Second Language Acquisition And Linguistic Variation Studies In Bilingualism No 1:

Second Language Acquisition and Linguistic Variation Robert Bayley, Dennis Richard Preston, 1996-01-01 This volume corrects the relative neglect in Second Language Acquisition studies of the quantitative study of language variation and provides insights into such issues as language transfer acquisition through exposure language universals learner's age and so forth These studies bolster the idea that a full account of SLA development and hence a theory of SLA must be built on not only detailed accounts of interlanguage data but also on a wide appeal to factors which govern the psycholinguistic bases of SLA An important addition to the volume is a comprehensive guide to both the DOS and Macintosh versions of the VARBRUL statistical program used by variationists

Resources in Education, 1995-12 **The Acquisition of Spanish as a Second Language** Kimberly L. Geeslin, Avizia Y. Long, Megan Solon, 2021-04-22 This volume offers an introduction to the field of second language acquisition with a particular focus on second language Spanish It connects key issues in the acquisition of Spanish as a second language to theoretical and empirical issues in the field of second language acquisition more generally by exemplifying central concepts in second language acquisition through the exploration of the most widely researched structures and most recent developments in the field of second language Spanish It is written for a non specialist audience making it suitable for advanced undergraduate and graduate courses and readers while its treatment of recent empirical developments also makes it of interest to researchers in second language Spanish as well as allied fields

Neurolinguistic and Psycholinguistic Perspectives on SLA Janusz Arabski, Adam Wojtaszek, 2010 Neurolinguistic and Psycholinguistic Perspectives on SLA is a collection of twelve chapters reporting on research results and presenting theoretical insights into the processes of language acquisition The first part outlines the neurobiological processes which assist formation of additional language in the brain while the second part offers psycholinguistic modelling of a number of components of second language competence

Second Language Acquisition and Lifelong Learning Simone E. Pfenninger, Julia Festman, David Singleton, 2023-05-05 Language fundamentally defines and distinguishes us as humans as members of society and as individuals As we go through life our relationship with language and with learning shifts and changes but it remains significant This book is an up to date resource for graduate students and researchers in second language L2 acquisition who are interested in language learning across the lifespan The main goal is to survey and evaluate what is known about the linguistic cognition affect associations that occur in L2 learning from birth through senescence passing through the stages of childhood adolescence adulthood and third age the extent to which L2 acquisition may be seen as contributing to healthy and active aging the impact of the development of personalized technology enhanced communicative L2 environments and how these phenomena are to be approached scientifically and methodologically The effects of certain specific variables such as gender socio economic background and bilingualism are also analyzed as we argue that chronological age does not determine the positioning of L2 learners across the lifespan age is part of a complex

web of social distinctions such as psychological and individual factors that intersect in the construction of a learner's relative status and opportunities

This volume offers a vast array of topics ranging from the history of teaching to technological and literacy issues. In each authoritative chapter, the authors summarize the state of the field while providing conceptual overviews of critical topics related to research on teaching. Each of the volume's 23 chapters is a canonical piece that will serve as a reference tool for the field. The Handbook provides readers with an unparalleled view of the current state of research on teaching across its multiple facets and related fields.

Dynamics of L2 Sociolinguistic Development in Adulthood Mason A. Wirtz, 2025-04-17 This book constitutes a holistic study of sociolinguistic development among adult second language (L2) learners in a naturalistic setting. Combining results from a cross-sectional and longitudinal micro-development study, it examines the acquisition of both the productive and interpretive skills necessary to engage with the contextually sensitive use of vernacularity in Austria. The studies focus on issues of inter- and intra-individual variation and aim to shed much-needed light on why L2 learners acquire sociolinguistic variation, which aspects of it they acquire, which factors influence it, and when they acquire it. Drawing on methodological and theoretical frameworks from diverse fields such as developmental and cognitive psychology, psycho- and sociolinguistics, as well as second language acquisition, the book connects topics rarely found in the same empirical piece, including the role of cognitive functioning and socioaffective factors, the temporal specificity of L2 sociolinguistic development in production and perception, and the issue of group to individual generalizability. The studies showcased in this work provide ample evidence that late starters of a L2 in early adulthood and midlife can acquire the skills necessary to successfully navigate the complex sociolinguistic variation within the target language community, but the process is certainly not one without hurdles.

Beyond Age Effects in Instructional L2 Learning Simone E. Pfenninger, David Singleton, 2017-04-21 This book constitutes a holistic study of how and why late starters surpass early starters in comparable instructional settings. Combining advanced quantitative methods with individual-level qualitative data, it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school, thereby offering a long-term view of the teenage experience of foreign language learning. The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly. Taking account of contextual factors, individual socio-affective factors, and instructional factors within a single longitudinal study, the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition, but that in this context, for a number of reasons, a later onset can be beneficial.

Introduction to Bilingualism Charlotte Hoffmann, 2014-09-25 An Introduction to Bilingualism provides a comprehensive

review of the most important aspects of individual and societal bilingualism examining both theoretical and practical issues. At the level of the individual it addresses such questions as: What is involved in the study of bilingual children? What are the patterns of bilingual language acquisition? In which ways do the language competence and the speech of bilinguals differ from those of monolinguals? Topics that sometimes arouse controversy are explored such as the question of whether there is a relationship between bilingualism and a child's cognitive, psychological and social development. The book is also concerned with multilingualism that is bilingualism as a societal phenomenon. It focuses on such issues as language choice in bilingual and multilingual communities, national identity and the education of bilinguals. The inclusion of several case studies of European linguistic minorities serves to exemplify the topics dealt with at the theoretical level and to illustrate the linguistic complexities found in contemporary Europe.
