Peter Dance,1966      Made From This Earth Vera Norwood,2014-07-01 The broad sweep of environmental and ecological history has until now been written and understood in predominantly male terms In *Made From This Earth* Vera Norwood explores the relationship of women to the natural environment through the work of writers illustrators landscape and garden designers ornithologists botanists biologists and conservationists Norwood begins by showing that the study and promotion of botany was an activity deemed appropriate for women in the early 1800s After highlighting the work of nineteenth century scientific illustrators and garden designers she focuses on nature s advocates such as Rachel Carson and Dian Fossey who differed strongly with men on both women s nature and the value of the natural world These women challenged the dominant male controlled ideologies often framing their critique with reference to values arising from the female experience Norwood concludes with an analysis of the utopian solutions posed by ecofeminists the most recent group of women to contest men over the meaning and value of nature      *Asian Marine Biology 1986* Brian Morton,1987-06-09 This is the annual journal of the Marine Biological Association of Hong Kong It contains papers on marine subjects of interest to all Asian biologists

*The Mysterious Science of the Sea, 1775-1943* Natascha Adamowsky,2015-10-06 The depths of the oceans are the last example of terra incognita on earth Adamowsky presents a study of the sea arguing that contrary to popular belief post Enlightenment discourse on the sea was still subject to mystery and wonder and not wholly rationalized by science      From Mineralogy to Geology Rachel Laudan,1994-02-02 A fine treatment of this critical time in geology s history Although it goes against our standard histories of the field Laudan defends her views convincingly Her style is direct with carefully reasoned personal opinions and interpretations clearly defined Jere H Lipps *The Scientist*      The Illustrated Natural History John George Wood,1871      *Snail* Peter Williams,2012-01-01 So attached was the author Patricia Highsmith to snails that they became her constant travelling companions Often hidden in a large handbag they provided her with comfort and companionship in what she perceived to be a hostile world Theirs was perhaps an unusual relationship for most of us the tentacled snail with his sticky trail might be a delicious treat served up in garlic butter but certainly not an affectionate pet As well for many a gardener opinions on the snail and slug which is a just a snail without a shell have been shaped by the harm they inflict on vegetable plants and seedlings With *Snail* Peter Williams wishes to change our perspectives on this little but much maligned creature Beginning with an overview of our relationship with snails slugs and sea snails Williams moves on to examine snail evolution snail behavior and habitat snails as food medicine and the source of useful chemicals and dyes snail shells as collectible objects and snails in literature art and popular culture Finally in this appreciative account of the snail Williams offers a plea for a reconsideration of the snail as a dignified ancient creature that deserves our respect

Containing beautiful illustrations and written in an approachable informal style Snail will help readers get beyond the shell and slime to discover the fascinating creature inside

Calvet's Web L. W. B. Brockliss, 2002-07-04 Calvet's Web is a study of the correspondence network of an Avignon physician in the period 1750-1810. Esprit Calvet was an antiquarian, natural historian and bibliophile and was at the centre of a circle of like-minded intellectuals from various backgrounds chiefly based in the Rhone valley. Laurence Brockliss explores for the first time in detail the intellectual interests and relationships of a representative sample of the French Republic of Letters. He traces the destruction of the Republic during the Revolution and its reconstruction in different guise under Napoleon. Calvet's Web is an important contribution to our understanding of the social construction of knowledge, the history of collecting and the history of the book. In addition, by examining the circle's attitude to the philosophes and their programme of material and moral progress, it offers a new picture of the relationship between the Republic of Letters and the Enlightenment.

Hawaiian National Bibliography, 1780-1900 David W. Forbes, 1999-02-01 This comprehensive annotated multivolume bibliography is a record of all printed works touching on some aspect of the political, religious, cultural, or social history of the Hawaiian Islands from the first printed notice mentioning the Islands in a German periodical of January 1780 to the beginning of the twentieth century when the Islands ceased to be a separate political entity. Volume I covers the period from 1780 to 1830 when exploratory voyages to the northern Pacific had largely concluded and the arrival of improved printing equipment in the Islands resulted in a substantial increase in the number of works printed by the Mission Press in Honolulu. In addition to books and pamphlets, the bibliography includes newspaper and periodical accounts and single-sheet publications such as broadsides, circulars, playbills, and handbills because they often contain the only eyewitness or contemporary description of an important event or individual. Entries pertaining to Captain Cook's Third Voyage dominate the first twenty years of the bibliography. They reflect the profound impact of the voyage on both the Hawaiian culture and on nineteenth-century European thought. Extensive annotations provide a brief summary of approximately 760 published works in the first volume of the bibliography. All known editions of each work are listed together with the exact title, date of publication, size of the volume, collation of pages, number and type of plates, and maps, references, and location of copies. The bibliography will be invaluable to scholars, librarians, rare-book sellers, and book collectors within the field of Hawaiiana.

*Johann Reinhold Forster and the Making of Natural History on Cook's Second Voyage, 1772-1775* Anne

Mariss, 2019-09-09 James Cook's voyages of exploration are a turning point not only in the history of the British Empire but also in the history of science and exploration of the Pacific. The last decades have seen a wide-ranging scholarly interest in Cook's voyages focusing on their impact on European and Polynesian societies, their scientific results, and their protagonists such as Cook himself or the nobleman Joseph Banks who took part in Cook's first voyage of exploration. This book examines the hitherto underestimated role of the German scholar Johann Reinhold Forster who together with his son Georg Forster accompanied Cook on his second voyage of exploration 1772-1775 as a principal naturalist. For a long time the German traveler has remained a rather shadowy figure of Cook's voyages of exploration and has only attracted scholarly attention occasionally. Focusing on the making of knowledge onboard the ship and the islands where it made landfall, the study provides a historical reappraisal of Forster's scientific performance as a leading naturalist of his time. By examining Forster's Resolution Journal, Anne Mariss takes a microhistorical approach toward the making of natural history knowledge during the expedition to the Pacific. Mariss unveils the difficulties the traveling naturalists encountered while collecting, describing, classifying, and painting the natural world. Her study brings to light the contribution of the various actors who were involved in this undertaking, such as the scientific assistants, sailors, officers, and the local actors of the Pacific world. Multiculture Alex Rhys-Taylor, 2020-05-12 In this book, Alex Rhys-Taylor offers a ground-breaking sensory ethnography of East London. Drawing on the multicultural context of London, one of the most cosmopolitan cities in the world, he explores concepts such as gentrification, class antagonism, new ethnicities, and globalization. Rhys-Taylor shows how London is characterized by its rich history of socioeconomic change and multiculturalism, exploring how its smells and food are integral to understanding both its history and the reality of London's urban present. From the fiery chillies sold by street grocers, which are linked to years of cultural exchange through cuisines of origin like jellied eels, to hybridized dishes such as the chicken katsu wrap, sensory experiences are key to understanding the complex cultural genealogies of the city and its social life. Each of the eight chapters combines micro-histories of ingredients such as fried chicken, bush meat, and curry sauce, featuring narratives from individuals that provide a unique, engaging account of the evolution of taste and culture through time and space. With its innovative methodology, this is a highly original contribution to the fields of sensory studies, food studies, urban studies, and cultural studies. Bartram Heritage Bartram Trail Conference, 1979 **Colour and Culture** John

Gage, 2024-10-24 What does the language of colour tell us? Where does one colour begin and another end? Is it a radiant visual stimulus, an intangible function of light, or a material substance to be moulded and arrayed? Colour is fundamental to art, yet so diverse that it has hardly ever been studied in a comprehensive way. Art historian John Gage considers every conceivable aspect of the subject in this groundbreaking analysis of colour in Western culture from the ancient Greeks to the late twentieth century. Gage describes the first theories of colour articulated by Greek philosophers and subsequent attempts by

the Romans and their Renaissance disciples to organize it systematically or endow it with symbolic power He unfolds its religious significance and its use in heraldry as well as how Renaissance artists approached colour with the help of alchemists He explores the analysis of the spectrum undertaken by Newton and continued in the nineteenth century by artists such as Seurat traces the influence of Goethe's colour theory and considers the extraordinary theories and practices that attempted to unite colour and music or make colour into an entirely abstract language of its own The first ever undertaking to suggest answers to many perennial questions about the role of colour in Western art and thought this study throws fresh light on the hidden meanings of many familiar masterpieces
