Looking Into the Lives of Children Edith W. King, 1999

See The World Through Child's Eyes Rúben G.T., The journey through our emotional inner longings while meeting ourselves in a deeper way It s truly undeniable that our lives are a reflection of what we believe in and what we feel deep inside And because words can easily become places I would love to share some of the scenic emotional transitions of some of my deepest life changing decisions some metaphors and some real life knowledge that later became wisdom to myself To help better decide on how to act in many different life scenarios in different stages of our human evolution Born from a love seedling that blossomed from the depths of me urging to breathe it incubated into physical form at its own inner rhythm May these bridges we call words bring you the comfort your soul longs for let their beat carry you back to your innate wholeness one that your heart knows so well They will guide you gently into a silent awakening to a deeper truth to a much more meaningful life experience every time you are open enough to receive it In the deep knowing that it no longer belongs to me I open my hands and set it free so that it can become all that it can be to all those who might feel the calling to more than read it fully experience it May my loving embrace in every word gently guide you back home

Soul Searching : The Religious and Spiritual Lives of American Teenagers Christian Smith Dr William R Kenan Jr Professor of Sociology University of Notre Dame, Candidate University of North Carolina Melina Lundquist Denton Ph.D, Chapel Hill USA, 2005-01-25 In innumerable discussions and activities dedicated to better understanding and helping teenagers one aspect of teenage life is curiously overlooked Very few such efforts pay serious attention to the role of religion and spirituality in the lives of American adolescents But many teenagers are very involved in religion Surveys reveal that 35% attend religious services weekly and another 15% attend at least monthly 60% say that religious faith is important in their lives 40% report that they pray daily 25% say that they have been born again Teenagers feel good about the congregations they belong to Some say that faith provides them with guidance and resources for knowing how to live well What is going on in the religious and spiritual lives of American teenagers What do

they actually believe What religious practices do they engage in Do they expect to remain loyal to the faith of their parents Or are they abandoning traditional religious institutions in search of a new more authentic spirituality This book attempts to answer these and related questions as definitively as possible It reports the findings of The National Study of Youth and Religion the largest and most detailed such study ever undertaken The NYSR conducted a nationwide telephone survey of teens and significant caregivers as well as nearly 300 in depth face to face interviews with a sample of the population that was surveyed The results show that religion and spirituality are indeed very significant in the lives of many American teenagers Among many other discoveries they find that teenagers are far more influenced by the religious beliefs and practices of their parents and caregivers than commonly thought They refute the conventional wisdom that teens are spiritual but not religious And they confirm that greater religiosity is significantly associated with more positive adolescent life outcomes This eagerly awaited volume not only provides an unprecedented understanding of adolescent religion and spirituality but because teenagers serve as bellwethers for possible future trends it affords an important and distinctive window through which to observe and assess the current state and future direction of American religion as a whole

The Child as Musician Gary E. McPherson, 2015-09-24 The new edition of *The Child as Musician: A Handbook of Musical Development* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music It presents theory both cutting edge and classic in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills The focus is on musical development from conception to late adolescences although the bulk of the coverage concentrates on the period when children are able to begin formal music instruction from around age 3 until the final year of formal schooling around age 18 There are many conceptions of how musical development might take place just as there are for other disciplines and areas of human potential Consequently the publication highlights the diversity in current literature dealing with how we think about and conceptualise children's musical development Each of the authors has searched for a better and more effective way to explain in their own words and according to their own perspective the remarkable ways in which children engage with music In the field of educational psychology there are a number of publications that survey the issues surrounding child and adolescent development Some of the more innovative present research and theories and their educational implications in a style that stresses the fundamental interplay among the biological environmental social and cultural influences at each stage of a child's development Until now no similar overview has existed for child and adolescent development in the field of music *The Child as Musician* addresses this imbalance and is essential for those in the fields of child development music education and music cognition
