 Scientific Essay from the year 2016 in the subject Health Public Health grade 1 Egerton University language English abstract
 Medication errors remain life threatening mistakes affecting the delivery of health care Medical errors are considered as a
 global problem capable of increasing the length of hospitals stay mortality rate and other related costs Though medication
 errors can be caused by any healthcare professional a high percentage of such mistakes are made by nurses especially
 during drug administration The current research indicates that thousands of Americans die on an annual basis owing to
 medication errors Nurses commit majority of errors during intravenous injection of drugs while poor hand writing witnessed
 among primary care givers often results to dosing errors Other primary care givers use abbreviations during prescriptions
 making it hard for pharmacists to interpret hence rising the risk of medication errors Medication errors can also be
 attributed to inadequate pharmacological knowledge and lack of awareness of the route of the administration Further
 Medication errors are also attributed to complexities within the healthcare environment particularly multiple processes
 involved in the medication process ranging from packaging to the actual administration of the drug Health Services Support
 Agency 2012 This research paper discusses medication error with warfarin and its consequences *Lippincott's Nursing
 Procedures* ,2009 The newly revised fifth edition of this popular reference is a start to finish guide for more than 400 basic to
 advanced nursing procedures It provides step by step instructions for each procedure and explains how to use and
 troubleshoot equipment **Medication Errors** Zane Robinson Wolf,1994 This book features accounts of nurses experiences
 with medication errors practical approaches and advice regarding errors and suggestions for risk reduction as well as
