Pagan Dream Of The Renaissance:

The Pagan Dream of the Renaissance Joscelyn Godwin, 2005-02-10 The Pagan Dream of the Renaissance recounts the almost untold story of how the rediscovery of the pagan mythological imagination during the Renaissance brought a profound transformation to European culture This highly illustrated book available for the first time in paperback shows that the pagan imagination existed side by side often uneasily with the official symbols doctrines and art of the Church Godwin carefully documents how pagan themes and gods enhanced both public and private life Palaces and villas were decorated with mythological images stories music and dramatic pageants were written about pagan themes and landscapes were designed to transform the soul This was a time of great social and cultural change when the pagan idea represented nostalgia for a classical world untroubled by the idea of sin and in no need of redemption A stunning book with hundreds of photos that bring alive this period with all its rich conflict between Christianity and classicism

Locations of Knowledge in Medieval and Early Modern Europe Kocku Von Stuckrad, 2010 Addressing discourses of perfect knowledge in Western culture between 1200 and 1800 this book integrates the study of Western esotericism in a larger analytical framework of European history of religion

The Philosophy of Gemistos Plethon Vojtech Hladký, 2017-05-15 George Gemistos Plethon c 1360 1454 was a remarkable and influential thinker active at the time of transition between the Byzantine Middle Ages and the Italian Renaissance His works cover literary historical scientific but most notably philosophical issues Plethon is arguably the most important of the Byzantine Platonists and the earliest representative of Platonism in the Renaissance the movement which generally exercised a huge influence on the development of early modern thought Thus his treatise on the differences between Plato and Aristotle triggered the Plato Aristotle controversy of the 15th century and his ideas impacted on Italian Renaissance thinkers such as Ficino This book provides a new study of Gemistos philosophy The first part is dedicated to the discussion of his public philosophy As an important public figure Gemistos wrote several public speeches concerning the political situation in the Peloponnese as well as funeral orations on deceased members of the ruling Palaiologos family They contain remarkable Platonic ideas adjusted to the contemporary late Byzantine situation In the second most extensive part of the book the Platonism of Plethon is presented in a systematic way It is identical with the so called philosophia perennis that is the rational view of the world common to various places and ages Throughout Plethon's writings it is remarkably coherent in its framework possesses quite original features and displays the influence of ancient Middle and Neo Platonic discussions Plethon thus turns out to be not just a commentator on an ancient tradition but an original Platonic thinker in his own right In the third part the notorious question of the paganism of Gemistos is reconsidered He is usually taken for a Platonizing polytheist who gathered around himself a kind of heterodox circle The whole issue is examined in depth again and all the major evidence discussed with the result that Gemistos seems rat

"Rubens, Velázquez, and the King of Spain " Larry Silver, 2017-07-05 This study provides a new analysis of the pictorial ensemble of the Torre de la Parada the hunting lodge of

King Philip IV of Spain Created in the late 1630s by a group of artists led by Peter Paul Rubens this cycle of mythological imagery and hunting scenes was completed by Diego Velazquez Despite the lack of a written program surviving works provide eloquent testimony of several basic themes that embody Neostoic ideals of self restraint and prudent governance While Rubens set the moral tone through his serio comic Ovidian narratives Velazquez added an important grace note with his portraits of ancient philosophers and royals and fools of the court This study is the first to consider in depth their joint artistic contributions and shared ambition Through analysis of individual works the authors situate these pictorial inventions within broader intellectual currents in both Spanish Flanders and Spain especially in the advice literature and drama presented to the Spanish king Moreover they point to the lasting resonance of Torre de la Parada for Velazquez especially within his late masterworks Las Meninas and Las Hilanderas Ultimately this study illuminates the dialogical nature of this ensemble in which Rubens and Velazquez offer a set of complementary views on subjects ranging from the nature of classical gods to the role of art as a mirror of the prince

Giorgio Vasari Liana De Girolami Cheney, 2025-03-04 This book presents Giorgio Vasari as an intellectual painter and philosopher a rarely explored perspective in existing scholarship It provides a fresh understanding of how Giorgio Vasari influenced the portrayal of successful artists in 16th century Italy His extensive education in classical studies humanism and art and his unparalleled intellectual curiosity enthusiasm and creative prowess enabled him to formulate a bold and assertive viewpoint on art and its history With the support of humanists fellow artists and the patronage of his era Vasari transformed the artist's role Artists came to be perceived as divinely inspired creators of images that convey profound moral and intellectual messages Their status was elevated from mere artisans to creators whose work brings beauty to the world and makes enduring contributions to cultural heritage

Polemical Encounters Olav Hammer, Kocku von Stuckrad, 2007-09-30 In its historical development from late antiquity to the present western esotericism has repeatedly been the issue of polemical discourse This volume engages the polemical structures that underlie both the identities within and the controversy about esoteric currents in European history From Jewish and Christian kabbalah

through heretical discourse and interconfessional polemics in early modernity to the legitimization of esoteric identity in modern culture the 12 chapters accompanied by an editors introduction provide a cornucopia of relevant cases that are interpreted in a framework of polemical discourse and Othering This volume sheds new light on the ultimately polemical structure of western esotericism and thus opens new vistas for further research into esoteric discourse

Objects of Culture in the Literature of Imperial Spain Mary Barnard, Frederick A. de Armas, 2013-03-14 Collecting and displaying finely crafted objects was a mark of character among the royals and aristocrats in Early Modern Spain it ranked with extravagant hospitality as a sign of nobility and with virtue as a token of princely power Objects of Culture in the Literature of Imperial Spain explores how the writers of the period shared the same impulse to collect arrange and display objects though in imagined settings as literary artefacts These essays examine a variety of cultural objects described or alluded to in books from the Golden Age of Spanish literature including clothing paintings tapestries playing cards monuments materials of war and even enchanted bronze heads The contributors emphasize how literature preserved and transformed objects to endow them with new meaning for aesthetic social religious and political purposes whether to perpetuate certain habits of thought and belief or to challenge accepted social and moral norms

Raphael's Poetics David Rijser, 2025-10-01 Raphael s Poetics applies strategies of interpretation implicit in antique poetry to the visual art of the Renaissance concentrating on Raphael s Roman works and their cultural context Until recently scholarly discussion was dominated by the application of Renaissance literary theory to visual arts obscuring the fact that Renaissance humanists who contributed to literary theory were in the first instance and almost without exception poets rather than theorists To counter the tendency towards theory the hermeneutic rules implicit in their poetry and thus the poetry itself is brought to the fore by this study as a hermeneutical tool By focusing on the interaction between the work of art and its public Rijser offers innovative interpretations of canonical works and important insights into the cultural history of the early modern period Reconstructing a visual grammar and defining the context in which Raphael s art functioned this study illuminates contemporary significances that have since been lost

Trials of the Moon Ben Whitmore, 2010 The creation myths of modern witchcraft and Paganism were decisively toppled at the turn of this century in Ronald Hutton s celebrated book Triumph of the Moon But did Hutton topple more than just myths Are some truths also hidden in the rubble Did paganism really die out centuries ago Was witchcraft really no more than a fantasy Were the Gods of Wicca really born out of the Romantic movement Did Gerald Gardner lie about his initiation into witchcraft Ben Whitmore has retraced many of Hutton s steps critically evaluating the evidence and he now suggests that the truth may be quite different and even more fascinating Drawing on a wealth of scholarly material Whitmore demonstrates that the field of Pagan history is anything but barren ground it is rich and fertile and we have barely begun to cultivate it

Technic and Magic Federico Campagna, 2018-05-31 We take for granted that only certain kind of things exist electrons but not angels passports but not nymphs This is what we understand as reality But in fact reality varies with

each era of the world in turn shaping the field of what is possible to do think and imagine Our contemporary age has embraced a troubling and painful form of reality Technic Under Technic the foundations of reality begin to crumble shrinking the field of the possible and freezing our lives in an anguished state of paralysis Technic and Magic shows that the way out of the present deadlock lies much deeper than debates on politics or economics By drawing from an array of Northern and Southern sources spanning from Heidegger Junger and Stirner's philosophies through Pessoa's poetry to Advaita Vedanta Bhartrhari Ibn Arabi Suhrawardi and Mulla Sadra's theosophies Magic is presented as an alternative system of reality to Technic While Technic attempts to capture the world through an absolute language Magic centres its reconstruction of the world around the notion of the ineffable that lies at the heart of existence Technic and Magic is an original philosophical work and a timely cultural intervention It disturbs our understanding of the structure of reality while restoring it in a new form This is possibly the most radical act if we wish to change our world first we have to change the idea of reality that defines it

Architectural Involutions Mimi Yiu, 2015-11-15 Winner of the MLA Prize for Independent Scholars Taking the reader

on an inward journey from fa ades to closets from physical to psychic space Architectural Involutions offers an alternative genealogy of theater by revealing how innovations in architectural writing and practice transformed an early modern sense of interiority The book launches from a matrix of related platforms a term that in early modern usage denoted scaffolds stages and draftsmen s sketches to situate Alberti Shakespeare Jonson and others within a landscape of spatial and visual change As the English house underwent a process of inward folding replacing a logic of central assembly with one of dissemination the subject who negotiated this new scenography became a flashpoint of conflict in both domestic and theatrical arenas Combining theory with archival findings Mimi Yiu reveals an emergent desire to perform subjectivity to unfold an interior face to an admiring public Highly praised for its lucid writing comprehensive supplementary material and engaging tone Architectural Involutions was the winner of the 2016 MLA Prize for Independent Scholars

How the Light Gets In Graham Ward, 2016 How the Light Gets In Ethical Life I presents a systematic account of the teachings of the Christian faith to offer a vision from a human created and limited perspective of the ways all things might be understood from the divine perspective It explores how Christian doctrine is lived and the way in which beliefs are not simply cognitive sets of ideas but embodied cultural practices Christians learn how to understand the contents of their faith learn the language of the faith through engagements that are simultaneously somatic affective imaginative and intellectual In the first of four volumes Graham Ward examines the complex levels of these engagements

through three historical developments in the systematic organization of doctrine the Creeds the Summa and Protestant dogmatics He outlines a methodology for exploring and practicing systematic theology that captures how the faith is lived in cultural social and embodied engagements Ward then unpicks several fundamental theological concepts and how they are to be understood from the point of view of an engaged systematic truth revelation judgement discernment proclamation faith seeking understanding and believing as it relates to and grounds the possibilities for faith This groundbreaking work offers an interdisciplinary investigation through poetry art film the Bible and theological discourse analysing the human condition and theology as the deep dream for salvation The final part relates theology as a lived and ongoing pedagogy concerned with individual and corporate formation to biological life social life and life in Christ Here an approach to living theologically is sketched that is the primary focus for all four volumes ethical life

Esotericism in Western Culture Wouter J. Hanegraaff,2025-05-29 This accessible introduction by the world s leading expert explains why the study of esotericism is not a marginal pursuit but belongs at the center of modern research in the humanities Reflecting updates in the field since the foundational publication Western Esotericism A Guide for the Perplexed 2013 Wouter J Hanegraaff demonstrates that the exclusion of rejected knowledge from normative accounts of Western civilization is the reflection of a narrow Eurocentric ideology that became the template for discrediting and ultimately destroying so called primitive cultures associated with superstition and pagan idolatry during the global colonial age Rejecting this rejection of rejected knowledge means restoring the suppressed to its legitimate place in history and cultural analysis Through this approach Wouter J Hanegraaff depicts a radically inclusive vision of the Greater West and its forgotten histories from pagan antiquity through Jewish Christian and Islamic cultures up to secular modernity and beyond
