Medieval Military Dress 1066 1500:

Medieval Military Dress, 1066-1500 Christopher Rothero, 1983-01-01 Traces the development of the uniforms armor and equipment of the knights and common soldiers during the Middle Ages **Armies of Feudal Europe 1066-1300** Ian Heath, 2016-06-03 This is a reprint of the 1989 second edition of this book in our Armies and Enemies series It includes details of armies from Andalusia Bulgaria England Estonia France the Holy Roman Empire Hungary Ireland Italy Morocco the Ordensstaat of the Teutonic Knights the Earldom of Orkney the Papal State Poland Prussia Lithuania the Low Countries Kievan Russia Scandinavia Scotland Serbia Sicily Spain Venice Wales and Wendland *Medieval Warfare* Everett U. Crosby, 2000-08-14 Homo sapiens homo pugnans and so it has been since the beginning of recorded history In the Middle Ages especially armed conflict and the military life were so much a part of the political and cultural development that a general account of this period is in large measure a description of how men went to war **A Cumulative Bibliography of Medieval Military History and Technology** Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense

The Bayeux Tapestry John F. Szabo, Nicholas E. Kuefler, 2015-06-18 Commanding its own museum and over 200 years of examination observation and scholarship the monumental embroidery known popularly as the Bayeux Tapestry and documenting William the Conqueror's invasion of England in October 1066 is perhaps the most important surviving artifact of the Middle Ages This magnificent textile both celebrated and panned is both enigmatic artwork and confounding historical record With over 1780 entries Szabo and Kuefler offer the largest and most heavily annotated bibliography on the Tapestry

ever written. Notably the Bayeux Tapestry has produced some of the most compelling questions of the medieval period: Who commissioned it and for what purpose? What was the intended venue for its display? Who was the designer and who executed the enormous task of its manufacture? How does it inform our understanding of eleventh century life? And who was the mysterious Aelfgyva depicted in the Tapestry's main register? This book is an effort to capture and describe the scholarship that attempts to answer these questions. But the bibliography also reflects the popularity of the Tapestry in literature covering a surprisingly broad array of subjects. The inclusion of this material will assist future scholars who may study references to the work in contemporary non-fiction and popular works as well as use of the Bayeux Tapestry as a primary and secondary source in the classroom. The monographs, articles and other works cited in this bibliography reflect dozens of research areas. Major themes are the Tapestry as a source of information for eleventh century material culture; its role in telling the story of the Battle of Hastings and events leading up to the invasion; patronage of the Tapestry; biographical detail on known historical figures in the Tapestry; arms and armor; medieval warfare strategy and techniques; *opus anglicanum*; the Anglo-Saxon needlework tradition; preservation and display of the artifact; the Tapestry's place in medieval art; the embroidery's depiction of medieval and Romanesque architecture and the life of the Bayeux Tapestry itself.

[The Golden Spurs of Kortrijk](#) Randall Fegley, 2010-06-28. The Franco-Flemish region of medieval Flanders was a locus of important trade routes in the 13th and 14th centuries. Located in a prime position between the Holy Roman Empire and the North Sea, present-day northern Belgium, the urban centers of the region were surpassed in population only by the city-states of central and northern Italy. This positioning afforded the Flemish citizens of the region great prosperity and they formed guilds to protect their rights, regulate their working hours and standardize their wages. These guilds produced a cohesive unit of people eager to retain the rights they had gained. In 1302, French cavalry faced the determined Flemish soldiers on foot at Kortrijk/Courtrai. This book analyzes the battle that ensued, its origins, consequences and legacy. It also examines the everyday lives of the inhabitants of Flanders: urban dwellers, knights, nobles, women and others. This is the first major English language study of the historic 14th century battle between the French and the Flemish, a conflict whose repercussions linger in modern Belgium.

[Constantine XI Dragaš Palaeologus \(1404-1453\)](#) Marios Philippides, 2018-09-03. Constantine XI's last moments in life as he stood before the walls of Constantinople in 1453 have bestowed a heroic status on him. This book produces a more balanced portrait of an intriguing individual, the last emperor of Constantinople. To be sure, the last of the Greek Caesars was a fascinating figure not so much because he was a great statesman as he was not, and not because of his military prowess as he was neither a notable tactician nor a soldier of exceptional merit. This monarch may have formulated grandiose plans, but his hopes and ambitions were ultimately doomed because he failed to inspire his own subjects who did not rally to his cause. Constantine lacked the skills to create, restore or maintain harmony in his troubled

realm In addition he was ineffective on the diplomatic front as he proved unable to stimulate Latin Christendom to mount an expedition and come to the aid of south eastern Orthodox Europe Yet in sharp contrast to his numerous shortcomings his military defeats and the various disappointments during his reign posterity still fondly remembers the last Constantine
