Rud, 2018-03-06 School lunch is often regarded as a necessary but inconvenient distraction from the real work of education Lunch in this view is about providing students the nourishment they need in order to attend to academic content and the tests that assess whether content has been learned In contrast the central purpose of this collection is to examine school lunch as an educational phenomenon in its own right Contributing authors drawing from a variety of disciplinary traditions including philosophy sociology and anthropology examine school lunch policies and practices social and cultural aspects of food and eating and the relation among school food the environment and human and non human animal well being The volume also addresses how school lunch might be more widely conceptualized and practiced as an educational undertaking

Knowledge and Power in the Global Economy David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will

only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

The Politics of Inquiry Benjamin Baez, Deron Boyles, 2009-01-09 Winner of the 2010 Critics Choice Award presented by the American Educational Studies Association 2009 CHOICE Outstanding Academic Title In *The Politics of Inquiry* Benjamin Baez and Deron Boyles critique recent trends in education research to argue against the culture of science Using the National Research Council s 2002 report *Scientific Research in Education* as a point of departure they contend that the entire discourse on education science reflects a number of distinct but mutually constitutive political forces or movements that use science and education to shape what we can think and thus what we can become These forces include the attempts to restrict democracy via scientism the uses of academic classifications for organizing the world into social groups the imperatives of the informational society which seek precision in order to convert the world into data for easy governing and the effects of transnational capitalist exchanges which convert everything into a cost benefit analysis and which make us all complicit in ways we do not fully grasp Baez and Boyles examine these forces and offer an alternative to the current pushes to make educational inquiry scientific
