work he gave a speech entitled The American Scholar in 1837 which Oliver Wendell Holmes Sr considered to be America's intellectual Declaration of Independence. Emerson wrote most of his important essays as lectures first and then revised them for print. His first two collections of essays, *Essays First Series* (1841) and *Essays Second Series* (1844), represent the core of his thinking. They include the well-known essays "Self-Reliance," "The Over-soul," "Circles," "The Poet," and "Experience." Together with "Nature," these essays made the decade from the mid-1830s to the mid-1840s Emerson's most fertile period. Emerson wrote on a number of subjects, never espousing fixed philosophical tenets but developing certain ideas such as individuality, freedom, the ability for humankind to realize almost anything, and the relationship between the soul and the surrounding world. Emerson's nature was more philosophical than naturalistic. Philosophically, he considered the universe to be composed of Nature and the Soul. Emerson is one of several figures who took a more pantheist or pandeist approach by rejecting views of God as separate from the world. He remains among the linchpins of the American romantic movement, and his work has greatly influenced the thinkers, writers, and poets that followed him. When asked to sum up his work, he said his central doctrine was the infinitude of the private man. Emerson is also well known as a mentor and friend of Henry David Thoreau, a fellow transcendentalist.
