Loretta Fowler

Shared Wealth And Symbol:

Shared Wealth and Symbol Lenore Manderson, 1986-12-26 This 1987 volume brought together for the first time a range of essays on the anthropology of food in Oceania and Southeast Asia. The essays reflect research in the field primarily that undertaken by Australian scholars. The volume focuses on four main concerns: factors that influence the production of food and dietary behaviour; the way in which people think and speak about diet and nutrition; including concepts of hunger and the classification of foods; infant feeding practice; including the promotion of bottle feeding and the roles of government agencies and multinational corporations. The regional focus of the volume also allows for discussion of common trends, especially those that have arisen as a result of societies in the region having been incorporated into the world economy. Applicable elsewhere in the world, the volume offers a basis for a comparative analysis of food in culture and society. **Shared Symbols,**

Contested Meanings Loretta Fowler, 2018-08-06 Fort Belknap reservation in Montana is home to both the Gros Ventre and Assiniboiné Indian tribes. The two thousand inhabitants of the reservation recognize an array of symbols: political, ritual, and sacred, which have meaning and emotional impact for all. Yet there is sharp disagreement between the two tribes and among the various age groups about the interpretation of these symbols. Anthropologist Loretta Fowler here examines the history and culture of the Gros Ventres over two centuries, seeking to discover why the residents of Fort Belknap ascribe different and often opposing meanings to their shared cultural symbols and how these differences have influenced Gros Ventre identity. *The Anthropology of Food and Body* Carole M. Counihan, 2018-10-24

The Anthropology of Food and Body explores the way that making, eating, and thinking about food reveal culturally determined gender power relations in diverse societies. This book brings feminist and anthropological theories to bear on these provocative issues and will interest anyone investigating the relationship between food, the body, and cultural notions of gender. *The Essence of Japanese Cuisine*

Michael Ashkenazi, Jeanne Jacob, 2013-10-11 The past few years have shown a growing interest in cooking and food as a result of international food issues such as BSE, world trade, and mass foreign travel, and at the same time there has been growing interest in Japanese studies since the 1970s. This volume brings together the two interests of Japan and food, examining both from a number of perspectives. The book reflects on the social and cultural side of Japanese food and at the same time reflects also on the ways in which Japanese culture has been affected by food, a basic human institution. Providing the reader with the historical and social bases to understand how Japanese cuisine has been and is being shaped, this book assumes minimal familiarity with Japanese society but instead explores the country through the topic of its cuisine.

Seeking out the Land: Land of Israel Traditions in Ancient Jewish, Christian and Samaritan Literature (200 BCE - 400 CE) Ze'ev Safrai, 2018-05-07 *Seeking out the Land* describes the study of the Holy Land in the Roman period and examines the complex connections between theology, social agenda, and the intellectual pursuit. Holiness as a theological concept determines the intellectual agenda of the elite society of writers seeking to describe the land as well as their

preoccupation with its physical aspects and their actual knowledge about it Ze'ev Safrai succeeds in examining all the ancient monotheistic literature both Jewish and Christian up to the fourth century CE and in demonstrating how all the above mentioned factors coalesce into a single entity We learn that in both religions with all their various subgroups the same social and religious factors were at work but with differing intensity

Shared Idioms, Sacred Symbols, and the Articulation of Identities in South Asia Kelly Pemberton, Michael Nijhawan, 2009-01-13 This work focuses on processes of articulating identity The notions of shared idioms and sacred symbols shaping this volume suggest both a search for common ground and boundary drawing processes Individual chapters locate sites of these modes and the conditions that engender them problematizing the truth claims of unitary markers of identity

Cultures of Currencies Joan Ramon Resina, 2022-03-10 This book's premise is not only the commonly accepted cultural relativity of economic concepts but also the observation that the current shift in the meaning of concepts like market currency exchange and money suggests that culture is undergoing a change with unpredictable economic and political consequences The essays in the book raise basic questions concerning exchange what is exchanged who exchanges and how which kind of currency is used and indeed what is money and how does it convey and retain value over time These issues are all classical objects of economic theory but less often have they been approached from a cultural perspective Works treating economic and monetary issues from a cultural perspective are few and far apart and this book aims to contribute to such a perspective with a variety of approaches

American Babylon Robert O. Self, 2005-08-08 A gripping portrait of black power politics and the struggle for civil rights in postwar Oakland As the birthplace of the Black Panthers and a nationwide tax revolt California embodied a crucial motif of the postwar United States the rise of suburbs and the decline of cities a process in which black and white histories inextricably joined American Babylon tells this story through Oakland and its nearby suburbs tracing both the history of civil rights and black power politics as well as the history of suburbanization and home owner politics Robert Self shows that racial inequities in both New Deal and Great Society liberalism precipitated local struggles over land jobs taxes and race within postwar metropolitan development Black power and the tax revolt evolved together in tension American Babylon demonstrates that the history of civil rights and black liberation politics in California did not follow a southern model but represented a long term struggle for economic rights that began during the World War II years and continued through the rise of the Black Panthers in the late 1960s This struggle yielded a wide ranging and profound critique of postwar metropolitan development and its foundation of class and racial segregation Self traces the roots of the 1978 tax revolt to the 1940s when home owners real estate brokers and the federal government used racial segregation and industrial property taxes to forge a middle class lifestyle centered on property ownership Using the East Bay as a starting point Robert Self gives us a richly detailed engaging narrative that uniquely integrates the most important racial liberation struggles and class politics of postwar America

Theoretical Sociology Seth Abrutyn, Kevin McCaffree, 2021-03-30 Since Durkheim's influential work a century ago sociological theory has been among the most integrative and useful tools for social scientists across many disciplines Sociological theory has nevertheless due to its usefulness expanded so very broadly that some wonder whether the concept of general theory or even the attempt to link middle range theories is still of any use This book a collection of top theorists reflecting on the present and future of the craft

addresses this most important question Taking their lead from Jonathan Turner s important recent work and drawing on their own broad experience Seth Abrutyn and Kevin McCaffree have organized the chapters in this book from the general integrative and review focused bookend chapters to more specific chapters on innovations in theory construction at the micro meso and macro levels Moreover the book s microsociological content on interpersonal violence solidarity identity and emotion coheres with chapters in mesosociological dynamics on class education and networks which in turn integrate with the chapters on inequality justice morality and cultural evolution found in the section on macrosociology The distinguished contributors share a distinct commitment to the development innovation and relevance of general sociological theory This volume is an invaluable sourcebook for advanced students and social science faculty interested in understanding how sociological theory s past and present are informing its future *Annual Report - Research School of Pacific Studies*

Research and Publications ,1984 **The History of Money and Monetary Arrangements** Thomas

Marmefelt,2018-08-30 Today most money is credit money created by commercial banks While credit can finance innovation excessive credit can lead to boom bust cycles such as the recent financial crisis This highlights how the organization of our monetary system is crucial to stability One way to achieve this is by separating the unit of account from the medium of exchange and in pre modern Europe such a separation existed This new volume examines this idea of monetary separation and this history of monetary arrangements in the North and Baltic Seas region from the Hanseatic League onwards This book provides a theoretical analysis of four historical cases in the Baltic and North Seas region with a view to examining evolution of monetary arrangements from a new monetary economics perspective Since the objective exchange value of money its purchasing power reflects subjective individual valuations of commodities the author assesses these historical cases by means of exchange rates Using theories from new monetary economics the book explores how the units of account and their media of exchange evolved as social conventions and offers new insight into the separation between the two Through this exploration it puts forward that money is a social institution a clearing device for the settlement of accounts and so the value of money or a separate unit of account ultimately results from the size of its network of users The History of Money and Monetary Arrangements offers a highly original new insight into monetary arrangements as an evolutionary process It will be of great interest to an international audience of scholars and students including those with an interest in economic history evolutionary economics and new monetary economics

We Are the Economy Kai Romhardt,2020-07-14 A no nonsense Zen approach to our economic realities can change everything and help us regain our freedom Is it possible to be personally fulfilled and also make a difference within our current financial system If you re skeptical business coach and Zen practitioner Kai Romhardt proposes a minimalist awareness based strategy that totally reconfigures our core economic relationships work consumption and money How do we do that We need to pause breathe and get in touch with our true intentions Too often we think of the economy as something outside of us as beyond the scope of our individual choices We re unhappy with how things are going with unthinking growth that polarizes our world and condenses wealth at the top but we don t know what to do Romhardt argues that individuals who wield a sharp Buddhist mindset can in fact create change through personal decisions when we can see in to society and in to our constructs we become empowered to choose deeply real and purposeful lives
