Handbook of Prevention Science Beth Doll,William Pfohl,Jina S. Yoon,2012-03-07 Prevention research has traditionally focused on preventive interventions tied to specific disorders e g substance abuse conduct disorders or criminality This produced silos of isolated knowledge about the prevention of individual disorders but not about interventions that work across disorders This handbook is the first to comprehensively describe current research and practice in mental health prevention programs that is organized around comprehensive prevention systems that reach across all disorders and all institutions within a community Throughout the book preventive interventions are seen as a necessary component of effective mental health programs not as a replacement for therapeutic interventions Provided by publisher

Bulletproofing the Psyche Kate Hendricks Thomas, David L. Albright Ph.D., 2018-05-03 This book presents the latest in neuroscience and resiliency research alongside the personal stories of military veterans to advocate for an empirically validated training protocol In Bulletproofing the Psyche Preventing Mental Health Problems in Our Military and Veterans editors Kate Hendricks Thomas and David L Albright lead an interdisciplinary team of researchers practitioners and military veterans in calling for a new kind of training with a focus on bulletproofing the psyche psychological resiliency skills training They combine research and storytelling to argue that somatic protocols a training method long used in the treatment sector to rewire the brain after trauma and a proven valid alternative to drug and talk therapy should be applied to the prevention and training sectors Contributors include leaders in the fields of trauma research military social work and veterans health Students and scholars in the fields of social work military psychology social psychology health promotion organizational development and institutional organization will find the research relevant while clinicians counselors and mental health care providers working with military connected communities may find the discussion of trauma treatment and intervention model transformative for their practice

Experimental Psychology: Quantitative experiments: pt. 1. Students' manual Edward Bradford Titchener, 1905 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments

of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database Record c 2005 APA all rights reserved
