Time Series with Long Memory Peter M. Robinson, 2003 Long memory processes constitute a broad class of models for stationary and nonstationary time series data in economics finance and other fields Their key feature is persistence with high correlation between events that are remote in time A single memory parameter economically indexes this persistence as part of a rich parametric or nonparametric structure for the process Unit root processes can be covered along with processes that are stationary but with stronger persistence than autoregressive moving averages these latter being included in a broader class which describes both short memory and negative memory Long memory processes have in recent years attracted considerable interest from both theoretical and empirical researchers in time series and econometrics This book of readings collects articles on a variety of topics in long memory time series including modelling and statistical inference for stationary processes stochastic volatility models nonstationary processes and regression and fractional cointegration models Some of the articles are highly theoretical others contain a mix of theory and methods and an effort has been made to include empirical applications of the main approaches covered A review article introduces the other articles but also attempts a broader survey traces the history of the subject and includes a bibliography

Statistics for Long-Memory Processes Jan Beran, 2017-11-22 Statistical Methods for Long Term Memory Processes covers the diverse statistical methods and applications for data with long range dependence Presenting material that previously appeared only in journals the author provides a concise and effective overview of probabilistic foundations statistical methods and applications The material emphasizes basic principles and practical applications and provides an integrated perspective of both theory and practice This book explores data sets from a wide range of disciplines such as hydrology climatology telecommunications engineering and high precision physical measurement The data sets are conveniently compiled in the index and this allows readers to view statistical approaches in a practical context Statistical Methods for Long Term Memory Processes also supplies S PLUS programs for the major methods discussed This feature allows the practitioner to apply long memory processes in daily data
