Fool For Christ Allen Mills, 1991-12-15 James Shaver Woodsworth 1874-1942 stands as one of the half dozen most important national political figures in twentieth century Canadian history Allen Mills acknowledges his outstanding achievements while providing a critical account of the Woodsworth legacy and revising the received opinion of him as a man of unbending conviction and ever coherent principle A product of western Canada's pioneer society and a stern Methodist household Woodsworth grew up to make his way into social service and political action A member of parliament for over twenty years he rejected the traditional forms of political activity seeking a new politics and a new political party The latter turned out to be the Co-operative Commonwealth Federation founded in 1932 Its first leader was Woodsworth himself In a crucial period between the World Wars Woodsworth helped define the character of the modern Canadian non-Marxist Left and of many of Canada's important economic and social institutions Among them are the welfare state the Bank of Canada and Canada's internationalist role in the contemporary world

Governing under Stress Marjorie Griffin Cohen, Stephen Clarkson, 2013-07-04 This volume is the first work to emerge from a major international comparative research project exploring the political economy of globalization This interdisciplinary team of scholars is focusing on the semi periphery of world power Whether defined in social cultural economic or simply spatial terms semi peripheral countries share two qualities they are conscious of their subordination to the hegemonic powers at the centre of the global system the United States and the European Union they are also strong enough to have some ability to resist their domination The structural

position of these middle powers in global capitalism is unlike those countries at the centre that do not experience domination and different from those Third World countries on the periphery that have no means to achieve more cultural and political autonomy more distinctive and diversified development or greater social equity and better income redistribution Four countries in North America Central America Europe and the Antipodes namely Canada Mexico Norway and Australia have been selected in order to explore the complexities of globalization from the perspective of the semi periphery Opening chapters examine the international institutions including the North America Free Trade Agreement the World Trade Organization and the European Union which now amount to a quasi constitutional conditioning framework for middle powers under globalization In the second part contributors detail the pressures with which these countries have to cope and consider their ability to pursue policies appropriate to the needs and democratically defined goals of each And in the concluding part after discussing the new economic political and social issues of governing under stress they appraise the possibilities for middle powers to chart distinctive national courses in the face of globalization s constraining challenge

American National Security and Economic Relations with Canada, 1945-1954 Lawrence R. Aronsen,1997-08-30 Aronsen draws on recently declassified documents in Ottawa and Washington to provide a reassessment of Canada s special relationship with the U S Toward this end detailed new information is provided about Canada s contribution to the creation of the postwar economic order from the Bretton Woods Agreement to GATT Canada s cooperation was rewarded by special economic concessions including the extension of the Hyde Park agreement in 1945 the inclusion of the off shore purchases clause to the Marshall Plan and Article II of the NATO Treaty After the outbreak of the Korean War Canada s resources played a crucial role in the production of weapons systems for the new air atomic strategic doctrine Several policies were adopted to facilitate the expansion of Canadian defense production notably the relaxation of regulations on technology transfer the encouragement of private sector investment and the negotiation of long term contracts at above market prices In the midst of these unprecedented peacetime developments Time Magazine observed that Canada had become America s Indispensable Ally

Policy Responses to the Interwar Economic Crisis Adnan Türegün,2022-04-01 This book is about national economic policy responses to the Great Depression of the interwar period Taking off from a generally liberal starting point in the 1920s states diverged greatly in their responses Some were daring while others remained conservative The two groups further differed among themselves in both degree and kind The book gives a certain shape to this messy reality by identifying broad policy patterns paradigms and offers an explanation of it which emphasizes the ideational disposition of policy actors while recognizing the context that limits what they can do More specifically it argues that the ideas held by rulers and the strategies they consequently developed regarding three major groups of interest business labour and most critically agrarians largely determined economic policy variation across nations

The Limits Of Protectionism Michael Lusztig,2010-06-15 Conventional wisdom holds that free trade is economically beneficial to nations But this does not prevent

industries and interest groups from lobbying their governments for protection which creates a fear of electoral backlash among politicians hoping to promote free trade The Limits of Protectionism demonstrates how governments can attain those economic benefits while avoiding the political costs Michael Lusztig's theoretical model focuses on a process by which protectionists can be pushed to restructure and compete in a global economy In this process a small cutback in domestic protection leads to lost market shares at home producers must then turn to overseas exports and as the size of foreign profits grow former protectionists become active advocates for more and greater free trade opportunities In a wide ranging array of case studies from nineteenth century Britain to Depression era United States to contemporary New Zealand Australia Brazil Canada Chile and Mexico Lusztig reveals that if skillfully handled governments can eliminate the obstacles to free trade and enjoy continued economic growth without fear of protectionist groups seeking revenge at the ballot box *Silent Surrender* Kari Levitt, 2002 The Recolonization of Canada The Old Mercantilism and the New The Rise of the Nation State Regression to Dependence Who Decides Metropolis and Hinterland The Harvest of Lengthening Dependence Appendix The New Mercantilism of U S Direct Involvement

Mexico's Uneven Development

Oscar J. Martinez, 2015-08-27 Mexico and the United States may be neighbors but their economies offer stark contrasts In Mexico s Uneven Development The Geographical

and Historical Context of Inequality Oscar J Martinez explores Mexico's history to explain why Mexico remains less developed than the United States Weaving in stories from his own experiences growing up along the U S Mexico border Martinez shows how the foundational factors of external relations the natural environment the structures of production and governance natural resources and population dynamics have all played roles in shaping the Mexican economy This interesting and thought provoking study clearly and convincingly explains the issues that affect Mexico's underdevelopment It will prove invaluable to anyone studying Mexico's past or interested in its future *Walter Gordon and the Rise of Canadian Nationalism* Stephen Azzi, 1999-05-25 Walter Gordon and the Rise of Canadian Nationalism is an examination of the origins of Walter Gordon's nationalist ideology and its impact on Canada It traces his ideas from his family influences and the intellectual currents present in his early years to his work as a chartered accountant public servant and head of a small conglomerate Drawing on extensive interviews and impressive research Azzi provides not only a biography of an important political figure but a significant study of the political and intellectual controversies that Gordon and his ideas created shedding light on the larger political and economic questions of the postwar era *Asleep at the Switch* Bruce Smardon, 2014-11-01 Since 1960 Canadian industry has lagged behind other advanced capitalist economies in its level of commitment to research and development Asleep at the Switch explains the reasons for this underperformance despite a series of federal measures to spur technological innovation in Canada Bruce Smardon argues that the underlying issue in Canada's longstanding failure to innovate is structural and can be traced to the rapid diffusion of American Fordist practices into the manufacturing sector of the early twentieth century Under the influence of Fordism Canadian industry came to depend heavily on outside sources of new technology particularly from the United States Though this initially brought in substantial foreign capital and led to rapid economic development the resulting branch plant industrial structure led to the prioritization of business interests over transformative and innovative industrial strategies This situation was exacerbated in the early 1960s by the Glassco framework which assumed that the best way for the federal state to foster domestic technological capacity was to fund private sector research and collaborative strategies with private capital Remarkably and with few results federal programs and measures continued to emphasize a market oriented approach Asleep at the Switch details the ongoing attempts by the federal government to increase the level of innovation in Canadian industry but shows why these efforts have failed to alter the pattern of technological dependency *Canadian Multinationals and International Finance* Gregory P. Marchildon, Duncan McDowall, 2013-12-02 Seven studies explore the modest but significant role of Canadian multinational enterprises in world finance trade and direct investment Presents a historical overview analyses of individual companies and considerations of whole industries *The Paradox of Continental Production* Barbara Jenkins, 2018-09-05 Should national governments regulate foreign investment The question is hotly contested in today's international trade debates Barbara Jenkins here addresses this complex issue in a timely account of market relationships

among North American nations Jenkins provides up to date detailed analyses of foreign investment regulations and policies in Canada Mexico and the United States She identifies inherent contradictions in the general tactic that all three countries have pursued simply relying on the pressures of the market rather than planning active strategy and she assesses the likely effects on foreign investment of the recently concluded Canada U S Free Trade Agreement and the potential North American free trade agreement Free trade and the absence of adjustment policy she argues expose key political actors such as business and labor too broadly to market forces The result is a projectionist reaction on the part of these domestic actors which ultimately defeats efforts to liberalize trade and investment relations In current approaches to foreign investment regulation Jenkins detects divergent trends among the three countries while Ottawa and Mexico City continue to liberalize their investment strategies Washington is growing more interventionist She shows however that the interventionism of the United States reflects a nationalistic trend rather than a commitment to a coherent strategy Cautioning that the conclusion of a North American free trade agreement will only exacerbate the inadequacies of current policies Jenkins concludes by offering recommendations for future action The Paradox of Continental Production will be stimulating reading for policymakers political economists and other observers of Canadian Mexican and U S politics

The Political Economy of Resource Regulation Andreas R.D. Sanders,Pål Thonstad Sandvik,Espen Storli,2019-04-01 Industrialist John Paul Getty famously quipped The meek shall inherit the earth but not its mineral rights Throughout history natural resources have been sources of wealth and power and catalysts for war and peace The cases studies gathered in this innovative volume examine how the intersection of ideas interest groups international institutions and political systems gave birth to distinctive regulatory regimes at various times and places in the modern world Spanning seven continents and focusing on both advanced and developing economies the case studies explore how the goals and modes of regulation have changed in response to new economic realities demands from power brokers and the broader public and rules and norms for what is considered legitimate government action Together the contributors show that regulatory regimes in resource dependent nations have played a decisive role in the international political economy They also offer unique insights into why some resource rich countries have flourished while others have been mired in poverty and corruption
