Theory, the Heat Equation, and the Atiyah-Singer Index Theorem Peter B. Gilkey, 1984 This book treats the Atiyah-Singer index theorem using the heat equation which gives a local formula for the index of any elliptic complex Heat equation methods are also used to discuss Lefschetz fixed point formulas the Gauss-Bonnet theorem for a manifold with smooth boundary the geometrical theorem for a manifold with smooth boundary The author uses invariance theory to identify the integrand of the index theorem for classical elliptic complexes with the invariants of the heat equation [Topological](#)

[Methods in Algebraic Geometry](#) Friedrich Hirzebruch, 1995-02-15 In recent years new topological methods especially the theory of sheaves founded by J LERAY have been applied successfully to algebraic geometry and to the theory of functions of several complex variables H CARTAN and J P SERRE have shown how fundamental theorems on holomorphically complete manifolds STEIN manifolds can be formulated in terms of sheaf theory These theorems imply many facts of function theory because the domains of holomorphy are holomorphically complete They can also be applied to algebraic geometry because the complement of a hyperplane section of an algebraic manifold is holomorphically complete J P SERRE has obtained important results on algebraic manifolds by these and other methods Recently many of his results have been proved for algebraic varieties defined over a field of arbitrary characteristic K KODAIRA and D C SPENCER have also applied sheaf theory to algebraic geometry with great success Their methods differ from those of SERRE in that they use techniques from differential geometry harmonic integrals etc but do not make any use of the theory of STEIN manifolds M F ATIYAH and W V

D HODGE have dealt successfully with problems on integrals of the second kind on algebraic manifolds with the help of sheaf theory I was able to work together with K KODAIRA and D C SPENCER during a stay at the Institute for Advanced Study at Princeton from 1952 to 1954

Index Theory and Operator Algebras Jeffrey Stephen Fox, Peter Haskell, 1993 This collection of papers by leading researchers provides a broad picture of current research directions in index theory Based on lectures presented at the NSF CBMS Regional Conference on K Homology and Index Theory held in August 1991 at the University of Colorado at Boulder the book provides both a careful exposition of new perspectives in classical index theory and an introduction to currently active areas of the field Presented here are two new proofs of the classical Atiyah-Singer Index Theorem as well as index theorems for manifolds with boundary and open manifolds Index theory for semi-simple p-adic groups and the geometry of discrete groups are also discussed Throughout the book the application of operator algebras emerges as a central theme Aimed at graduate students and researchers this book is suitable as a text for an advanced graduate course on index theory
