**Contested Ground** John Emmius Davis,2018-08-06 One of the most striking characteristics of urban protest and social conflict in the United States Britain and other nations of the West over the last three decades is the frequency with which these political events have been organized not where people work but where they

live The residential communities in which people have their homes raise their children and relate to each other more as neighbors than as co workers have become veritable seedbeds of collective action Contested Ground provides a new approach to understanding how and why such community based action occurs Drawing critically and selectively from Marxian theories of conflict and neo Weberian theories of housing classes John Emmeus Davis argues that the political life of residential communities can be explained largely in terms of the competing interests that groups possess by virtue of different and distinctive ways of relating to their community s domestic propertyland and buildings that are used for shelter In Part I of his book he proposes domestic property interests as the cornerstone of a theoretical framework for exploring the appearance and disappearance the development and decline and the cooperation and conflict of the organized groups of the homeplace In Part II he tests the plausibility of this framework against the social and political realities of an inner city neighborhood known as the West End in Cincinnati Ohio A neighborhood shaped by successive waves of private investment and disinvestment city neglect and city planning urban renewal and gentrification the domestic property of the West End has been the contested ground from which many community organizations have grown Using archival records oral histories and organizational documents Davis unfolds the story of the rise and fall of these grassroots groups Davis s concluding chapters evaluate the theoretical and practical implications of his approach He believes that his analysis may complement neo Marxian theories of urban development and capitalist reproduction and also provide new insight into ways in which planners activists and policy makers can influence the internal politics of the urban neighborhood

Health and Social Change

Graham Scambler,2002 How have health illness and medicine been affected by social change What are the implications of disorganized capitalism neo liberalism and the Third Way for health and healing How important are class gender and ethnic relations for health care reforms and the distribution of health Health and Social Change offers a clear and incisive examination of the social changes that have affected capitalist societies and their ramifications for health and for systems of healing It reviews the major paradigms of medical sociology and considers theories of the postmodern turn The author draws on critical realism and critical theory to demonstrate the significance of the shift from organized to disorganized capitalism for health care reform in particular in Britain and the USA for the present widening of health inequalities and for people s use of popular folk and professional forms of healing He goes on to examine the role of a critical sociology and its necessary relationship to civil society and deliberative democracy The result is an engaging and thought provoking text for students researchers and professionals interested in health and social change
