society is defined Thus at least when understood traditionally as a pedagogical institution the school stands at the center of historically and socially constructed cultural life forms and at the brink of an unknown future the determination of that future

characterizes the pedagogical task of the school. It naturally ensues then that modern discourses of the school have always been intertwined with the critical question of how past, present and future can be linked in educational practices so that schools can foster in ever better ways the well being of individuals, societies and humanity. The chapters in this volume, despite the variety of viewpoints, share this critical view. The purpose of the volume is not to offer definite answers; rather, it is to stress that to understand the role and functions of school in contemporary society and to orientate its transition, a well founded critical evaluation of prevailing pedagogical practices and policy trends is required. This evaluation is vital for the future of school and society.

10th International Symposium on the Conservation of Monuments in the Mediterranean Basin Maria Kouï, Fulvio Zezza, Dimitrios Kouis, 2018-11-30. This book addresses physical, chemical and biological methods for the preservation of ancient artifacts. Advanced materials are required to preserve the Mediterranean belt's historic, artistic and archaeological relics against weathering, pollution, natural risks and anthropogenic hazards. Based upon the 10th International Symposium on the Conservation of Monuments in the Mediterranean Basin, this book provides a forum for international engineers, architects, archaeologists, conservators, geologists, art historians and scientists in the fields of physics, chemistry and biology to discuss principles, methods and solutions for the preservation of global historical artifacts.

Reconstruction and Restoration of Architectural Heritage 2021 Sergey Sementsov, Alexander Leontyev, Huerta Santiago, 2021-07-27. Reconstruction and Restoration of Architectural Heritage 2021 presents contributions on various aspects of the study, protection and restoration of architectural monuments and on the reconstruction of major historical urban development sites. Moreover, various complex and problematic aspects of engineering reconstruction of monuments are discussed. A wide range of issues is considered in the process of preserving historical heritage, including the historical formation of buildings, construction and territories, the conservation, reconstruction and restoration of buildings and constructions, the transformation of historical spaces and areas, parallels and features in the development of urban planning, architecture and construction art in Russia and Spain, the fate and work of Augustine Augustinovich Betancourt. This collection of papers combines contributions about the history and restoration of many of the largest nature reserves, estates, cities and monuments. It is intended for academics and professionals involved in the history and restoration of nature reserves, estates, cities and monuments.

Lost in Space Marleen S. Barr, 2017-11-01. Archaeologists and anthropologists discover other civilizations; science fiction writers invent them. In this collection of her major essays, Marleen Barr argues that feminist science fiction writers contribute to postmodern literary canons with radical alternatives to mainstream patriarchal society. Because feminist science fiction challenges male-centered social imperatives, it has been marginalized and dismissed from the canon, thus lost in space. Moving beyond feminist science fiction itself, Barr goes on to examine other literary genres from the perspective of feminist fabulation, a term she has coined to encompass science fiction, fantasy, utopian literature and mainstream literature that critiques patriarchal fictions. Discussing the works of such writers as Margaret Atwood, Joanna

Russ Salman Rushdie Paul Theroux Ursula Le Guin Herman Melville Saul Bellow Edgar Allan Poe and Marge Piercy Barr illuminates feminist science fiction s connections to other literary traditions and contemporary canons Her critical analysis yields a new and expanded understanding of feminist creativity *Munich and Memory* Gavriel D. Rosenfeld,2023-12-22

Munich notorious in recent history as the capital of the Nazi movement is the site of Gavriel Rosenfeld s stimulating inquiry into the German collective memory of the Third Reich Rosenfeld shows with the aid of a wealth of photographs how the city s urban form developed after 1945 in direct reflection of its inhabitants evolving memory of the Second World War and the Nazi dictatorship In the second half of the twentieth century the German people s struggle to come to terms with the legacy of Nazism has dramatically shaped nearly all dimensions of their political social and cultural life The area of urban development and the built environment little explored until now offers visible evidence of the struggle By examining the ways in which the people of Munich reconstructed the ruins of their historic buildings created new works of architecture dealt with surviving Nazi buildings and erected new monuments to commemorate the horrors of the recent past Rosenfeld identifies a spectrum of competing memories of the Nazi experience Munich s postwar development was the subject of constant controversy pitting representatives of contending aesthetic and mnemonic positions against one another in the heated battle to shape the city s urban form Examining the debates between traditionalists modernists postmodernists and critical preservationists Rosenfeld shows that the memory of Nazism in Munich has never been repressed but has rather been defined by constant dissension and evolution On balance however he concludes that Munich came to embody in its urban form a conservative view of the past that was inclined to diminish local responsibility for the Third Reich Munich notorious in recent history as the capital of the Nazi movement is the site of Gavriel Rosenfeld s stimulating inquiry into the German collective memory of the Third Reich Rosenfeld shows with the aid of a wealth of photographs how the city s *An Illusion of Harmony* Taner Edis,2010-03-05

Current discussions in the West on the relation of science and religion focus mainly on science s uneasy relationship with the traditional Judeo Christian view of life But a parallel controversy exists in the Muslim world regarding ways to integrate science with Islam As physicist Taner Edis shows in this fascinating glimpse into contemporary Muslim culture a good deal of popular writing in Muslim societies attempts to address such perplexing questions as Is Islam a scientific religion Were the discoveries of modern science foreshadowed in the Quran Are intelligent design conjectures more appealing to the Muslim perspective than Darwinian explanations Edis examines the range of Muslim thinking about science and Islam from blatantly pseudoscientific fantasies to comparatively sophisticated efforts to Islamize science From the world s strongest creationist movements to bizarre science in the Quran apologetics popular Muslim approaches promote a view of natural science as a mere fact collecting activity that coexists in near perfect harmony with literal minded faith Since Muslims are keenly aware that science and technology have been the keys to Western success they are eager to harness technology to achieve a Muslim version of modernity Yet at the same time they are reluctant to

allow science to become independent of religion and are suspicious of Western secularization Edis examines all of these conflicting trends revealing the difficulties facing Muslim societies trying to adapt to the modern technological world His discussions of both the parallels and the differences between Western and Muslim attempts to harmonize science and religion make for a unique and intriguing contribution to this continuing debate **My Almost for His Highest** John Barber,2010-08-01 The book you hold in your hands says that our churches and our nation are in desperate need of biblical awakening and revival It begins with the churches In stark opposition to the quest to give our utmost for God s glory as a whole the modern evangelical movement has settled for a compromised form of Christianity The book exposes the roots of this compromise analyzes keys areas of church life where we have abandoned the biblical record and offers a roadmap for revival and reformation **Contemporary Psychoanalytic Foundations** Mark Leffert,2011-01-19 Past scholars have tried to classify psychoanalysis as an intrinsically positivist science with varying degrees of success Their critics have fared little better with narrow applications of postmodern thought which focus on smaller areas within psychoanalysis and as a result neglect the evolution of the discipline as a whole In an effort to provide a ground for current psychoanalytic thought Mark Leffert creates an interreferential schema which balances the influences of postmodernism complexity theory and neuroscience as its key factors Using the heterogeneity of postmodern thought as a starting point he traces its impact on and implications for the development of the discipline leading into the realm of complexity theory which is relatively new to the psychoanalytic literature and how it informs as well as constrains certain psychoanalytic assumptions The book then turns to neuroscience the hard scientific study of the complexities of the brain and how recent research informs psychoanalytic theory and may shed light on aspects of memory the conscious and the unconscious Taken together these three elements create a firm basis for the current trends in psychoanalysis and the direction of its development in the years to come

Foundations of Assessment Joseph D. Levy,Natasha A. Jankowski,2025-08-18 This book unpacks the philosophies and theories behind assessment and builds upon that foundation with practical how to guidance for effective practice Renowned assessment experts Levy and Jankowski thoughtfully explore assessment across both academic and student affairs highlighting equitable strategies throughout to demonstrate the transformative potential of assessment to enhance student learning outcomes support institutional decision making and ensure continuous quality improvement in higher education With insights drawn from extensive research and work with over 300 institutions this text prepares graduate students and practitioners to make informed choices around assessment *Shifting Mobility* Dewan Masud Karim,2023-12-01 In the face of resource depletion environmental changes lifestyle changes demographic and digital adaptation old ideologies of city building and expensive and complex automobility solutions are in freefall These changes are creating severe friction between the old and new paradigms This book provides new perspectives through the process of ideological disassociation and concepts of human mobility code The basic premise of the book human mobility is an essential component of our creativity

that comes from our unconscious desire to become a part of a community Several new concepts in the book starts with the hallmark of new discovery of human mobility code and its implications of urban mobility boundary systems to stay within safe planetary zone A new discovery of human mobility code from comprehensive research finding prove that each individual develops a unique mobility footprint and become our mobility identity Beyond individual hallmarks human develops collective mobility codes through interaction with the third space on which entire mobility systems lie and are created by the fundamentals of city planning and the design process Readers are introduced to an innovative mobility planning process and reinvention of multimodal mobility approaches based on new mobility code while formulating new concepts practical solutions and implementation techniques tools policies and processes to reinforce low carbon mobility options while addressing social equity environmental and health benefits Finally the book arms us with knowledge to prevent the disaster of full technological enlightenment against our natural human mobility code

Beyond Mothering Earth Sherilyn Macgregor, 2011-11-01 Women s environmental activism is often described in maternalist terms as if motherhood and caring for the environment go hand in hand While feminists celebrate this connection women and all those who care for people and environments are facing increasing burdens and decreasing time for civic engagement In *Beyond Mothering Earth* MacGregor argues that celebrations of earthcare as women s unique contribution to the search for sustainability often neglect to consider the importance of politics and citizenship in women s lives Drawing on interviews with women who juggle private caring with civic engagement in quality of life concerns she proposes an alternative a project of feminist ecological citizenship that affirms the practice of citizenship as an intrinsically valuable activity while recognizing the foundational aspects of caring labour and natural processes that allow its specificity to flourish *Beyond Mothering Earth* provides an original and empirically grounded understanding of women s involvement in quality of life activism and an analysis of citizenship that makes an important contribution to contemporary discussions of green politics globalization neoliberalism and democratic justice It will be of value to scholars and activists interested in the politics of environmental sustainability and the shifting meanings of citizenship in an increasingly vulnerable world

Reshaping Planning with Culture Dr Greg Young, 2012-11-28 Planning is described as being increasingly sidelined by the impacts of neo liberal restructuring At the same time culture is nowadays seen as the world s key intellectual resource possessing new creative weight in sociological economic and environmental terms This book argues that in the light of this cultural turn there is the opportunity to re position planning and proposes an original practical and robust system of culturisation Culturisation is defined as the ethical critical and reflexive integration of culture into planning and potentially other areas such as public administration corporate strategy and development thinking Cultural theory planning theory global governance policy and recent innovative culturised practices are all explored to this end The new theoretical and practical approach put forward shows how deeper richer and more relevant ideas about culture can be utilized in planning and is illustrated with international examples and

two major case studies detailing new vistas for a refurbished planning *Restructuring Architectural Theory* Marco Diani, Catherine Ingraham, 1988 *Restructuring Architectural Theory* addresses the impact of contemporary critical theory from poststructuralism to deconstruction and beyond on architecture This unique collection of essays will be invaluable to students and scholars as well as to architects and art historians for the range of issues it covers and the depth of analysis it provides **World History** Steven Wallech, Touraj Daryaee, Craig Hendricks, Anne Lynne Negus, Peter P.
