Who's Angels Are These, Anyway? Kevin Riddell, 2017-02-12 A review of and a response to the book *The Better Angels of our Nature* by Steven Pinker Mr Pinker's book presents an atheistic view of modern western history and this is intended to present an alternate Christian view while also reviewing the content of his book Owning the Process, 2002

Lectures of the Air Corps Tactical School and American Strategic Bombing in World War II Phil Haun, 2019-04-12 Following the cataclysmic losses suffered in World War I air power theorists in Europe advocated for long range bombers to overfly the trenches and strike deep into the enemy's heartland The bombing of cities was seen as a means to collapse the enemy's will to resist and bring the war to a quick end In the United States airmen called for an independent air force but with the nation's return to isolationism there was little appetite for an offensive air power doctrine By the 1930s however a cadre of officers at the US Army Air Corps Tactical School ACTS had articulated an operational concept of high altitude daylight precision bombing HADPB that would be the foundation for a uniquely American vision of strategic air attack In *Lectures of the Air Corps Tactical School and American Strategic Bombing in World War II* editor Phil Haun brings together nine ACTS lecture transcripts which have been preserved in Air Force archives exactly as delivered to the airmen destined to lead the US Army Air Forces in World War II Presented is a distinctive American strategy of high altitude daylight precision bombing as told through lectures given at the ACTS during the interwar period and how these airmen put the theory to the test The book examines the Air Corps theory of HADPB as compared to the reality of combat in World War II by relying on recent revisionist histories that have given scholars a deeper understanding of the impact of strategic bombing on Germany

Rethinking the Liberal Peace Shahrbanou Tadjbakhsh, 2011-03-08 This book presents a critical analysis of the liberal peace project and offers possible alternatives and models In the past decade the model used for reconstructing societies after conflicts has been based on liberal assumptions about the pacifying effects of open markets and open societies Yet despite the vast resources invested in helping establish the precepts of this liberal peace outcomes have left much to be desired The book argues that failures in the liberal peace project are not only due to efficiency problems related to its adaptation in adverse local environments but mostly due to problems of legitimacy of turning an ideal into a doctrine for action The aim of the book is to scrutinize assumptions about the value of democratization and marketization and realities on the ground by combining theoretical discussions with empirical evidence from key post conflict settings such as Iraq and

Afghanistan These show the disparities that exist between the ideals and the reality of the liberal peace project as seen by external peacebuilders and domestic actors The book then proposes various alternatives and modifications to better accommodate local perspectives values and agency in attempts to forge a new consensus This book will be of great interest to students of peacebuilding peacekeeping statebuilding war and conflict studies international security and IR **On**

The Faces of Virtue in Law Amalia Amaya, Claudio Michelon, 2020-06-09 This book gathers together leading voices in virtue theory an increasingly influential aspect of legal theory in the 21st century to take stock of virtue jurisprudence s evolution and suggest ways in which this approach can be further developed The contributions address the three main axes along which virtue jurisprudence has unfolded in the past decades the quest to provide a suitable virtue based foundation for the law in general or for some aspects of it in particular but not exclusively criminal law the investigation of the role played by character traits in legal decision making and the investigation of how the law can be part of a virtuous life As will become apparent for readers of this volume those lines are converging and as they do so a general virtue based approach to the study of law is starting to emerge Crucial in addressing problems with legal experience for which the resources of traditional legal theory are insufficient this book s investigation of virtue theory and virtue jurisprudence will be of interest to all of those studying legal decision making and the philosophy of law as well as those studying virtue ethics more widely It was originally published as a special issue of Jurisprudence

The Deadly Ethnic Riot Donald L. Horowitz, 2023-11-15 Donald L Horowitz s comprehensive consideration of the structure and dynamics of ethnic violence is the first full scale comparative study of what the author terms the deadly ethnic riot an intense sudden lethal attack by civilian members of one ethnic group on civilian members of another ethnic group Serious frequent and destabilizing these events result in large numbers of casualties Horowitz examines approximately 150 such riots in about fifty countries mainly in Asia Africa and the former Soviet Union as

well as fifty control cases With its deep and thorough scholarship incisive analysis and profound insights *The Deadly Ethnic Riot* will become the definitive work on its subject Furious and sadistic the riot is nevertheless directed against a precisely specified class of targets and conducted with considerable circumspection Horowitz scrutinizes target choices participants and organization the timing and supporting conditions for the violence the nature of the events that precede the riot the prevalence of atrocities during the violence the location and diffusion of riots and the aims and effects of riot behavior He finds that the deadly ethnic riot is a highly patterned but emotional event that tends to occur during times of political uncertainty He also discusses the crucial role of rumor in triggering riots the surprisingly limited role of deliberate organization and the striking lack of remorse exhibited by participants Horowitz writes clearly and eloquently without compromising the complexity of his subject With impressive analytical skill he takes up the important challenge of explaining phenomena that are at once passionate and calculative Donald L Horowitz's comprehensive consideration of the structure and dynamics of ethnic violence is the first full scale comparative study of what the author terms the deadly ethnic riot an intense sudden lethal attack by civilian members of one ethnicity

Crime and the Development of Modern Society Howard Zehr, 2019-03-11 Originally published in 1976 This study deals with crime as social history in Germany and France during the nineteenth century It establishes the broad statistical patterns of crime over the century so that the crime phenomenon can be analysed in the light of the other main trends of economic and social life One basic concern is the relationship between crime and economic condition The second main issue is to establish whether specifically rural and urban patterns of crime can be isolated The third main concern is to establish whether any relationship existed between patterns of delinquency and the social upheaval which accompanied industrialisation and urbanisation These three main issues continue as important questions in considering modern day crime Nineteenth century Germany and France provide an excellent context in which to examine them because of the substantial urbanisation and industrialisation which occurred between 1830 and 1914 As well as providing an important contribution to the history of nineteenth century society this book also indicates important lessons for the contemporary world
