Subject Index of Modern Books Acquired British Library, 1971 *Making Americans Healthier* Robert F. Schoeni, James S. House, George A. Kaplan, Harold A. Pollack, 2008-01-25 The United States spends billions of dollars annually on social and economic policies aimed at improving the lives of its citizens but the health consequences associated with these policies are rarely considered In *Making Americans Healthier* a group of multidisciplinary experts shows how social and economic

policies seemingly unrelated to medical well being have dramatic consequences for the health of the American people Most previous research concerning problems with health and healthcare in the United States has focused narrowly on issues of medical care and insurance coverage but Making Americans Healthier demonstrates the important health consequences that policymakers overlook in traditional cost benefit evaluations of social policy The contributors examine six critical policy areas civil rights education income support employment welfare and neighborhood and housing Among the important findings in this book David Cutler and Adriana Lleras Muney document the robust relationship between educational attainment and health and estimate that the health benefits of education may exceed even the well documented financial returns of education Pamela Herd James House and Robert Schoeni discover notable health benefits associated with the Supplemental Security Income Program which provides financial support for elderly and disabled Americans George Kaplan Nalini Ranjit and Sarah Burgard document a large and unanticipated improvement in the health of African American women following the enactment of civil rights legislation in the 1960s Making Americans Healthier presents ground breaking evidence that the health impact of many social policies is substantial The important findings in this book pave the way for promising new avenues for intervention and convincingly demonstrate that ultimately social and economic policy is health policy A Volume in the National Poverty Center Series on Poverty and Public Policy     **A Christian Perspective on Political Thought**

Stephen Charles Mott,1993-05-27 Arguing that Americans make political choices in terms of a general notion of right and wrong yet lack a sound objective foundation for such values evangelical scholar Stephen Mott formulates a Christian political theory that supplies such norms Drawing on theological and biblical sources Mott thoroughly develops the biblical and theological foundations for politics and political evaluation Mott proposes that political philosophies should be evaluated in light of Christian theological and ethical values specifically the understanding of power human nature the nature of group life justice and love government and time He then applies this critical framework in an evaluation of political ideologies including traditional conservatism liberalism democracy laissez faire conservatism Marxist socialism and democratic socialism He gives special attention to their classical exponents and ideas Asserting that political visions ultimately depend on cultural values that themselves require vigorous religious faith in a particular society Mott s study offers a valuable introduction to Christian political thought as well as an illuminating look at the connection between politics and religion     Human

**Promoting Young People's Wellbeing through Empowerment and Agency** Lucy Maynard, Karen Stuart, 2017-09-08

The terms wellbeing, empowerment, and agency are common parlance in policy and practice with children, young people, and families. CYPF yet are often misused or not fully understood. Further, there is a disconnect between these abstract concepts and tangible practice with CYPF. This book bridges the theory-practice divide, offering a clear and definitive guide to concepts and practical ways to develop CYPF wellbeing. It examines the concept of wellbeing and its intrinsic relationship to social justice, both theoretically and through case study material, and locates these practices within critical pedagogy. The book highlights a range of practice with CYPF of various ages in formal and non-formal learning situations, engaged in a range of different programmes, including learning reduction from offending, social action, and tackling targeted needs. Each chapter highlights relevant policy research and practice examples to ensure that the book is relevant to a variety of readers. This book will benefit students and practitioners who work with young people to realise wellbeing and to embed critical pedagogy in their practice. It also provides a frame of reference to critically engage in policy analysis and is essential reading for social workers.
