Future War John B. Alexander, 2010-04-01 The nature of warfare has changed Like it or not terrorism has established a firm foothold worldwide Economics and environmental issues are inextricably entwined on a global basis and tied directly to national regional security Although traditional threats remain new shadowy and mercurial adversaries are emerging and identifying and locating them is difficult Future War based on the hard learned lessons of Bosnia Haiti Somalia Panama and many other trouble spots provides part of the solution Non lethal weapons are a pragmatic application of force not a peace movement Ranging from old rubber bullets and tear gas to exotic advanced systems that can paralyze a country they are essential for the preservation of peace and stability Future War explains exactly how non lethal electromagnetic and pulsed power weapons the laser and tazer chemical systems computer viruses ultrasound and infrasound and even biological entities will be used to stop enemies These are the weapons of the future

Reading Programs for Young Adults Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs

intrusions into computer systems are being perpetrated by strangers and the number of such incidents is rising steadily One of the things that facilitates this malfeasance is that computer networks provide the ability for a user to log into multiple computer systems in sequence changing identity with each step This makes it very difficult to trace actions on a network of computers all the way back to their actual origins We refer to this as the tracing problem This thesis attempts to address this problem by the development of a technology called thumbprinting Thumbprinting involves forming a signature of the data in a network connection This signature is a small quantity which does not allow complete reconstruction of the data but does allow comparison with signatures of other connections to determine with reasonable confidence whether the data were the same or not This is a potential basis for a tracing system The specific technology developed to perform this task is local thumbprinting This involves forming linear combinations of the frequencies with which different characters occur in the network data sampled The optimal linear combinations are chosen using a statistical methodology called principal component analysis The difficulties which this process must overcome are outlined and an algorithm for comparing the thumbprints which adaptively handles these difficulties is presented A number of experiments with a trial implementation of this method are described The method is shown to work successfully when given at least a minute and a half of reasonably active network connection This requires presently about 20 bytes per minute per connection of storage for the thumbprints In addition the existing very limited literature on the tracing problem is reviewed
