Introduction to Conflict

Resolution Sara Cobb, Sarah Federman, Alison Castel, 2019-07-02 The field of conflict resolution has evolved dramatically

during the relatively short duration of the discipline's existence. Each generation of scholars has struggled with the major puzzles of their era, providing theories and solutions that meet the needs of the time, only to be pushed forward by new insights and at times totally upended by a changing world. This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field, each one tied to the historical context and events of the day. In each of these epochs, scholars and practitioners worked to understand and address the conflicts that the world was facing at that time. This book provides a framework that students will carry with them far into their careers, enriching their contributions and strengthening their voices. Rather than a didactic approach to the field, students will develop their critical analytical skills through an inductive inquiry. Students will broaden their vocabulary, grapple with argumentation, and develop critical reading skills.

A Rational Approach to Animal Rights Corey Wrenn, 2015-11-03 Applying critical sociological theory, this book explores the shortcomings of popular tactics in animal liberation efforts. Building a case for a scientifically grounded grassroots approach, it is argued that professionalized advocacy that works in the service of theistic capitalist patriarchal institutions will find difficulty achieving success.

The Psychology of Attitudes and Attitude Change Greg Maio, Geoffrey Haddock, 2015-01-30 What are your attitudes on climate change? Do you have opinions on how political parties should be funded? Or indeed, celebrity misadventure? Written by two world-leading academics in the field of attitudes research, this textbook gets to the very heart of this fascinating and far-reaching field.
