SAM Jonathan Waldman,2021-01-26 A true story of innovation that reads like a movie Seth Godin centered on a scrappy team of engineers far from the Silicon Valley limelight and their quest to revolutionize the traditional trade of masonry by building a robot that can lay bricks Humans have landed men on the moon programmed cars to drive themselves and put the knowledge of our entire civilization in your back pocket But no one from MIT nerds to Army Corps engineers has ever built a robot that can lay bricks as well as a mason Unlike the controlled conditions of a factory line where robots are now ubiquitous no two construction sites are alike and a day s work involves countless variables bricks that range in size and quality temperamental mortar mixes uneven terrain fickle weather and moody foremen Twenty five years ago on a challenging construction job in Syracuse architect Nate Podkaminer had a vision of a future full of efficient automated machines that freed bricklayers from the repetitive toilsome burden of lifting in bricks the equivalent of a Ford truck every few days Offhandedly he mentioned the idea to his daughter s boyfriend and after some inspired scheming the architect and engineer soon to be in laws cofounded a humble start up called Construction Robotics Working out of a small trailer they recruited a boldly unconventional team of engineers to build the Semi Automated Mason SAM In classic American tradition a small unlikely and eccentric family run start up sought to reimagine the behemoth 1 trillion construction industry the second biggest industry in America in bootstrap fashion In the tradition of Tracy Kidder s *The Soul of a New Machine* SAM unfolds as an engineering drama full of trials and setbacks heated showdowns between meticulous scientists and brash bricklayers and their even more opinionated union and hard earned milestone achievements Jonathan Waldman acclaimed author of *Rust*
