Report of the Secretary of the Senate from ... United States. Congress. Senate,1977-10 The Expert Negotiator, 4th Revised Edition Raymond Saner,2012-05-31 In this book the social scientist and economist Professor Dr Raymond Saner draws on his long years of experience as a negotiation adviser teacher trainer researcher and university lecturer to show that two thirds of negotiation practice is learnable The author treats the different aspects of negotiation practice in a way that is useful to both academics and practitioners such that the general laws and principles gradually become evident as and of themselves **Edison 64** Richard Sand,2025-04-15 WINNER Gold Medal in the History Genre 2019 by Military Writers

Society of America WINNER Independent Press Award WINNER LitPick Top Choice Book Review Award The Vietnam War represents a dark period in the history of the United States Scores of young men and many women went off to a foreign land to fight a war of unclear intentions For those that came home years of PTSD and anything but a hero's welcome would be there to meet them For a large number of others there was no coming home alive For the community of North Philadelphia the death and heartache of the Vietnam War would affect them more drastically than any other 64 students from Edison High School would be killed in combat more than any other school in the country Now for the first time author and historian Richard Sand shines the light on these brave 64 and the effect of the loss of life on their school and community Collecting stories from both survivors who made it home and from family members of those who didn't as well as photos of the fallen soldiers Sand weaves a tapestry of history that shows the very human toll that war takes on society communities and the people who have no choice but to go through the horrors and emerge on the other side **The Expert Negotiator, 4th**

Edition Raymond Saner,2012-05-31 Success in negotiation is not a matter of chance but the result of careful planning and

specialized skills Some of these skills are inborn others need to be learnt In this book the social scientist and economist Professor Dr Raymond Saner draws on his long years of experience as a negotiation adviser teacher trainer researcher and university lecturer to show that two-thirds of negotiation practice is learnable Yet very few people are specifically trained in this everyday task Without sacrificing scientific accuracy Professor Saner offers a highly readable and fascinating guide to the subject In so doing he does not limit himself to the over simplified tips generally put out on successful bargaining in every imaginable situation Rather he treats the different aspects of negotiation practice in a way that is useful to both academics and practitioners such that the general laws and principles gradually become evident as and of themselves The aim of this approach is to reveal the essence of negotiation through the experience of both the author and the reader Such an understanding of the processes involved in negotiation is of far greater practical value than a mere collection of recipes with no discussion of the underlying theory while the most comprehensive treatment of the theory without reference to its application in practice would be only half the story Thus the text is supplemented by a series of illustrative examples and case studies from the business political NGO and international organization arenas plus some seventy figures and tables With all this the author has paid considerable attention to writing a text that is both entertaining to read and rigorous in content
