A Human Values Pathway for Teachers Suma

Parahakaran, Stephen Scherer, 2021-03-19 This book combines perspectives from psychology spiritual education and digital teaching pedagogies in a transnational framework to discuss the Education in Human Values Program EHV for child development with a focus on silent sitting mindfulness meditation and story telling as tools in the classroom Through positive guidance in the early stages of child development using EHV tools teachers will be better equipped to handle disciplinary issues in primary and secondary schools These practices are also useful for the higher education community as teachers and educators from tertiary institutions may adopt these practices in their teaching and become reflective practitioners Topics such as teacher morale and school climate and its impact on children are discussed in relation to building resilience reflective capacities and inner strength shared values using an intrinsic and transformational approach The discussions also include perspectives from the neurosciences With contributions from teachers and educators from the US South Africa Malaysia Australia Hong Kong and Mauritius this edited volume addresses the challenges strengths and weaknesses associated with daily teaching practices in primary and secondary schools and higher education institutions The content is

relevant to policymakers and researchers in child development studies with a particular focus on the impact of silent sitting mindful practices and meditation on children's self regulation and resilience The authors collectively espouse that silent sitting techniques can help a child to grow and discover their hidden potential thus enhancing their social emotional spiritual and physical capacities Differentiating for the Young Child Joan Franklin Smutny, S.E. von Fremd, 2004-03-18

Differentiating for the Young Child is designed to help primary teachers cope with the increase of diverse knowledge sets and different learning styles This book addresses early identification by using differentiation and offers strategies and methods for intellectual discovery and creative thinking It tackles issues relating to undeserved students emphasizes key discipline areas and discusses differentiated technology use Forms charts samples and appendices are included throughout the book to help general education teachers apply the material to their classrooms This book to inspire educators to move in new directions to meet the diverse needs of young students *A Child's Place in the Environment: Caring for aquatic systems* Olga N. Clymire, 1996 **Project Learning Tree**, 1994 *International Handbook of Research on Environmental Education* Robert B. Stevenson, Michael Brody, Justin Dillon, Arjen E.J. Wals, 2013-05-02 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA *The Sustainability Communication Reader* Franzisca Weder, Larissa Krainer, Matthias Karmasin, 2021-03-12 The Textbook seeks for an innovative approach to Sustainability Communication as transdisciplinary area of research Following the United Nations Sustainable Development Goals which are intended to transform the world as it is known we seek for a multidisciplinary discussion of the role communication plays in realizing these goals With complementing theoretical approaches and concepts the book offers various perspectives on communication practices and strategies on an individual organizational institutional as well as public level that contribute enable or hinder sustainable development Presented case studies show methodological as well as issue specific challenges in sustainability communication Therefore the book introduces and promotes innovative methods for this specific area of research *Reforming Teaching and Teacher Education* Eija Kimonen, Raimo Nevalainen, 2017-03-21 What are the prerequisites for reforming education and how can these reforms be seen in school development and culture How should teacher education support this reform process What are the principles and practices underlying the functioning of the schools of tomorrow These questions are examined in this unique

volume The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty first century According to this approach the competencies and skills needed in the future are not merely a new addition to school activities but rather something requiring a comprehensive reform of school culture encompassing teacher education curricula and teaching methods Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation the result of which would be schools developing into organizations that are both creative and imbued with a strong sense of community A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out of school environments This would link learning to its natural context eventually leading to an ideal instruction that is actively problem oriented holistic and life centered This reform minded volume is divided into three parts The first part focuses on the reform processes in teacher education the second on the reforms of pedagogics at schools and teacher education institutions and the third on the processes of reculturing schools New prospects for active schools in the United States and Europe as well as in Japan and China are discussed *A Child's Place in the Environment: Achieving a sustainable community* Olga N. Clymire,1996 *Parents' Guide to Hiking & Camping* Alice Cary,1997 Offers strategies for safe fun hiking backpacking cycling canoeing and camping and discusses family adventure gear campsite fundamentals age specific activities and related topics
