Free Speech and the Politics of Identity David A. J. Richards, 1999 Free Speech and the Politics of Identity challenges the scholarly view as well as the dominant legal view outside the United States that the right of free speech may reasonably be traded off in pursuit of justice to stigmatized minorities These views appeal to an alleged reasonable balance between two basic human rights the right of free speech and the right against unjust discrimination Compelling arguments of normative political theory and interpretative history show however that these rights are structurally linked the abridgement of one compromises the other To make this case David Richards offers an original political theory of toleration and of structural

injustice that addresses the nature and scope of the right of free speech and the right against unjust discrimination its analytic focus is on the role played by members of subordinated groups in the protest of the terms of structural injustice the politics of identity advancing constitutional justice under law While the argument is developed on the basis of American constitutional experience from the antebellum period forward its normative force is brought to bear both in defending and criticizing some aspects of American law and in challenging the continuing legitimacy of laws against group libel obscenity and blasphemy under national legal systems including Germany France Britain Canada Israel India South Africa and others regional systems the jurisprudence of the European Court of Human Rights and public international law The book s innovative normative and interpretative methodology calls for a new departure in comparative public law in which all states responsibly address their common problems not only of inadequate protection of free speech but correlative failure to take seriously the continuing political power of such evils as anti-Semitism racism sexism and homophobia

Black Politics Today Theodore J. Davis Jr., 2013-06-17 The late 1980s ushered in a new era of black politics the socioeconomic transition era Coming on the heels of the protest era and politics era the current stage is characterized by the emergence of a new black middle class that came of age after the Civil Rights struggle Although class still isn't a strong factor in the external politics of the black community it is increasingly a wedge issue in the community's internal politics Black politics today is increasingly less about the interest of the larger group and more about the interest of smaller subgroups within the community Theodore J Davis Jr argues that the greatest threat to the social and political cohesiveness of the so called black community may be the rise of a socially and economically privileged group among the ranks of black America This rift has affected blacks ability to organize effectively and influence politics Davis traces the changes in economic status public opinion political power and participation

and leadership over three generations of black politics The result is an insightful analysis of black politics today
