Canonizing Hypertext Astrid Ensslin, 2007-07-09 This innovative monograph focuses on a contemporary form of computer based literature called literary hypertext a digital interactive communicative form of new media writing Canonizing Hypertext combines theoretical and hermeneutic investigations with empirical research into the motivational and pedagogic possibilities of this form of literature It focuses on key questions for literary scholars and teachers How can literature be taught in such a way as to make it relevant for an increasingly hypermedia oriented readership How can the rapidly evolving new media be integrated into curricula that still seek to transmit traditional literary competence How can the notion of literary competence be broadened to take into account these current trends This study which argues for hypertext s integration in the literary canon offers a critical overview of developments in hypertext theory an exemplary hypertext canon and an evaluation of possible classroom applications

Reading Writing Interfaces Lori Emerson, 2014-06-01 Lori Emerson examines how interfaces from today s multitouch devices to yesterday s desktops from typewriters to Emily Dickinson s self bound fascicle volumes mediate between writer and text as well as between writer and reader Following the threads of experimental writing from the present into the past she shows how writers have long tested and transgressed technological boundaries Reading the means of production as well as the creative works they produce Emerson demonstrates that technologies are more than mere tools and that the interface is not a neutral border between writer and machine but is in fact a collaborative creative space Reading Writing Interfaces begins with digital literature s defiance of the alleged invisibility of ubiquitous computing and multitouch in the early twenty first century and

then looks back at the ideology of the user friendly graphical user interface that emerged along with the Apple Macintosh computer of the 1980s She considers poetic experiments with and against the strictures of the typewriter in the 1960s and 1970s and takes a fresh look at Emily Dickinson s self printing projects as a challenge to the coherence of the book Through archival research Emerson offers examples of how literary engagements with screen based and print based technologies have transformed reading and writing She reveals the ways in which writers from Emily Dickinson to Jason Nelson and Judd Morrissey work with and against media interfaces to undermine the assumed transparency of conventional literary practice

Close Reading New Media Jan van Looy, Jan Baetens, 2003 *Close Reading New Media* is the first publication to apply the method of close analysis to new media Since the early nineteen nineties electronic art and literature have continually gained importance in artistic and academic circles Significant critical and theoretical attention has been paid to how new media allow the text to break traditional power relations and boundaries The passive reader becomes an active participant choosing his own path and assembling not just his own interpretation of the text level of the signified but also his own text level of the signifier Texts no longer have a beginning or an ending being a web of interlinked nodes The decentered nature of electronic text empowers and invites the reader to take part in the literary process Poststructuralist theorists predicted a total liberation of textual restrictions imposed by the medium of print However while these are culturally significant claims little attention has been paid to their realization The goal of this volume is twofold Our aim is to shed light on how ideas and theories have been translated into concrete works and we want to comment on the process of close reading and how it can be applied to electronic literature

While all contributions deal with particular works their aim is always to provide insight into how electronic fiction and new media can be read This book proposes close readings of work by Mark Amerika Darren Aronofsky M D Coverley Raymond Federman Shelley Jackson Rick Pryll Geoff Ryman and Stephanie Strickland *Excel Essential Skills* Derek Lewis,2004
