Recent Progress in Hormone Research James H. Clark, 2013-10-22 *Recent Progress in Hormone Research Volume 45* covers the proceedings of the 1988 Laurentian Hormone Conference. The book presents papers on the molecular characterization of the glucocorticoid receptor, the estrogen regulation of gene transcription and mRNA stability, and the molecular and cellular biology of mammalian progesterone receptors. The text also includes papers on the molecular basis of regulation of ionic channels by G proteins, the role of biologically active follicle stimulating hormone in reproduction, and the role of glycosylphosphoinositides in signal transduction. Papers on the mechanisms of growth control in normal and malignant breast epithelium, the biochemical and structural analysis of the nerve growth factor receptor, and the isolation, molecular cloning, and mechanism of action of parathyroid hormone-related protein are also considered. The book further tackles the regulation and dysregulation of adiponectin in obesity and other metabolic states. Endocrinologists, physiologists, biochemists, and scientists involved in hormone research will find the book invaluable. **Recent Progress in Hormone Research** Gregory

Pincus, 2013-10-22 *Recent Progress in Hormone Research Volume 23* is a collection of papers presented at the 1966 Laurentian Hormone Conference held at Mont Tremblant, Quebec, Canada. This conference explores four major areas of research including thyroid physiology, thyroid hormones, contemporary developments in peptide hormone chemistry and biochemistry, and special studies of insulin, particularly in man. This book is organized into four parts encompassing 14 chapters. Part I deals with the factors controlling thyroid stimulation and special studies of the mode of action of thyroid hormones, including antithyroid drugs. Part II describes the mode of action of steroid hormones and hormonal steroids based on the effects on normal and neoplastic tissues. This part also looks into a definitive segment of research in endocrinology with the metabolism of the steroid hormones in vivo and in vitro. The discussion of an important clinical condition involving adrenocortical steroid production is given in the chapter concerned with congenital adrenal hyperplasia. Parts III and IV explore the synthesis of peptide hormones and insulin. These parts also tackle the gastrointestinal hormone biochemistry, the detection of at least two insulin-like activities in human serum, and the particular control of insulin activity in man. This book is directed primarily toward endocrinologists. **Recent Progress in Hormone Research** E. B. Astwood, 2013-10-22

Recent Progress in Hormone Research Volume 25 presents the proceedings of the 26th meeting of the Laurentian Hormone Conference held in Mont Tremblant, Quebec, Canada, on August 23-29, 1968. The book presents papers on reproductive endocrinology, i.e., a model for the regulation of ovulation in the rat; comparative aspects of uterine luteal relationships; proinsulin, i.e., proinsulin and the biosynthesis of insulin; and the secretion of hormones by tumors of nonendocrine origin, i.e., clinical and laboratory studies of ectopic humoral syndromes. The text also includes papers on the ultrastructure of the endocrine glands, on the thyroid, i.e., studies of the thyroid iodide trap in human; on neuroendocrinology, i.e., the mammalian pineal as a neuroendocrine transducer; and on steroid hormones, i.e., metabolic events associated with steroid hydroxylation by

the adrenal cortex and steroid dynamics under steady state conditions Endocrinologists and people involved in hormone research will find the book invaluable

Recent Progress in Hormone Research Roy O. Greep, 2013-10-22 Recent Progress in Hormone Research Volume 30 presents the proceedings of the 1973 Laurentian Hormone Conference held at Mont Tremblant Province of Quebec Canada on August 26 31 1973 The book presents papers on the regulation of the gonadotropins in primates their neutralization by specific antibodies and their role in oocyte maturation The text also includes papers on the enzymatic interconversion of estrogens and on the concept of the mechanism of steroid hormone action Papers on the thermogenic action of thyroid hormone related to active sodium transport are also considered The book further tackles papers on the structure heterogeneity and activity of many of the lesser known hormones or hormone like substances such as the somatomedins A B and C the epidermal growth factor the insect hormones parathyroid hormone 1 25 dihydroxycholecalciferol and prostaglandins Endocrinologists and physiologists will find the text invaluable

Recent Progress in Hormone Research C. Wayne Bardin, 2013-09-11 Recent Progress in Hormone Research Volume 47 covers the developments in the field of endocrinology and metabolism The book discusses the molecular mechanism of action of a steroid hormone receptor neuroendocrine control of human reproduction in the male and the immortalization of neuroendocrine cells by targeted oncogenesis The text also describes the neuroendocrine regulation of the luteinizing hormone releasing hormone pulse generator in the rat the gonadotropin releasing hormone pulses and steroids receptors and response elements The molecular biology of human renin and its gene the cellular and molecular analysis of pancreatic islet cell lineage and differentiation and sulfonyleurea signal transduction are also considered The book further tackles the complex hormone response unit regulating transcription of the phosphoenolpyruvate carboxykinase gene and the structure and molecular regulation of mammalian glucose transporters Endocrinologists physiologists and biochemists will find the book invaluable
