Shaping Our Environmental Conscience:

Shaping Our Environmental Conscience Gary Cochran,1995-09 **The European Environmental Conscience in the EU** Marjorie Tendero,Christoph Weber,2025-02-17 This book analyses how sustainability affects internal decision making within the European Union and its external relations in working towards achieving its long term goal of a climate neutral Europe by 2050 Applying the term European environmental conscience as the perception of environmental degradation leading to a growing public awareness of the issues a notion of common responsibility and European institutions dealing with these growing concerns the book investigates its emergence as a lever for deeper European integration and in fostering a genuine European identity Examining policy areas such as green finance innovation policies and foreign policy it reveals the impact these concerns have for other policy fields This book is of key interest to scholars and students of environmental economics and politics sustainability governance green finance climate policy energy policy and more broadly to European studies and international relations Environmental Awareness and the Design of Literature François Specq,2016-10-05 *Environmental Awareness and the Design of Literature* offers analyses of the diverse ways in which literature helps us escape the rigid frames of commonly assumed worldviews and modes of seeing Literary works are endowed with a capacity not only to reflect or to mediate but to resist our environment and thus to affect and transform our relation to the physical world Each essay points to the way literature shapes the human perception of environment as intellectual adventures and forays that draw upon a number of historical aesthetic philosophical and phenomenological stances **Environmental Consciousness, Nature and the Philosophy of Education** Michael Bonnett,2020-12-30 This book explores alternative ways of understanding our environmental situation by challenging the Western view of nature as purely a resource for humans *Environmental Consciousness Nature and the Philosophy of Education* asserts that we need to retrieve a thinking that expresses a different relationship with nature one that celebrates nature s otherness and is attuned to its intrinsic integrity agency normativity and worth Through such receptivity to nature s address we can develop a sense of our own being in nature that provides a positive orientation towards the problems we now face Michael Bonnett argues that this reframing and rethinking of our place in nature has fundamental implications for education as a whole questioning the idea of human stewardship of nature and developing the idea of moral education in a world of alterity and non rational agents Drawing on and revising work published by the author over the last 15 years this book will be essential reading for students and scholars of environmental studies environmental education and the philosophy of education *Environmental Awareness and Governance* Mohamed Mliless,David Stringer,Mohammed Larouz,2025-09-04 *Environmental Awareness and Governance Ecolinguistic and Discourse Perspectives* is a comprehensive exploration that delves into the intricate relationship between language discourse and environmental issues This book begins by examining the role of environmental governance in Moroccan political parties electoral programs followed by an analysis of how Moroccan online media

communicates water stress as a risk issue It also provides an ecolinguistic analysis of a computer animated Netflix film The Sea Beast and discusses the impact of climate change on Moroccan agriculture particularly focusing on the Generation Green strategy The editors and contributors explore the role of translation in the environmental movement and discusses the shift from the Anthropocene to the Capitalocene in the context of global climate change They also provide a critical discourse analysis of the environmental discourse of the COP27 highlighting the North South divide The latter part of this book focuses on environmental literacy and awareness among students and also examines the environmental awareness of Moroccan university students and its impact on their environmental practices The book further discusses the role of visual language in environmental representation using Moroccan cinema as a case study It explores the intersection of language translation and posthumanism focusing on cross species interaction in Margaret Atwood s trilogy This book concludes with an ecocritical interpretation of solastalgia in Mohsin Hamid s Exit West and a generic ecocritical reading of climate change in Kim Stanley Robinson s Science in the Capital Trilogy Each chapter provides a unique perspective on environmental issues making it a comprehensive resource for anyone interested in environmental studies

Taking Shape: A New Contract Between Architecture and Nature Susannah Hagan,2007-08-22 Taking Shape explores the evolution of scientific and academic theories that have resulted in the concept of sustainability Susannah Hagan uses this as a basis to argue for developments in the future and argues that these theories are not just an intellectual and aesthetic regression as they are often perceived to be By focusing on the impact of the new theories of sustainable technology and new materials in architecture Hagan moves the discourse and practice of environmental sustainability within architecture towards a greater degree of awareness of both its cultural significance and cultural potential In short it demonstrates the capacity of sustainable architecture to embrace cultural and technical innovation

Environmental Awareness and the Role of Social Media Narula, Sumit,Rai, Swapnil,Sharma, Archana,2018-07-27 Social media has quickly become one of the most effective tools in reaching masses of people As environmental issues are becoming more prevalent and frequently acknowledged social media is playing an important role in sharing various environmental problems as well as suitable solutions Environmental Awareness and the Role of Social Media is an essential reference source for individuals seeking to raise awareness of environmental issues through social media platforms The book examines social media s use in disaster awareness sustainability promotion and marketing environmentally friendly products from an international perspective This book is an excellent resource for environmentalists environmental activists scientists public figures policy makers academicians and individuals interested in research focused on the impact of social media on issues that affect the entire planet

Environmental Consciousness and the Nine Schools of Indian Philosophy Vandana Sharma Diya,2023-09-28 This book presents an analytical exposition of the Nine Schools of Indian philosophy extrapolating Environmental Ethics from the profound metaphysics of these Nine Schools which serve as the cornerstone of a life lived in wisdom This book uses the popular contemporary word Environment with the meaning expounded by the Vedic texts Therefore it includes the internal external and cosmic states of all the creatures of the world and relates them to the universal laws of creation preservation and annihilation of every existence following the path of the cosmic order R ta It

argues that realization of the fact that all entities in the world are illuminated by the same Universal Spirit is also necessary. While the book emphasizes the external environmental woes of the world such as deforestation, animal cruelty, pollution, climate change, and more, it also underscores that these are merely manifestations of humans' internal perverted environmental states. Thus, humankind should not look at external issues that are limited and temporary but should focus on the longer-lasting internal transformation.

Expanding Environmental Awareness in Education Through the Arts Biljana C. Fredriksen, Camilla Groth, 2022-11-25. This book presents diverse processes of crafting that bring humans more than humans and the environment closer to one another and by doing so addresses personal and educational developments towards ecological awareness. It discusses the human-material relationship, introduces posthuman theoretical entry points, and reflects on the implementation of such theoretical perspectives in education. The practical examples of crafting with the environment, the material practices, and reflections posed in the book provide insights into possible ways of levelling out human and material hierarchies. The chapters of this book give examples of artists and craftspeople's processes of thinking through materials and with materials but also their reflections on how more than humans, animals, and plants craft from available materials and how the environment and landscapes re-craft themselves through tedious processes of transformation. These case examples are founded on the authors' own experiences with phenomena they are trying to understand and critically explore. This book is of interest to professional creative practitioners, art and craft educators, art teacher educators, or researchers in the field of creative practices. It has power to inspire rethinking of present educational practices, to ignite critical reflections about materials and more than humans, and hopefully motivate transformations toward more ecologically sustainable ways of life.

Environmental Debates in Albania Deniz Çupi, 2023-09-30. This book investigates the role played by classical and digital media and social networks in shaping debates on the environment. Providing a unique window of observation on environmental debates, the book explores the media theatre from the post-communist perspective of Albania. The work navigates the creation and development of environmental debate in Albania using evidence-based case studies investigating the role of actors involved who are closely related to the media, such as in business or politics. *Environmental Debates in Albania* offers an original insight on environmental debate which is closely tied to and influenced by the place and culture within which it originates. Rich literature exists on global environmental issues, protests, policy, and the rhetoric around climate change; this book supplies another piece to the puzzle through its focus on the under-researched area of environmental debate in post-communist and Eastern European countries.
