Agriculture Trevor Rowley, 2019-06-26 Originally published in 1981 The Origins of Open Field Agriculture looks at the problems connected with open field agriculture the origins of strip cultivation the three field system the adaptation of Celtic fields and the development of ploughing techniques The book looks at the challenges to traditional ideas on the origins of settlement and their associated economy and casts new light on understandings of village development The book suggests that conventional views of the nucleated village in the midst of open field strips as a product of the Anglo Saxon migration is no longer tenable The book brings together the work of distinguished archaeologists historians and historical geographers and opens up a new perspective on the early development of medieval agriculture

The Landscape Archaeology of Anglo-Saxon England N. J. Higham, Martin J. Ryan, 2010 The Anglo Saxon period was crucial to the development of the English landscape but is rarely studied The essays here provide radical new interpretations of its development Traditional opinion has perceived the Anglo Saxons as creating an entirely new landscape from scratch in the fifth and sixth centuries AD cutting down woodland and bringing with them the practice of open field agriculture and establishing villages Whilst recent scholarship has proved this simplistic picture wanting it has also raised many questions about the nature of landscape development at the time the changing nature of systems of land management and strategies for settlement The papers here seek to shed new light on these complex issues Taking a variety of different approaches and with topics ranging from the impact of coppicing to medieval field systems from the representation of the landscape in manuscripts to cereal production and the type of bread the population preferred they offer striking new approaches to the central issues of landscape change across the seven centuries of Anglo Saxon England a period surely foundational to the rural landscape of today NICHOLAS J HIGHAM is Professor of Early Medieval and Landscape History at the University of Manchester MARTIN J RYAN lectures in Medieval History at the University of Manchester Contributors Nicholas J Higham Christopher Grocock Stephen Rippon Stuart Brookes Carenza Lewis Susan Oosthuizen Tom Williamson Catherine Karkov David Hill Debby Banham Richard Hoggett Peter Murphy

The Formation of the English Kingdom in the Tenth Century George Molyneaux, 2017-11-03 The central argument of The Formation of the English Kingdom in the Tenth Century is that the English kingdom which existed at the time of the Norman Conquest was defined by the geographical parameters of a set of administrative reforms implemented in the mid to late tenth century and not by a vision of English unity going back to Alfred the Great 871 899 In the first half of the tenth century successive members of the Cerdicing dynasty established a loose domination over the other great potentates in Britain They were celebrated as kings of the whole island but even in their Wessex heartlands they probably had few means to regulate routinely the conduct of the general populace Detailed analysis of coins shires hundreds and wapentakes suggests that it was only around the time of Edgar 957 9 975 that the Cerdicing kings developed the relatively standardised administrative apparatus of the so called Anglo Saxon state This substantially increased their ability to impinge upon the lives of ordinary people living between the Channel and the Tees and served to mark that area off from

the rest of the island The resultant cleft undermined the idea of a pan British realm and demarcated the early English kingdom as a distinct and coherent political unit In this volume George Molyneaux places the formation of the English kingdom in a European perspective and challenges the notion that its development was exceptional the Cerdicings were only one of several ruling dynasties around the fringes of the former Carolingian Empire for which the late ninth tenth and eleventh centuries were a time of territorial expansion and consolidation **Early Christian Ireland** T. M.

Charles-Edwards,2000-11-30 A fully documented history of Ireland and the Irish from the fifth to the ninth centuries

Historical Geography: Progress and Prospect Michael Pacione,2013-01-11 Historical geography has been a major area of activity in recent years Much of the recent work and research findings have been extremely valuable to historians and archaeologists and as background to the study of contemporary geography This reissue first published in 1987 presents an overview of contemporary developments in all the major branches of the discipline As such it provides a valuable introduction to the subject a review of the latest state of the art and a pointer to future research directions *The Early Anglo-Saxon*

Kingdoms of Southern Britain AD 450-650 Sue Harrington,Martin Welch,2014-07-31 The Tribal Hidage attributed to the 7th century records the named groups and polities of early Anglo Saxon England and the taxation tribute due from their lands and surpluses Whilst providing some indication of relative wealth and its distribution rather little can be deduced from the Hidage concerning the underlying economic and social realities of the communities documented Sue Harrington and the late Martin Welch have adopted a new approach to these issues based on archaeological information from 12 000 burials and 28 000 objects of the period AD 450 650 The nature distribution and spatial relationships of settlement and burial evidence are examined over time against a background of the productive capabilities of the environment in which they are set the availability of raw materials evidence for metalworking and other industrial craft activities and communication and trade routes This has enabled the identification of central areas of wealth that influenced places around them Key within this period was the influence of the Franks who may have driven economic exploitation by building on the pre existing Roman infrastructure of the south east Frankish material culture was as widespread as that of the Kentish people whose wealth is evident in many well furnished graves but more nuanced approaches to wealth distribution are apparent further to the West perhaps due to ongoing interaction with communities who maintained an essentially Romano British way of life *Early Carolingian Warfare* Bernard S. Bachrach,2011-03-08 Without the complex military machine that his forebears had built up over the course of the eighth century it would have been impossible for Charlemagne to revive the Roman empire in the West *Early Carolingian Warfare* is the first book length study of how the Frankish dynasty beginning with Pippin II established its power and cultivated its military expertise in order to reestablish the regnum Francorum a geographical area of the late Roman period that includes much of present day France and western Germany Bernard Bachrach has thoroughly examined contemporary sources including court chronicles military handbooks and late Roman histories and manuals to establish how

the early Carolingians used their legacy of political and military techniques and strategies forged in imperial Rome to regain control in the West Pippin II and his successors were not diverted by opportunities for financial enrichment in the short term through raids and campaigns outside of the regnum Francorum they focused on conquest with sagacious sensibilities preferring bloodless diplomatic solutions to unnecessarily destructive warfare and disdained military glory for its own sake But when they had to deploy their military forces their operations were brutal and efficient Their training was exceptionally well developed and their techniques included hand to hand combat regimented troop movements fighting on horseback with specialized mounted soldiers and the execution of lengthy sieges employing artillery In order to sustain their long term strategy the early Carolingians relied on a late Roman model whereby soldiers were recruited from among the militarized population who were required by law to serve outside their immediate communities The ability to mass and train large armies from among farmers and urban dwellers gave the Carolingians the necessary power to lay siege to the old Roman fortress cities that dominated the military topography of the West Bachrach includes fresh accounts of Charles Martel s defeat of the Muslims at Poitiers in 732 and Pippin s successful siege of Bourges in 762 demonstrating that in the matter of warfare there never was a western European Dark Age that ultimately was enlightened by some later Renaissance The early Carolingians built upon surviving military institutions adopted late antique technology and effectively utilized their classical intellectual inheritance to prepare the way militarily for Charlemagne s empire Ancient Monuments in the Countryside Timothy Darvill,2014-02-15 Much of England s rich archaeological heritage lies in the countryside Many monuments such as barrows hillforts and Roman villas are familiar features fo the landscape while other sites lie buried or only partly visible These remains are the result of the impact on the landscape of the countless generations of people who have lived worked and died within it The cumulative effect is the landscape we know today in which the historical dimension is an integral component of the valued whole and an important part of what most people in England are increasingly concerned to see protected and conserved The archaeological heritage however is a finite and fragile resource and much of it has been lost in the last two decades as a result of increasing pressures on farming industry and commerce to maximise the return on investment in the land The conservation of what remains therefore needs to be given urgent consideration This report has three main goals First it aims to present the background to the recognition investigation and management of the archaeological resource Second it attempts to review what is known of the resource the threats currently posed to it and the ways in which it can be exploited and conserved Finally it looks towards the development and promotion of a secure future for ancient monuments in the countryside **AngloSaxon(ist) Pasts, PostSaxon Futures** Donna Beth Ellard,2019 Over the past several years Anglo Saxon studies alongside the larger field of medieval studies has undergone a reckoning Outcries against the misogyny and sexism of prominent figures in the field have quickly turned to issues of racism prompting Anglo Saxonists to recognize an institutional structural whiteness that not only bars the door to people of color but also prohibits

scholars from confronting the very idea that race and racism operate within the field's scholarship, scholarly practices and intellectual history. *Anglo Saxonist Pasts, postSaxon Futures* traces the integral role that colonialism and racism play in Anglo Saxon studies by tracking the development of the Anglo Saxonist, an overtly racialized term that describes a person whose affinities point towards white nationalism. That scholars continue to call themselves Anglo Saxonists despite urgent calls to combat racism within the field suggests that this term is much more than just a professional appellation. It is, this book argues, a ghost in the machine of Anglo Saxon studies, a spectral figure created by a group of nineteenth-century historians, archaeologists and philologists responsible for not only framing the interdisciplinary field of Anglo Saxon studies but for also encoding ideologies of British colonialism and Anglo American racism within the field's methods and pedagogies. *Anglo Saxonist Pasts, postSaxon Futures* is at once a historiography of Anglo Saxon studies, a mourning of its Anglo Saxonist fathers and an exorcism of the colonial racial ghosts that lurk within the field's scholarly methods and pedagogies. Part intellectual history, part grief work, this book leverages the genres of literary criticism, auto ethnography and creative nonfiction in order to confront Anglo Saxonist Pasts in order to imagine speculative postSaxon futures inclusive of voices and bodies heretofore excluded from the field of Anglo Saxon studies. *The English Peasantry and the Growth of Lordship* Rosamond

Faith, 1999-04-01 This account of the changing relationship between lords and peasants in medieval England challenges many received ideas about the origins of the manor, the status of the Anglo Saxon peasantry, the 12th-century economy and the origins of villeinage. The author covers the period from the end of the Roman empire to the late 12th century, tracing in post-Conquest society the continuing influence of developments which originated in Anglo Saxon England. Drawing on work in archaeology and landscape studies as well as on documentary sources, the book describes a fundamental division within the peasantry: that between the very dependent tenants and agricultural workers on the inland of the estates of ministers, lords and lords and the more independent peasantry of the warland. The study leads to the expression of views on many aspects of the development of society in the period. **The Shaping of a Community** Beat A. Kümin, 2016-12-05 This book offers a new perspective to the current debate about popular religious attitudes in Tudor England, laying particular emphasis on the social and secular dimensions of parish life. The argument focuses on the role of the laity and especially on the office of churchwarden. It assesses the rising levels of parish income, the importance of the social context for fund-raising strategies and the growing expenditure on priests' voluntary activities and administrative duties. The final part discusses the Reformation-related reduction in religious options and the intensifying trend towards oligarchical parish regimes and official local government responsibilities. Wherever possible, the English situation is put into sharper focus by comparisons with local ecclesiastical life on the Continent, and appendices provide a detailed financial analysis for a large number of parishes.

The End of Roman Britain Michael E. Jones, 1998 Jones offers a lucid and thorough analysis of the economic, social, military and environmental problems that contributed to the failure of the Romans, drawing on literary sources and on recent

archaeological evidence **Manors and Maps in Rural England, from the Tenth Century to the Seventeenth** P.D.A. Harvey, 2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside
