**Protocols for High-Risk Pregnancies** John T. Queenan, Catherine Y. Spong, Charles J. Lockwood, 2020-11-26 Through seven editions Protocols for High Risk Pregnancies has helped busy obstetricians keep pace with a constantly evolving field Providing just in time content its focus on protocols and guidelines helps organize medical thinking avoid heuristic errors of omission and commission and optimize maternal and fetal outcomes As with the prior six

This seventh edition has also been expanded to include a number of new topics including Protocols on opioid use, misuse, and addiction in pregnancy and postpartum; Noninvasive prenatal diagnosis of aneuploidy; Periconceptual genetic screening; Expanded protocols on maternal valvular heart disease and cardiomyopathies; Protocols on arboviruses including Zika and malaria; Protocols for High Risk Pregnancies. An Evidence Based Approach will be an essential reference for obstetricians, medical students, general practitioners, and all medical professionals who are seeking the most up to date information and guidance on high risk pregnancies. Protocols for High-Risk Pregnancies John T. Queenan, John C. Hobbins, Catherine Y.

Spong, 2009-02-12 Pregnancies compromised by disease, trauma, substance abuse, and other factors are not uncommon. They clearly demand special attention from the obstetrician, obstetric nurse, primary care physician, and others. Through three successful editions, Queenan has provided these audiences with a concise yet complete guide to managing pregnant patients and fetuses at risk. For the fourth edition, Dr. Queenan has replaced up to a third of the 96 contributors to get some new blood into the book. He has invited more contributions from European authors in order to better cater to an international readership. The book does, however, retain the popular protocols theme in which very brief chapters on the spectrum of HRP topics provide quick summaries of a problem and diagnostic and therapeutic steps to manage it. Every chapter has been revised carefully to reflect the latest thinking on the best approach to pregnant patients with risks like tuberculosis, STDs, bleeding, pre-eclampsia, etc. The many quick reference tables and charts are updated, as are the brief bibliographies accompanying each chapter. This new edition provides increased coverage of IUGR, Pre-eclampsia, teratology, and genetics. New chapters have been introduced on Doppler ultrasound, nuchal translucency, and also on AIDS in pregnancy. Furthermore, this fourth edition is evidence based. The new editor, Catherine Spong, is a guru of evidence based medicine and, as well as one of the editors of the journal of the American College of Obstetricians and Gynecologists, Obstetrics and Gynaecology, directs the foetal medicine programme at the National Institute of Health in Washington. *Protocols for High-Risk Pregnancies*
