Proteins in Normal and Pathological Urine Y. Manuel, J. P. Revillard, H. Bétuel, 1970-03-16 **Proteins in Normal and Pathological Urine** Yves Manuel, 1970 **Immunochemistry in Clinical Laboratory Medicine** A.M. Ward, J. Whicher, 2012-12-06 The rapid growth of specific protein estimations in the clinical laboratory over the last 10 years has been due to advances both in methodology and in the understanding of the role of the various plasma proteins in health and disease This expansion has been made possible by the development of both gel phase and fluid phase techniques for the estimation of proteins and the ready availability of antisera to individual plasma proteins The specificity of the immunological reaction has allowed the more precise identification and estimation of individual plasma proteins than was possible with dye binding or other chemical techniques but at the same time these methods have introduced other possible errors and pitfalls Advances in understanding of the structure and function of various plasma proteins has pointed the way to new clinical applications of plasma protein estimation in the diagnosis and monitoring of disease The Symposium of which these are the proceedings was planned to bring together a number of experts in the field to discuss the available methods and their clinical application **Urinary Proteins** L. Protides of the Biological Fluids H. Peeters, 2013-10-22 Protides of the Biological Fluids contains the proceedings of the Twenty First Colloquium held at Brugge in 1973 The Colloquium covers topics on membrane proteins proteinuria and new techniques under which comes the automated nephelometric analysis of proteins The book is organized into three sections according to the topics of the Colloquium Section A Membrane discusses all aspects of membrane proteins including their isolation and solubilization the nature of their lipid protein interaction and the physical probes used for their characterization Section B Urinary Proteins centers on proteinuria electrophoretic and immunoelectrophoretic methods enabling characterization of renal disease and properties of specific urinary proteins and enzymes The last section describes two immunological methods for protein quantitation Nephrology Forum J.J. Cohen, J.T. Harrington, J.P.

Kassirer, 2012-12-06 A few years ago as the editor of Kidney International I was approached by Drs Cohen Kassirer and Harrington who suggested that a new feature should be included in each monthly issue of the journal They suggested that it should employ a case discussion format such as that used frequently at specialty rounds in teaching hospitals and that the discussion should place a special emphasis on the relationship between basic science and important problems in clinical nephrology The summary of an actual patient history would first be presented to exemplify a particular clinical problem a seasoned person of proven expertise would be invited to deliver a well documented analysis of the relevant issues and perhaps most ambitiously of all a critical audience would be assembled to challenge the principal discussant in an open ended question and answer period The entire affair would be recorded at the time of the live conference and transcribed subsequently in preparation for publication as a Nephrology Forum I must confess that I was somewhat hesitant at first to

endorse their proposal because at the time Kidney International had just begun to establish a solid reputation for the publication of high quality peer reviewed manuscripts dealing with the clinical and laboratory research interests of the international nephrological community **Proteinuria** G. M. Eisenbach,H. Stolte,J. Brod,2015 **Research Grants Index** National Institutes of Health (U.S.).
