Surgery and Arthroscopy of the Knee Werner Müller, Werner Hackenbruch, 2012-12-06 The need for greater international collaboration is becoming increasingly clear Practically every nation or people has in addition to its own characteristics and history its own medical tradition Methods and ways of thinking that are successfully established in one place may not be accepted in another for some time The medical tradition and training in different countries can take quite different forms What would our present knowledge be Without the creative spontaneous ideas and contributions from the romance countries Without the opportunity of research as it is practised on a large scale in the USA where so many young Europeans took their first steps in experimental science Without the conscientious clinical work done in Central Europe and the valuable experience gained there Without finally the sober and critical scientific approach as fostered in the cool heads of Northern Europe for generations None of these qualities is sufficient without the others but together they are a source of strength Ultimately we hope through sensible concentration of efforts while maintaining variety to overcome the lack of an integrated approach in experimental science and to prevent repetition of painful mistakes In this regard the first two ESKA congresses have brought us great advances

Schulitz, H. Krah, W.H. Stein, 2012-12-06 Different views about the biomechanics of the knee joint and late reconstruction of ligamentous injuries underline the obstacles impeding the establishment of generally acceptable principles for the treatment of such lesions As late as June 1976 HUGHSTON emphasized in the Journal of Bone and Joint Surgery that in spite of excellent anatomic studies substantial uncertainty still prevails in knee joint surgery Even the significance of the anterior drawer sign for ruptures of the anterior cruciate ligament is interpreted quite diversely as illustrated in a comparison of HUGHSTON GIBBS and SCHIECK who give varying opinions concerning the indication related to the age of the patient or possible earlier joint damage as well as concerning the prognosis for untreated knee joints The question still remains as to how often an intra articular ligamentous replacement should be carried out in addition to extra articular techniques O'DONOGHUE SLOCUM NICHOLAS HUGHSTON Lastly the question of synthetic ligament replacement must be clarified After basic research has well advanced clinical experience must be discussed Statements concerning the therapeutic value of diverse procedures based solely on knowledge of the literature remain problematic For this reason a workshop was held at the University of Heidelberg in the Orthopedic Clinic Head Prof Dr H. COTTA in June 1977 with the aim of bringing together representatives of the different leading schools in a round table discussion to comment on still unsolved questions *Encyclopedic Handbook of Biomaterials and Bioengineering: v. 1-2. Materials* Donald Lee Wise, 1995 Integrating basic science engineering and medical applications this handbook provides a treatment of materials used in or on the human body ranging from biopolymers for controlled release drug delivery systems to metal plates used in bone repair and absorbable devices such as sutures **Use of Biologics for Foot and Ankle Surgery, An Issue of Clinics in Podiatric Medicine and Surgery** Adam Landsman, 2018-06-26 This issue of Clinics in Podiatric Medicine and Surgery guest edited by Dr Adam Landsman will cover a number of topics surrounding the use of Biologics in Foot and Ankle Surgery Article content includes but is not limited to Use of decellularized collagen for resurfacing of the 1st Metatarsal head Living cryopreserved bone allograft as an adjunct for hindfoot arthrodesis Synthetic polycaprolactone grafts as an alternative to decellularized collagen for reinforcement of Achilles and posterior tibial tendons Cartilage substitutes allograft acellular and cellular options for osteochondral defects Cryopreserved living umbilical cord graft for repair of tendon ruptures Update on the use of decellularized collagen for surgical repair of tendons The role of amniotic tissue in the prevention of tendon adhesions during surgical repair and Stem cells can be used to reduce joint pain in the foot and ankle *Ligament and Extensor Mechanism Injuries of the Knee* W.
