Entrepreneurial Ecosystems Sophie Boutillier, Denis Carré, Nadine Levratto, 2016-05-09 In today's rapidly changing business landscape entrepreneurship is growing and actively promoted by policy makers Several reports explore the influence of entrepreneurship on the economy and put some emphasis on its positive influence GDP per capita unemployment and exports However entrepreneurship does not go per se and it is now broadly admitted that the decision of the entrepreneur is narrowly connected with its environment the so called entrepreneurial ecosystem This book shows why policymakers entrepreneurship supporters and entrepreneurs themselves should keep in mind the locally structured nature of entrepreneurial networks Even if the notion of Entrepreneurial Ecosystem has become quite popular among the international organization development agencies and public administrations this concept is often considered as a new one having its origins in very recent publications This book aims at showing that entrepreneurial ecosystems have their roots in the history of economic thought and that scholars have long been conscious of their importance Instead of insisting upon the diversity of agents involved in these organizations it also puts some emphasis on the importance of the linkages and sharing between them and suggests some orientations in view of a performing evaluation system

Sharing Territories Cara Nine, 2022-03-24 In *Sharing Territories* Cara Nine defends a river model of territorial rights On a river model groups are assumed to be interdependent and overlapping If we imagine human settlements and territorial rights as established in river catchment areas not on lands with walls and borders the primary features of group life are not independence and distinctness Drawing on natural law philosophy Nine s theory argues for the establishment of foundational territories around geographical areas like rivers Usually lower scale political entities foundational territories overlap with and serve as the grounding blocks of larger territorial units Examples of foundational territories include not only river catchment areas but also urban areas drawn around individuals who hold obligations to collectively manage their surroundings Foundational territorial authorities manage spatially integrated areas where agents are interconnected by dense and scaffolded physical circumstances In these areas individuals cannot fulfil their natural obligations to each other without the help of collective rules As foundational territories overlap the territories of other political units Nine frames a theory of nested and shared

territorial rights and argues for insightful changes to the allocation of resource rights between political groups and individuals
