**Shatter Zone** James Axler, 2014-01-15 BLASTED EDEN Scattered remains have been salvaged from the abandoned cities that withstood the atomic onslaught at the dawn of the twenty first century but the secrets of pre Dark tech buried in the mass grave of civilization are known to only a few Possessing understanding and the unshakable will to survive Ryan Cawdor and his warrior survivalists face each day armed and ready for the enemy called Deathlands whose formidable power has yet to claim victory over the human spirit DEFENSIVE PERIMETER In this raw brutal world ruled by the strongest and the most vicious an unseen player is manipulating Ryan and his band luring him across an unseen battle line drawn in the dust outside Tucson Arizona Here a local barony becomes the staging ground for a battle unlike any other against a foe whose ties to pre Dark society present a new and incalculable threat to a fragile world Ryan Cawdor is the only man living who stands between this adversary's glory and the prize he seeks In the Deathlands the future lies somewhere between hope and hell

*Trading Spaces* Emma Hart, 2024-07-06 Looks at the shift from the marketplace as an actual place to a theoretical idea and how this shaped the early American economy When we talk about the economy the market is often just an abstraction While the exchange of goods was historically tied to a particular place capitalism has gradually eroded this connection to create our current global trading systems In *Trading Spaces* Emma Hart argues that Britain's colonization of North America was a key moment in the market's shift from place to idea with major consequences for the character of the American economy Hart's book takes in the shops auction sites wharves taverns fairs and homes of seventeenth and eighteenth century America places where new mechanisms and conventions of trade arose as Europeans re created or adapted continental methods to new surroundings Since those earlier conventions tended to rely on regulation more than their colonial offspring did what emerged in early America was a less fettered brand of capitalism By the nineteenth century this had evolved into a market economy that would not look too foreign to contemporary Americans To tell this complex transnational story of how our markets came to be Hart looks back farther than most historians of US capitalism rooting these markets in the norms of seventeenth and eighteenth century Britain Perhaps most important this is not a story of specific commodity markets over time but rather is a history of the trading spaces themselves the physical sites in which the grubby work of commerce occurred and where the market itself was born Rivers of Power Steven Peach, 2024-02-13 Although the Creeks constitute a sovereign nation today the concept of the nation meant little to their ancestors in the Native South Rather as Steven Peach contends in *Rivers of Power* the Creeks of present day Georgia and Alabama conceptualized rivers as the basis of power leadership and governance in early America An original work of Indigenous ethnohistory Peach's book explores the implications of this river oriented approach to power in which rivers were a metaphor for the subregional provinces that defined the political textures of Creek country The provinces nurtured leaders who worked to mitigate dangers across the

Native South including intertribal war trade dependence settler intrusion and land erosion Rivers of Power describes a system in which these headmen forged remarkably malleable coalitions within and across provinces to safeguard Creek country from harm but were in turn directed approved and contested by local townspeople and kin groups Taking a unique bottom up approach to the study of Native Americans Peach reveals how local actors guided and thwarted Indigenous headmen far more frequently and creatively than has been assumed He also shows that although the Creeks traced descent through the maternal line some became more comfortable with bilateral kinship giving weight to both the paternal and maternal lineages Fathers and sons thus played greater roles in Creek governance than Indigenous scholarship has acknowledged Weaving a new narrative of the Creeks and outlining the contours of their riverine mode of governance this work unpacks the fraught dimensions of political power in the Native South and indeed Native North America in the eighteenth and early nineteenth centuries By privileging Indigenous thought and intertribal history it also advances the larger project of Native American history

**A New Europe, 1918-1923** Bartosz Dziewanowski-Stefańczyk, Jay Winter, 2022-03-03 This set of essays introduces readers to new historical research on the creation of the new order in East Central Europe in the period immediately following 1918 The book offers insights into the political diplomatic military economic and cultural conditions out of which the New Europe was born Experts from various countries take into account three perspectives They give equal attention to both the Western and Eastern fronts they recognise that on 11 November 1918 the War ended only on the Western front and violence continued in multiple forms over the next five years and they show how state building after 1918 in Central and Eastern Europe was marked by a mixture of innovation and instability Thus the volume focuses on three kinds of narratives those related to conflicts and violence those related to the recasting of civil life in new structures and institutions and those related to remembrance and representations of these years in the public sphere Taking a step towards writing a fully European history of the Great War and its aftermath the volume offers an original approach to this decisive period in 20th century European history
