Application and Evaluation of Acupuncture in the Treatment of Neurological Diseases Liming Lu, Nenggui Xu, Myeong Soo Lee, Chunzhi Tang, Yong Tang, Bing Zhu, 2023-06-21 Neurological disorders such as Alzheimer's disease and Parkinson's disease are an important cause of disability and death worldwide and pose a serious burden on the global health system over the past 30 years Acupuncture as the most widely used traditional Chinese medicine therapy in the world has been widely used in 183 countries and regions Acupuncture can treat more than 300 kinds of diseases especially for neurological diseases Due to the unique advantages of acupuncture such as good therapeutic effect and low side effects many researchers have conducted extensive clinical studies on the effectiveness and safety of acupuncture in the treatment of neurological diseases laying a foundation for the practicability and scientific vigor of this complementary and alternative therapeutic approach There are still many problems unanswered in the current clinical research on acupuncture for the treatment of neurological diseases First of all clinical research is lagging behind due to the lack of emphasis on modern advanced methods and analytical techniques e.g artificial intelligence omics analysis bioinformatics analysis data mining and multidisciplinary integration process Secondly the quality of reports on most clinical studies of acupuncture treatment for neurological diseases is extremely low Most clinical studies have not adopted standardized methodological evaluations authoritative disease diagnosis standards and efficacy evaluation standards The lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research Thirdly there is a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases Therefore strictly designed clinical research and in depth and systematic analysis method are currently needed to provide high quality evidence for acupuncture treatment of neurological diseases In this Research Topic we hope to further understand the role of acupuncture in the treatment of neurological diseases through clinical research and secondary research The range of acupuncture includes manual acupuncture electro acupuncture body needling auricular acupuncture scalp acupuncture laser acupuncture and acupressure etc Neurological diseases include stroke meningitis encephalitis tetanus Alzheimer's disease and other dementias Parkinson's disease epilepsy multiple sclerosis motor neurone disease migraine tense type headaches headaches from drug overuse and others
