**Psyche and Substance** Edward C. Whitmont, M.D.,1993-01-12 Providing an understanding of the nature of the archetypal form patterns that express themselves in the similarity between substance and psychosomatic dynamics this collection explores why this similarity is a basic factor in the healing process

**Psyche and Substance** Edward C. Whitmont,1983      Psyche and substance Edward Christopher Whitmont,1980      Psyche and Substance Edward C. Whitmont,1983-05-01      **Psyche and Substance** Edward C. Whitmont,1986      Theology of the Soul Martine C. L. Oldhoff,2024-06-10 Theology of the Soul engages with a thoroughly theological and philosophical subject in fresh and profound ways the soul The author examines the possibility of a concept of the soul in modern Western theology In the second part of the 20th century speaking about the soul was strongly criticized in Theology and Philosophy Consequently many academic theologians consider the word soul problematic Remarkably the word soul is very much present in contemporary culture This book takes cultural notions of the soul as employed by for example Marilynne Robinson and Oprah Winfrey as a point of departure The author then investigates the functions of the soul in classical theologies and provides elucidating overviews of the ways in which the soul is discussed and problematized in contemporary Philosophy and Biblical Studies After introducing the apostle Paul as conversation partner she reconsiders various contemporary concepts from a Pauline perspective and offers a constructive systematic theological proposal to speak of the soul in today s modern theological and cultural contexts This interdisciplinary study integrates continental and analytic methods and discussions on the soul in Philosophy and Theology providing a very comprehensive study of the soul

**Underworlds: Philosophies of the Unconscious from Psychoanalysis to Metaphysics** Jon Mills,2014-03-21 The first book of its kind to provide a detailed analysis of the history of the unconscious from the underworlds of Greek and Egyptian mythology to psychoanalysis and metaphysics Jon Mills presents here a unique study of differing philosophies of the unconscious Mills examines how three major philosophical systems on the nature of the unconscious emerge after modern philosophy finding their most celebrated elaborations in Freud Lacan and Jung These three psychoanalytic traditions quite separate from one another in terms of their emphasis and philosophical presuppositions are scrutinised alongside contemporaneous movements in existential phenomenology semiotics epistemology transcendental psychology and Western metaphysics in the texts of Hegel Heidegger Sartre and Whitehead Underworlds provides a scholarly exegesis and critique of the main philosophies of the unconscious to have transpired in the history of ideas Exploring the unconscious from its philosophical beginnings in antiquity to its systematic articulation brought about by the rise of psychoanalysis Underworlds is ideal for practicing psychoanalysts academics of Freud Jung and Lacan and scholars of psychology philosophy and the humanities

**Psychotherapy, the Alchemical Imagination and Metaphors of Substance** Alan Bleakley,2023-07-04 Alchemy is popularly viewed as a secret way of turning worthless base metal into gold and then a precursor to modern chemistry This is

often taken as a metaphor for psychological development This book describes an innovative third way for both the education and exercise of an alchemical imagination that embraces both material matters and psychological insight alchemy as lyrical poetics or the intensive production of embodied metaphor Alchemy here is viewed as an immanent set of metaphor driven best practices for indwelling complex and contradictory earthly matters in a sensual artistic and humane manner Or again it describes best psychotherapeutic practice Alchemy is read not as a medium for personal growth but optimal co existence with the natural world It is an eco logical rather than ego logical project with deep aesthetic concerns education of the senses in close noticing and political intentions a democracy of worldly things The book echoes post Freudian developments in psychoanalysis that avoid the mysticism of symbol systems to work rather with everyday signs and linguistic registers such as embodied metaphors keeping the focus on known and sensed phenomena rather than abstractions **The Idea of the**

**Soul** William Ellis,2024-10-31 First Published in 1940 this book which is written not so much for the philosopher as for the ordinary educated man is an account of the idea of the soul It attempts to answer two questions a what is the idea of the soul and b why has it become unwelcome The first question is answered by tracing the actual historical development of the idea from early myths of the soul up to Renaissance philosophy The second question is dealt with by considering the idea of the soul as it is affected by modern scientific ideas particularly biological ideas The book discusses themes like the physical psyche the natural philosophers Socrates the Platonic immaterial real rebirth of philosophy and birth of Christianity Neo Pythagorean method of biology Behaviourism and nature and the organism This will be an interesting historical reference work for students of philosophy On the Nature of Human Sexual Difference: A Symposium Timothy Paul

Fortin,2024-11-05 This work offers a symposium on the nature of human sexual difference drawing on Plato s masterpiece having explored the observed phenomena of sexual difference four stories are told of the origins essence and ends of the human male and female First the evolutionists and then Simone de Beauvoir and Judith Butler present their accounts Next a fourth and unique vision for our age is added the thought of Thomas Aquinas is placed in dialogue with the evolutionists Beauvoir and Butler thereby introducing into contemporary discourse a voice that is both ancient and new The work seeks to trace each protagonist s account to its fonts so providing a perspective from which various streams of thought might be understood both in their divergence and common origins It thus hopes to offer a common language and an interpretive key in a realm where confusion and misunderstanding too often reign The Body Machines Alexander Bard,Jan

Söderqvist,2012-02-24 The final episode of The Futurica Trilogy It departs from repeated questions about the Death of the Individual in the Age of Interactivity The authors rehabilitate Descartes old concept of the body machine and transform it into the foundation of a very anti cartesian materialist image of humanity relevant for the new emerging paradigm we re entering The Age of The Body Machines **Teleology, First Principles, and Scientific Method in Aristotle's Biology** Allan Gotthelf,2012-02-23 This volume presents an interconnected set of sixteen essays four of which are previously unpublished

by Allan Gotthelf one of the leading experts in the study of Aristotle's biological writings Gotthelf addresses three main topics across Aristotle's three main biological treatises Starting with his own ground breaking study of Aristotle's natural teleology and its illuminating relationship with the *Generation of Animals* Gotthelf proceeds to the axiomatic structure of biological explanation and the first principles such explanation proceeds from in the *Parts of Animals* After an exploration of the implications of these two treatises for our understanding of Aristotle's metaphysics Gotthelf examines important aspects of the method by which Aristotle organizes his data in the *History of Animals* to make possible such a systematic explanatory study of animals offering a new view of the place of classification in that enterprise In a concluding section on Aristotle as Theoretical Biologist Gotthelf explores the basis of Charles Darwin's great praise of Aristotle and in the first printing of a lecture delivered worldwide provides an overview of Aristotle as a philosophically oriented scientist and a proper verdict on his greatness as scientist

*The Futurica Trilogy* Alexander Bard, Jan Söderqvist, 2012-02-24 In the late 1990's Swedish social theorists Alexander Bard and Jan Söderqvist started working on a radical new theory since referred to as The Netocracy Hypothesis At this early stage Bard Söderqvist foresaw that the control of the internet would be the subject of the main power struggle for the next century

*Aristotle* Henry B. Veatch, 1974-06-22 Under the guidance of Professor Veatch Aristotle stands forth again as the philosopher who above all speaks simply and directly to the common sense of all mankind Today Professor Veatch believes the time may be ripe for a belated recognition that Aristotle is a truly live option in philosophy The discussion begins with the *Physics* for Aristotle the discipline embracing all aspects of the natural world and examines Aristotle's doctrine of categories and his celebrated four causes Turning to the *De Anima* Professor Veatch casts aside many errors of interpretation which have come about because of mistaken readings of the term soul and gives an intelligible account of Aristotle's psychology seen within the context of his system as a whole Next the varieties of human achievement are surveyed in Aristotelian terms with introductory discussions of the *Ethics* *Politics* and the *Poetics* Turning to the *Metaphysics* the author demonstrates that the question of the unity of subject matter in Aristotle's metaphysics does not warrant the great difficulty that has been made of it Finally reversing to good effect the traditional order Aristotelian logic is presented with superb clarity and ease

*The Metaphysical Magazine*, 1909

*The Philosophy of 'as If'* Hans Vaihinger, 1924 The present translation is based upon the definitive sixth edition of the original revised for the purpose by the author Professor Vaihinger's own account of his life work and of the spirit in which *The philosophy of as if* was written has been added by way of general introduction p vi

*Santayana the Philosopher* Daniel Moreno, 2015-03-06 Regarding Santayana it has been claimed that he lacks a system while contradicting himself in outrageous ways An attentive analysis of his complete oeuvre however reveals something else entirely It is not easy to classify a thinker as a Platonic materialist an ironic nihilist a spiritual atheist and a conservative without political commitment but if one respects his own language one discerns an astonishing little known Santayana whose philosophical leitmotif consists in 1 detecting the numerous false steps
