Ravichandran,2005-09-11 **Evolutionary Computation & Swarm Intelligence** Fabio Caraffini,Valentino

Santucci,Alfredo Milani,2020-11-25 The vast majority of real world problems can be expressed as an optimisation task by formulating an objective function also known as cost or fitness function The most logical methods to optimise such a function when 1 an analytical expression is not available 2 mathematical hypotheses do not hold and 3 the dimensionality of the problem or stringent real time requirements make it infeasible to find an exact solution mathematically are from the field of Evolutionary Computation EC and Swarm Intelligence SI The latter are broad and still growing subjects in Computer Science in the study of metaheuristic approaches i.e. those approaches which do not make any assumptions about the problem function inspired from natural phenomena such as in the first place the evolution process and the collaborative behaviours of groups of animals and communities respectively This book contains recent advances in the EC and SI fields covering most themes currently receiving a great deal of attention such as benchmarking and tuning of optimisation algorithms their algorithm design process and their application to solve challenging real world problems to face large scale domains
